

"THE NEW HARDWARE"

Opening Announcement

NEW FIRM NEW GOODS NEW STORE
Open for Business by the End of the Week
COME AND GET ACQUAINTED WITH US

Our new store, a few doors south of the Middaugh House, has been completed, and although there are still many things to be done in arranging our stock, we have decided to open to the public this week and do our best under the circumstances. We realize how much nicer it is to show goods in a bright, cheery store and how much easier it is to keep the stock nice and clean when the store is that way to start with. We intend to keep it bright and attractive. We think you will find every line of our goods to be the very best in their class. Both members of our firm devoted a good deal of time in London, Hamilton and Toronto securing agencies for different lines of goods which are recognized everywhere to be the best in their class. We would like every reader of this paper to come in and carefully inspect our various lines of goods. In our stock you will find plenty of variety in such lines as

Furnaces, Stoves, Nails, Glass, Door Fixtures, Builders' Supplies, Tinware, Graniteware, Oils, Cement, Etc., Etc., Etc.

The McClary Lines OF STOVES, RANGES, FURNACES, ENAMELWARE, ETC.

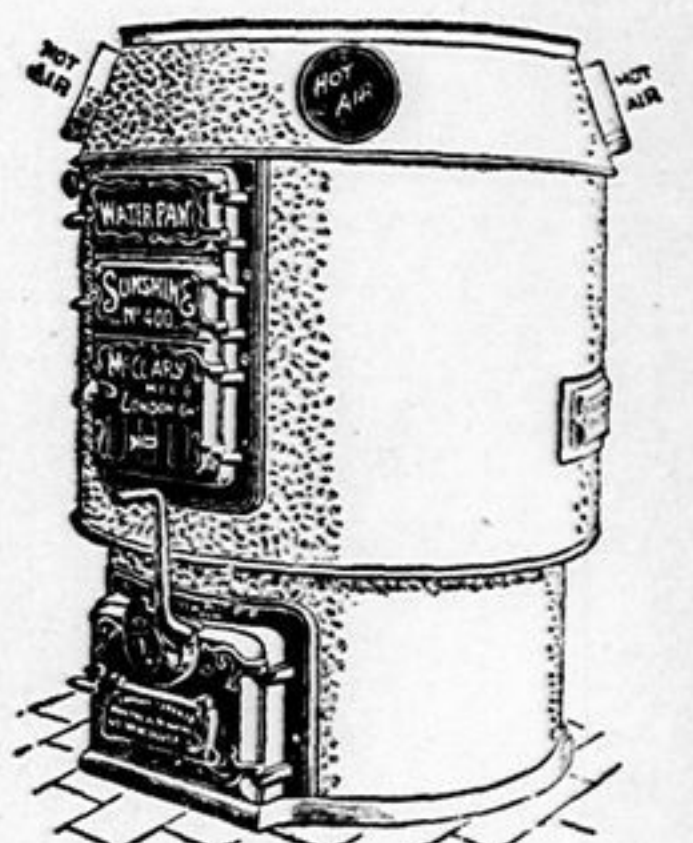

are better known and more successful than any other makes in Canada, and their agency is always sought after by live dealers. We have secured the sole agency in Durham for their celebrated Stoves, Ranges and Furnaces, and have this large Company's guarantee behind every article of their make which we sell our customers. We will always have a complete line of their leading goods in stock and you should examine these carefully before buying any other.

Pandora Range

Pandora Range

The "Pandora" Range, made by McClary's in London is the most talked of and best working Range in Canada. It has many new labor and fuel saving features which are not found in any other stove. It is also a very handsome Range, being tastily dressed with nickle trimmings, and these combined with its smooth bold carvings and rich, massive castings give it an elegant appearance. We invite you to see this Range whether you wish to buy or not.

