Chevrolet introduces 1969.

'69 Caprice Coupe

Caprice. Match this, you other 69's.

Should we have made the '69 Caprice shorter? Or adorned it with flashy nicknacks? Should we have skipped the bigger new 327 cu.-in. standard V8 engine, the added interior elegance, and the improved Astro Ventilation System? Some people think so—our competitors.

'69 Camaro SS Sport Coupe, plus RS equipment

Camaro. Who needs to say 'announcing' or 'new' or 'better.'

Just look how the '69 Hugger hangs together. Not a line that isn't leaning into the wind. We've improved the interior, too. Quieted the ride. And made the Astro Ventilation ventilate even better. No wonder the other sportsters are gnashing their gears.

'69 Chevelle SS 396 Sport Coupe

If somebody else made a car like this '69 Chevelle, we'd be worried.

Think of the '69 Chevelle as 'concentrated Chevrolet.' It's got Big Chevrolet features, but a naturally active personality all its own. Just add gas—and let the other mid-size cars step aside.

'69 Chevy Nova

1969 Chevy Nova with Torque-Drive.

The '69 Chevy Nova costs very little to get into. Very little to run. And with low-cost Torque-Drive transmission you can order for any 6-cylinder model, it's the thriftiest way yet to get out of a clutch.

How come we "quiet Canadians" are the world's talking-est telephone users?

Could be that
Canadians
have an eye
for a bargain.

For the 14th year in succession, Canadians have led the world in telephone calls per person. Why? One reason could be this: your telephone company makes conversation inexpensive... and easy. In Canada, a flat residential rate covers all local calls. In most other countries, each call over a monthly maximum is charged separately. And the number of "work hours" it takes to pay for a residence telephone for one month is lower in Canada than anywhere else in the world. (In Bell Canada territory, a man employed in the manufacturing industry works an average of 2.1 "work hours" to pay for monthly telephone service as against 2.5 in the U.S.A.; 4.5 in London; 15.8 in Paris.)
