## DRIED APPLES.

A few Valuable Suggestions to the Dryer.

As soon as the Apple is pared it should be cut into quarters, trimmed and thrown into an ordinary sized pail which has been about half filled with water in which a handful of common salt has been stirred. As soon as enough apples have been prepared, drain off the water, which can be used again, and dry in the usual manner. The effect of the salt water is to whiten the apples very much and prevents them from turning dark; try this way and you will be pleased with the results and proud of your work with really no trouble.

Always cut the apples into quarters, this is very important. Sliced dried apples are not wanted. Do not dry on strings. Do not offer burnt apples for sale. Do not expect the merchant with whom you deal to give you good goods for poor apples.

Canada has taken the lead in many other products and we are all interested in having this apply to dried apples as well. A little extra effort on the part of the dryer will accomplish much.

Dried apples are saleable from 1st Oct. to 1st April but experience has proved that it is the wisest plan to market the goods early while the demand is good.

## A Lake Captain's Experience.

Capt. McDonald, one of Kingston's most prominent mariners, writes: For years I have battled with the agonies of Bronchitic Asthma often so bad that I could not sleep for nights at a time. I spent hundreds of dollars on doctors and quacks without getting relief, but one dollar's worth of Catarrhozone perfectly cured me. The above testimonial was given two years ago, and as the Captain lately stated he was still quite free from Bronchitis, it proves Catarrhozone a veritable specific. Catarrhozone two months' treatment, guaranteed to cure Bronchitis, price \$1.00 small size 25 cts. Druggists or Polson & Co., Kingston.