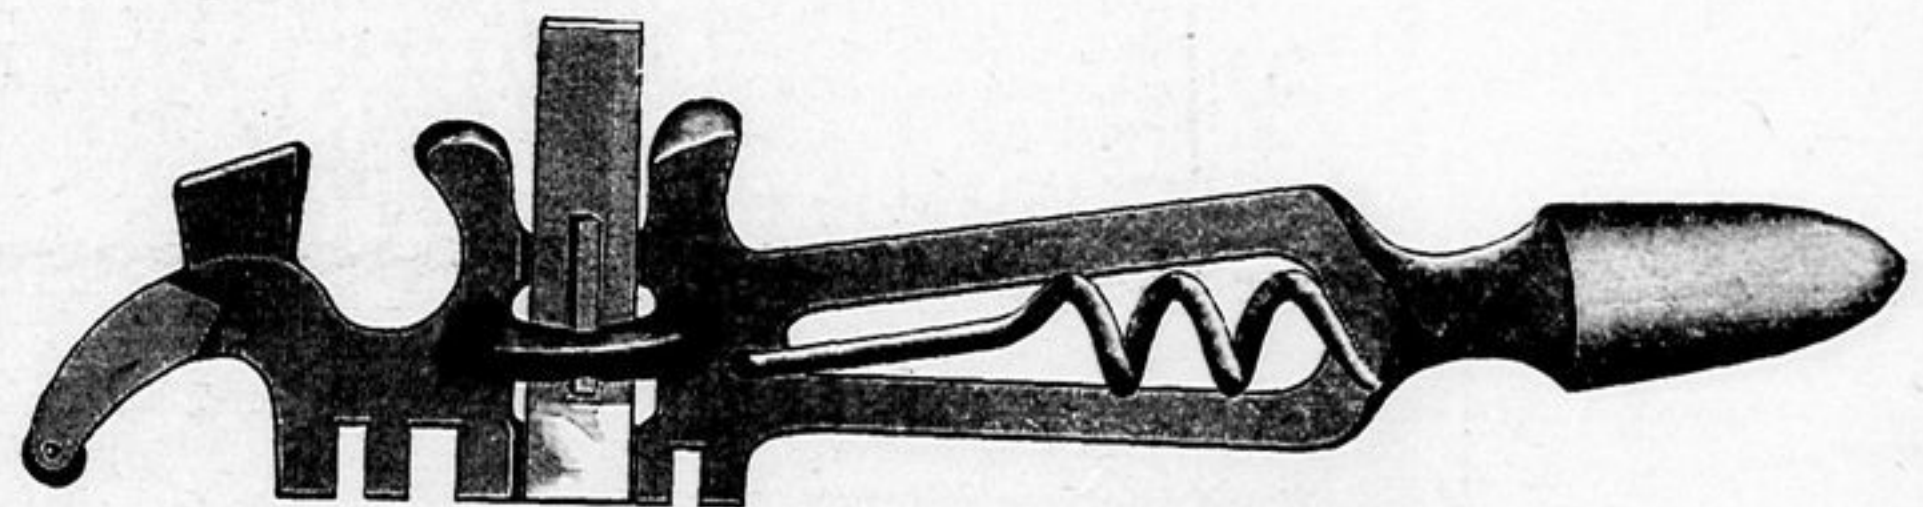

Sunshine Furnace

Sunshine Furnace

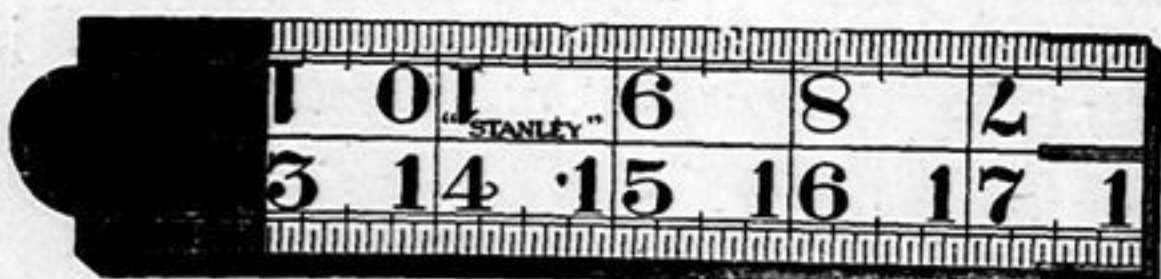

The "Sunshine" is made by McClary's in London and is well named; is almost as good as a private sun in your cellar. This Furnace burns either coal or wood and is made in sizes to suit the smallest home or largest building. It is modern in every detail—has large double feed doors, shaker crank that you can work without getting down on your knees, automatic gas damper which is absolute proof against gas escaping into the house, and a dozen other good devices for saving fuel and work. We will gladly give you all information and estimates of cost of this modern Furnace when you want to instal a heating system.

