CORNER CONCERNS.

When it was discovered that in chosen as census enumerators, it was thought to be for seductive purposes to lead those gentlemen from the paths of freedom and independence Galvanized and Iron Pip- back into bondage and destroy any other good principles they had acquired by being with better associates and make them like the rest of the Reform party. When it was discovered they were using the office for gaining political intelligence, they were thought to be going from bad to worse. When discovered in the trick in place of honestly and truthfully acknowledging their guilt it was thought to be worse and worse and more of it, but when the climax was reached in this township one Sunday night when one of the enumerators appeared at a home with his pack to take the census. There may be some good come out of this census taking at last, but there is

great amount of evil to begin with Every week ends up bad for the people down the road since the removal of the Murdoch post office. They often have to wait till Saturday's shopping at either Holstein or Durham before they get their, Chronicle and the time seems like eternity.

Quite a number of our young men invested in new bicycles last week and now miraculous escapes and exstories ever told.

More than special interest is now being taken in cement works since the track has been surveyed through this neighborhood to the lake and we all expect in the near forture to go to and from town by train.

Crops look most prosperous a present and many of our farmers are trying to engage help for the rest of the summer. Men of course there will be, but no boys judging from the amount of wages they get.

WOOL.

There is no change in the situation at home except, perhaps, that brought about by the closer proximity of holders of last season's clip to the new clip of Ontario wool.

A great deal of the last clip is still held by large dealers in the country and at prices above an export basis. Dealers here have knowledge of at least 800,000 lbs. of the 1900 clip which is offering, but it is impossible at the moment to work any for export at a profitable price - a price which let our many holders flat, to say nothing of a margin for
