Resolve to Do What Good You Can in This World.

on a plan of the circle.

straight lines, angles, parallel- has been only to God as from ograms, diagonals, quadrangles, but these evidently are not God's favorites. Almost everywhere where you find him geometrizing you find the circle dominant, and if not the circle then the curve, which is a circle that died young. If it had lived long enough it would have been a full orb, a periphery. An eclipse is a circle pressed only a little too hard at

The history of the world goes in a circle. Why is it that the shipping in our day is improving so rapidly? A scientific shipbuilder says it is because men are imitating in some respects what the small wits deride, the old model of Noah's ark, not as we see it in old time pictures, but as | it really was according to the account given. Great ships have now, but where is the ship on sea to-day that could outride a deluge in which the heaven and the earth were wressel, landing all the passengers in safety, two of each kind of living creatures, hundreds of thousands of species?

Pomology will go on with its achievements until after many centuries the world will have plums and pears equal to the paradisaical.