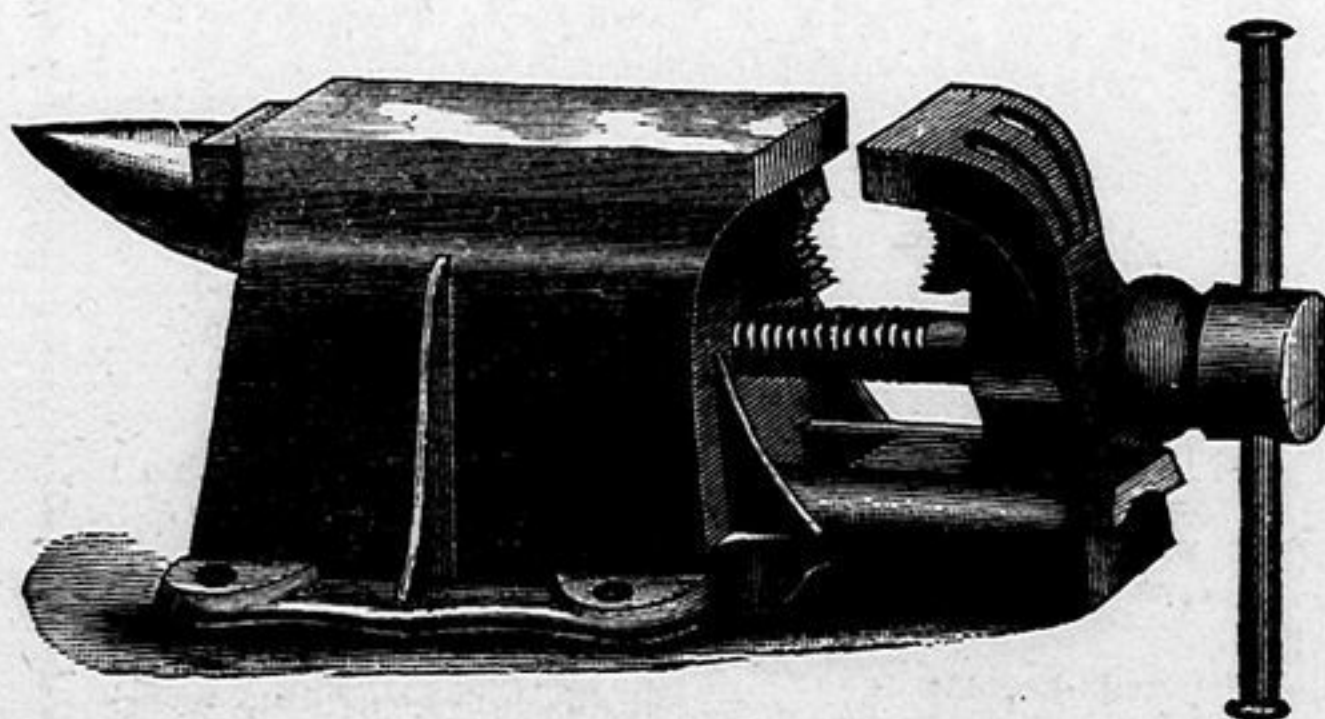

Yankee Ratchet Screw Driver with Drills if required. The handiest tool about the place

Combination Glass Cutter, Scissor Sharpener and Cork Screw (for Local Option)

