twenties. "They were wonderful, but they were often painful, as well and always they were haunted by the fear of growing older; whereas a woman once the raw. ness of extreme youth is past, has learned how to make the most of herself and her personality."

ONE SURE CURE

Clean Soil in the run is the one sure cure and preventative or the most destructive poultry disease, intestinal parisitism, asserts the Poultry Husbandman of the Dominion Department of Agriculture. And practicing what he preaches the poultry runs at the Central Experimental Farm have been freshly ploughed and the rotation system of soil cleaning is under way on the runs used last year. A succession of hoed, grain and green crops is used to remove all possible infection from intestinal parasites. Poultry should always be kept on clean soil; especially growing chicks, and crop rotation on the poultry run is the one most effective way of enabling nature to do the trick.

WHY PULLET'S DON'T PAY

One significant fact in the egg market reports this spring is the marked falling off in egg production. Asked for the reason for this the Dominion Poultry Husbandman states that the extreme dry weather of last year was the cause. "The condition is general throughout Western Canada and to a certain extent in the East," he states "and the fact is, that owing to the unusually dry season chicks last year matured as laying pullets before attaining their proper growth."

RHEUMATIC REMEDY

ANTS AS FARMERS

Did you know that among these wonderful insects called "a people" by farmers? P. B. Prior asks this question

These ants-there are two speciescollect the seeds of various plants in autumn and store them in granaries underground. Some special treatment by the ants hinders the germination of the seeds, though they are in a situation favorable to sprouting, and when the ants are prevented from having access to their granaries, germination takes place almost at once. Nothing is of October. Originally planning on a done to sterilize the seeds, for when it Programme Committee, Misses Myrtle motor trip to the West, they decided at suits their purpose a portion of the the last moment that the train would stock is allowed to sprout-but only under control, as a maltster sprouts his Provincial Constable J. F. McLean barley, sufficiently to cause the transformation of the seed's starch into the sugar. Root and stem are then bitten off and the seeds are dried in the sun

Several Indian ants have similar Mr. and Mrs. J. B. Duffield spent over habits, but the go-ahead agricultural ants of Texas and Florida have improved upon the ancient methods of the Old World harvesters; the Amer- day, May 2nd, 1930, to Dr. and Mrs. R. icans not only harvest grain, but grow H. Aljoe, a son, it first. On an area or about four yards in diameter surrounding the main entrance of their nest they extirpate with their jaws every plant other than the family wish to thank their many friends so-called ant-rice, which thus becomes and neighbors for the kindness shown • pure crop, and in the absence of all them in the recent bereavement of their Mr. and Mrs. A. Catton, Toronto are competition, flourishes. These ants have also a clear idea of the importance Mr. Gordon Winbush of St. Thomas, of facilitating transport by making visited over the week-end with Mr. M. broad, straight roads through the bush and keeping them clear of encroaching weeds. Some of their grain stores are said to be at a depth of fifteen feet below the surface, apparently in order germination. In galleries near the surface they can induce germination when they wish. These agricultural anto have two classes of workers-major and minor-the majors conspicuous Mrs. John Bell left on Thursday owing to their big heads and capable morning for Rivers, Manitoba, to visit jaws, with which they crack the hard

CANADA GETS MOST

According to a report which originated in the British House of Commons, English emigration to Canada has increased more than 25 per cent during the past four years, although emigration to the Dominions generally has shown a considerable falling off since 1926.

Hon. W. R. Smith, parliamentary secretary of the Board of Trade, in reply to a question, said emigration to Canada had increased year by year-from 49,632 in 1926 to 65,558 in 1929, while the Board of trade showed the aggregate emigration to Canada, Australia and New Zealand had decreased from bout 119,000 in 1926 to 94,000 in 1929.

The Colonia! Office also was que tioned with regard to Dominion emigration. Dr. Drummond Shiels, parliamentary under-secretary, gave the same figures as Mr. Smith for Dominion. emigration generally, stating emigration to Canada showed an increase annually.
