Snowplow Damages Station.

The C. P. R. snowplow from Owen Sound made its first trip of the winter down the line and it celebrated the event at Shelburne station by throwing snow through six panes of heavy glass into the ticket office. Everything in the office got a liberal dose of snow and the glass was shot all over the room in fragments, one piece imbedding itself like a bullet in the woodwork under the ticket wicket. Luckily for Agent Rands he had gone into the waiting room just in time to miss the shower of glass and snow.—Shelburne Free Press and Economist.

Judgment Reserved

A rather complicated case was heard by Magistrate Spereman here last Friday afternoon, at the close of which he reserved judgment until tomorrow in order that the parties may come to an amicable settlement. It seems that two young Bentinck men, Norman Schriener, and John Wilkinson, had had a car deal, but there was said to be a lien on it and a Walkerton dealer, who held the note, seized the car. Both cars were far from being modern ones, and when the magistrate suggested that the cars be dealt back, he was informed that it couldn't be done, one of the cars having been scrapped and the other one burned. He thereupon reserved judgment in the hope that the matter might be amicably settled.—Hanover Post.

DAIRYMEN ORGANIZE

Dairymen producing milk for the manufacture of cheese held a meeting in Belleville, Ontario, on February 12 and organized a new association with the object of (1) Working for the consolidation and amalgamation of present manufacturing plants and having these operated throughout the year instead of during the summer months; (2) the establishment of storage facilities for cheese and to arrange for "a more equitable and up-to-date system of marketing;" (3) to work for the elimination of duplication of milk and cream transportation costs; (4) to improve the quality of the raw material supplied to cheese factories. Four other "aims" are listed but those stated seem to be the most important.—The Economic Annalist.

News in Brief

Interesting Happenings Briefly Outlined for the Busy Readers

Arrest and sentence to prison of 27 men and women of Mardy, Wales, a little mining village, has revealed that Communists managed affairs there during the last few years.

The leader of the group, Arthur Horner, was sentenced to 15 months in prison after testimony that he had assumed the role of dictator of the group's activities. So influential had the Communists become that the village was known to neighboring towns as "Little Moscow."

Nabbed by Detective-Sergeants Walter McConnell and Lockhart Trinnell as they were stepping into an auto on Dundas Street west, Toronto, on Saturday, with ingots of gold valued at \$2,000, a loaded revolver, and scales, Isaac Minovitch, Danforth Avenue, jeweller, and Samuel Shapiro, of Chicago, are held on charges of having highgrade ore. An additional charge of having a loaded revolver has been preferred against Minovitch.

Armed with a warrant for their arrest, the detective sergeants had traced the pair to an address on Dundas Street just west of McCaul and there apprehended them as they were on the point of departing.

Shapiro is alleged to have had the scales and correspondence in his possession having to do with the weighing of ore. Minovitch was carrying the gun. The gold was in four bars.

Claims of widespread fraud in connection with Old Age Pensions were absolutely unfounded, Hon. W. G. Martin, Minister of Public Welfare, declared on Saturday at the annual meeting of Peel Conservative Association in the Orange Hall, at Brampton, stating that out of every 130 persons over 70 years of age in the province, only 40 are recipients of pensions.

Declaring that the Hydro commissioners were ready to assume full responsibility for their actions, the Minister stated emphatically that the Liberal party had failed to present any evidence in the Legislature to substantiate its charges. He eulogized the work of the late Sir Adam Beck and stated that the advances made by Hydro in the rural parts of Ontario would be envied in other countries if the progress were really known.

Referring to the present economic slump, Mr. Martin declared that the pioneers of Canada had endured even greater hardships and came through with flying colors, and he was confident that present-day Canadians would do the same. The budget deficit of the province last year was nothing in comparison with the deficit of the United States, he said. "The only aristocracy we recognize in Canada," he stated, "is the aristocracy of the man who has a job to lend a helping hand to the man who hasn't one."

He touched on the progress made in the establishment of auxiliary classes for handicapped children and mothers' allowances. Peel County's position as a leader in social service work in the province was praised by Mr. Martin, who particularly mentioned the women's institutes.

