EMPIRE TRADE is Canada's Road to Prosperity

World-wide conditions have created an economic situation that presents problems demanding the highest qualities of statesmanship for their solution. Since the war period, new tariff barriers have been created by many countries, restricting the outlets for Canadian products and necessitating new trade arrangements. development of trade within the Empire is the logical solution of the enormous problem involved; and the enthusiastic manner in which the King-Dunning Budget has been received throughout the Empire ensures Canada a most favourable position at the Imperial Conference for the interchange of products.

Early recognition of this trend provided the inspiration for the King-Dunning Budget, which has indicated the path along which Canada must proceed to ensure a continuation of her commercial prosperity. The prompt Providing a market for Canada's farm products, ensuring the building up of a home-market for her manufactured products, the policy of the King administration offers the greatest assurance of Canada's future prosperity.

LOWER COST OF LIVING

Budgets during the past nine years of Liberal Administration have lowered tariffs on many commodities and implements of production; these reductions have automatically lowered living costs to the Canadian public. The King-Dunning Budget, which the electorate is asked to approve on July 28th, is an extension of this policy; dairy equipment and machinery in general placed on the free list; tea, porcelain and china, free under the British preference.

TAX REDUCTIONS

- Sales Tax—Reduced from 6% to 1%. Postal Rates—Reduced from 3 cents to 2 cents; penny postage re-established. Cheque Tax—Reduced from 2 cents on every \$50.00 to 2 cents over \$10.00. Receipt Tax—Abolished. Transportation Tax—Abolished. Insurance Tax—Abolished. Telegraph Tax—Abolished. Reduction in five years estimated to amount to \$116,000,000.

TARIFF REDUCTIONS

- 1922—Sugar, agricultural implements, textiles, boots and shoes. 1923—British preferential tariff reduced by 10 per cent. where goods imported by Canadian port. 1924—Instruments of production used in agriculture, mining, forestry and fisheries. 1925—Well-drilling machinery and fishermen's engines. 1926—Sugar, automobiles, tin-plate etc. 1928—Instruments of production in mining and fishing industries; fertilizers on free list. 1930—Tea, porcelain, china, vegetables, fruits, free under British preference. Reduction in duties means reduction in prices.
