### AFTER TEN YEARS

the Government's notice was attracted, and the inventor was commission- of the smugglers' doings. ed to superintend the construction of a trial machine.

The first difference engine, as Babbage called it, was six feet high, three broad, and one deep. It worked six columns of twenty figures, and was capable of shewing all possible differences of these. Not only this, but once a calculation was begun by human brain the machine would finish it, and then automatically set up the results in type.

So soon as the first engine was finished, and favorably reported on by a treasury commission, Babbage set to work on a far more intricate machine called the analytical engine. He worked at it for twenty years, and to give some idea of the gigantic labor involved, it may be mentioned that at the end of that time no portion of the machine had yet been cast. Only drawings had been made.

Of these, there were over 400, besides more than twenty volumes of notes, rough sketches, and calculations. Seventeen thousand pounds of Government money had been spent. Then the Chancellor of the Exchequer stopped supplies.

The one portion of this miracle of machinery which was actually put together stands in the Kensington Museum, a monument to such patience and ingenuity as no man ever

### before put in practice. MAKING CHANGE.

is the bugbear of those who, like ticket-sellers, have to hand out their goods at lightning speed. Machines for change-making have lately come From the Budget, Shelburne, N. S. into use, and the most recent pat-

THE REASON OF IT.

How St. Pierre comes to be so that France, regarding it merely as a fishing station, charges only tri- a shipment of the stuff right from fling duties on imports. Then, its location in the midst of alien terri- plot, and all concerned in it had to tories, its isolated remoteness and the strange tongue of its people, all enable the trafficking to be done with a shrewdness and a profit not possible under other circumstances. For instance, the duty on rum entering Canada is \$3.40 a gallon; St. Pierre it is only twenty cents. Therefore it pays the Pierrois to buy West India rum in bond at Halifax, bring it to St. Pierre and pay the duty of twenty cents a gallon, and then transfer it to light, handy kegs, which are smuggled into every cove along the St. Lawrence foreshore. The most profitable smuggling, of course, is done in opium, which con-

tains such great value in such small

DECLINED WITH THANKS.

A young novelist, describing the heroine of her story, says: "She had large, sky-blue eyes, between which her fine nose rested like a tiny white sloud, and above which her golden hair hung in bewitching little bangs which were Nature's gift unaided by the curling tongs. She had a cherry mouth, full of pearly teeth, and dainty pink ears. Dainty dimples gave piquancy to an otherwise mobile face, in which there was a constant play of emotions changing from grave to gay. And yet Sybil Ethelwynd Hetherington was not beauti-

Another writer says of her heroine: "When she first heard that her false lover was married to another she was collapsed with grief, but her womanly nature soon asserted itself, and she began a desperate flirtation with another gent," while another heroine was "widowed at seventeen, re-married at eighteen, widowed again at nineteen, the career of Geraldine St. De Courcy had been unlike that of most girls."

AN OMISSION.

'Sue declares that she is single from choice," said Miss Kittish. "But did she say whose choice?" asked Miss Frocks.