Gar Wood is now officially the world's power-boat champion. His speed of 111.712 miles per hour on Indian River, Miami Beach, Fla., February 5, has been accepted by the International Motor Yachting Union as a world's record. The new record was set by Gar Wood in Miss America IV in a two-way run. On his southward dash over the measured mile course the veteran Detroit racer was clocked at 112.434 miles an hour. The elapsed time was 36.87 seconds. On the northward run the speed was 110.989 miles an hour, and the time was 35.37 seconds. The average constituted the record speed. Wood a week ago announced that he was building a new boat, the Miss America X to defend the international Harmsworth trophy at Detroit next September.

The previous mark was 110.223 miles an hour, made by Kaye Don, English speed king.

With a view to lessening the perils of level crossings, particularly at night, W. A. Scott, Toronto, recently designed a crossing sign which would show the angle at which a railway line crosses a highway. Mr. Scott suggests the greatest level crossing danger lies in the fact that motorists cannot, at night, tell at which angle the tracks cross the highway, and consequently do not know in which direction to look for an approaching train.

The sign which Mr. Scott designed and submitted to the Board of Railway Commissioners has the regular crossing sign. But directly beneath this is another sign showing the highway and the angle at which the tracks cross.

Sir Horace Plunkett, Irish leader, who

promoted co-operative farming in his country and figured in efforts to settle the political differences between Ireland and Great Britain, died at Weybridge, Surrey, Eng., on March 26, at the age of 77 years.

Making good its threat that Premier Lang, the Socialistic Premier, would not open the new \$30,000,000 bridge over the harbor at Sydney, New South Wales, a member of the New Guard dashed forward while the speeches were in progress, declaring the bridge open.

Hon. James Malcolm, former Liberal Minister of Trade and Commerce, took his seat in the House of Commons on March 22, after his recent illness. He was heartily welcomed by his parliamentary friends.

A quartet of youthful car thieves attempted an escape from a police officer in Trinity Square, Toronto, Sunday night, and as a result brought death to their ring leader. They abandoned the stolen car and made an attempt to get away on foot, but the officer, returning their shots, wounded a lad and captured one of their number as he left the machine, after a thrilling chase through the city streets. The boys, who have all been inmates of the Working Boys' Home, are: Albert Heward, Arthur Thurston, Thomas Sheppard and Harold Schlunsky. Heward died five minutes after being admitted to St. Michael's hospital from hemorrhage of the left lung caused from the bullet wound. Thurston is charged with auto theft, but the other two youths are still missing. The owner of the stolen car is Mr. Edward Lawranson, 108 Waverley Road.

When a fire broke out at Flinton, 50 miles north of Napanee on Sunday morning, five persons were burned to death. The landlady, Mrs. Beckworth, discovered the fire and called to her tenants upstairs. Mr. Cassido immediately rushed down to rescue the aged lady and his little son, aged four, toddled after him. The father smashed a window and dropped the child to the ground and turned to get Mrs. Beckworth but was forced back by the heat and smoke. His attention was then called to his wife and three children upstairs, but after repeated efforts to dash up the staircase, he was forced, by the spreading flames, to jump through a window. He called several times to his wife to throw the children out of the window but received no answer. The building was totally destroyed. The victims are: Mrs. Almada Beckworth, aged 82; Mrs. Marguerite Cassido, 32; Raymond Cassido, 7; Rudolph Cassido, 5, and Elmira Cassido, 2.

FARM HORSES COME BACK

The present low price of oats and other feeds in contrast with the higher costs of gas and oil required in tractor operation combine, as the Dominion Animal Husbandman suggests, to indicate that the horse is rapidly regaining favour as a medium of farm power. He predicts that the next few years will see a revival in horse breeding and the use of heavy draft horses on the farms of Canada, both east and west. As he points out, under present conditions horses can be bred and reared cheaply and when they have reached working age, the charges for depreciation, fuel and repairs are surprisingly low, for the self-oiling engine has nothing whatever on the self-repairing heavy draft horse.

SOME RASPBERRY NOTES

In co-operation with the provincial Department of Agriculture of British Columbia the horticulturists of the Experimental Farm at Agassiz, B.C., have given special attention to the problem of raspberry cultivation in certain sections of the province. The particular purpose of the survey carried out was to determine the reasons for the decreased yields from raspberry patches. These are found to have been due to the following causes:

1. Poor management where the farm owner devotes only a part of his time to fruit production or makes it a secondary consideration.
2. The presence of diseases, of which cane blight and mosaic are the most important.
3. The presence of insects and animals of which crown borers and moles are the most important.
4. A depletion or lack of soil fertility.
5. Winter injury caused chiefly by the removal of virgin timber and underbrush.
6. Poor cultural practices.