Blind Man's Rule. See it

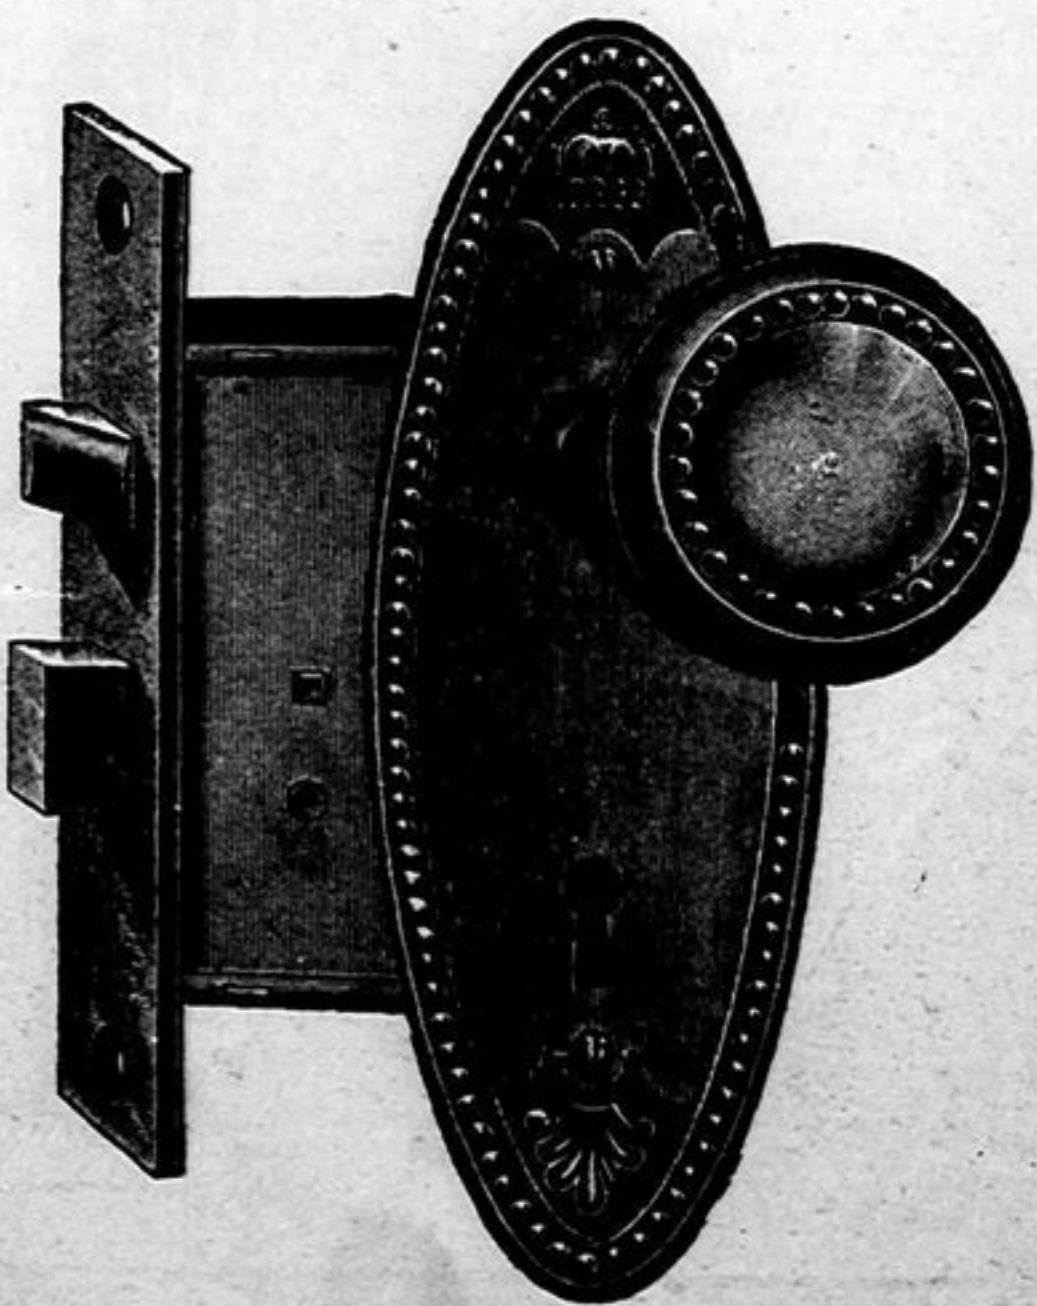

The Best Vice on the Market

IN GLASS

We can give our customers almost anything they want in plain glass, colored glass, ornamental glass, etc., etc.

Our Door Fixtures and Builders' Supplies

A few cuts of which we show you, are equal to anything on the market, and builders would do well to see them before ordering elsewhere. Estimates on all builders' requirements will be promptly given and our prices and goods will do the rest. We can furnish you glass, door fixtures, nails, cement, coal oil, paints, etc on shortest notice.

Locks of all kinds. Call and see them

Auger Bits of different makes sold singly or in sets
