PREACHER AND FARMER

The Two Are Getting Closer Together Once More.

Many Prophets of Old Were Farmers -Preachers Have Done Much for Ontario Agriculture-O. A. C. at Guelph Was Planned by a Clergyman-Pastors Who Have Been In Pastoral Work Indeed.

(Contributed by Ontario Department of Agriculture, Toronto.)

The preacher and the farmer are drawing closer together. This is not surprising, for the former is usually a product of the soil. It is estimated that about 85 of our professional men, including clergymen, were raised on farms, and practically all of them have had to "do the chores" in their time.

Prophets of Old Were Farmers.

The Old Testament worthies were largely men of the soil. Abraham, Jacob, Moses and David were authorities in handling flocks. And was not Elisha famous for his record of following the plough "with twelve yoke of oxen before him." Amos went in for mixed farming - herds and fruits. Abraham Cowley quaintly remarks that the first man was a gardener, and it was only after the second tiller of the soil became a from Durham every Saturday foremurderer that he began to build noon. Highest prices paid. 11 23 tf cities.

Clergymen Have Done Much for Ontario Agriculture.

Rev. John McCaul, an early President of the University of Toronto, was a great champion of farming, and read a paper before the Agriculture and Arts Association in 1858 on "Agriculture Among the Romans."

Rev. Egerton Ryerson, a celebrated Methodist leader, when Superintendent of Education for the Province, had several text books on agriculture prepared for our schools. If he were here to-day to behold the "see and do" work of our modern junior agriculturists, both boys and girls, he would be very much astonished, and would perhaps recite a "Nunc Dimittis." A Preacher Devised the Plan of the

Agricultural College.

Rev. W. F. Clarke, a Congregational minister, if not the father, may be termed the sodfather of the Ontario Agricultural College. In 1869 he was appointed by Hon. John Carling, Commissioner of Agriculture, to visit the leading agricultural colleges of the United States-then very few -and report as to the possibility of such an institution succeeding in Ontario. His investigation was carefully made, and the scheme he recommended was so comprehensive and practical that it was adopted practically in its entirety, and was the foundation of the excellent college now in operation in Guelph. He edited the Canadian Farmer for many years, and was looked upon as almost omniscient in things agri-

cultural. Rev. Dr. Burnet, for over a quarter of a century a Presbyterian minister in Hamilton, was President of the Ontario Fruit Growers' Association for nine years in succession (1869-1879), was a specialist in pear growing, and had a grape named after him.

A Clergyman Who Has Been a Public Benefactor.

Rev. Dr. C. J. S. Bethune, for years Principal of the Boys' College, Port Hope, (Episcopalian), and for some years a professor in the Ontario Agricultural College, has long been regarded as one of the leading economic entomologists of his time. The researches and observations of the able scientist have saved annually thousands of dollars to the fruit and vegetable growers of the Province. For many years he was Secretary of the Ontario Entomological Society and editor of the Canadian Entomologist.

The late Rev. Thomas Fyles of Ottawa was also a noted entomologist, with a delightful literary style. Rev. E. B. Stevenson, of Guelph, a retired Methodist minister, has long been reckoned, both in Canada and the United States, as a leading authority on strawberry growing.

A Preacher Who Managed an Experimental Farm.

Rev. Newton Woolverton, formerly Principal of Woodstock College (Baptist), was for some time in charge of the Dominion Experimental Farm at Brandon, Man.

Father E. A. Burke, a former editor of the Catholic Register, has also been well known, particularly when residing in Prince Edward Island, as an instructive speaker at gatherings of farmers, especially on such topics as fruit and vegetable growing.

A Trio of Active Men of the Manse. Rev. A. H. Scott, of Perth, has been president of the Horticultural Society, and has given many helpful that all persons having claims addresses on gardening, both home against the estate of the said Benand landscape.

Rev. James Anthony has made a reputation in rural leadership, and is a well-known writer and speaker on agronomics.

in Weston, made the record of having procured more members for his local Horticultural Society, pro rata of population, than any other man in their names, addresses and descripthe Province.

Clergyman.

look, and it cannot afford to neglect agriculture, lest the very ground, yearning for fruitfulness and beauty, should cry out in protest against him.

A later article will show what the Ontario Department of Agriculture is doing to assist rural pastors in the solving of some of the problems of country life now confronting them .-Thos. McGillicuddy, Statistics and Publication Branco, Toronto.

Hereand There

Canada's export trade grew \$174,-000,000 in the first eleven months of the fiscal year ending March 31st.

A recent and popular Canadian Pacific appointment is that of Mr. Walter Maughan to Steamship Passenger Manager. The appointment includes management of the company's passenger business on both the Atlantic and Pacific oceans.

Fire insurance companies found 1922 the most disastrous year for more than 20. The ratio of losses to premiums was 68.64 per ceat, British companies suffered most severely, their losses to premiums being 71.48 per cent, mainly due to the Northern Ontario fire.

A gold rush is in full swing and it is expected to bring about the development of more mining camps in the counties of Temiskaming and Abitibi. Gold was discovered in these two counties early in 1922, and a rush of prospectors began in March of that year. In October, 250 claims were staked, comprising 50,000 acres of land, and to date about 90,000 acres have been staked.

In the last fiscal year, Canada imported 1,363.000 pound- of butter from the United States, 297,000 pounds from Australia and 2,254,000 pounds from New Zealand. The total exports of Canadian butter were 8,430,000 pounds.

It is announced that the running schedule of the Trans-Canada Limcommencing May 20th, has been cut cown one hour. Considering the all steel equipment and luxurious appointments and its regular daily on time performance, this is the finest long distance train in the world.

Bungalow camps, such as are operated in the Canadian Rockies, are to be built in the French River, Nipigon Bay and Lake of the Woods districts of Ontario by the Canadian Pacific Railway. Low cost of construction and maintenance will enable the company to offer lower rates than standard hotels. The first three will be ready for occupation Ly July 1st.

According to a recent rearrangement of ports of call ; the Orient. the Canadian Pacific Steamships Limited, by omitting Marila as a port of call between Shanghai and Hong Kong, will bring the latter port four days nearer to Canada, the United States and Europe. This makes possible a through service from London, England, via Canadian Pacific Atlantic Empresses to Quebec and rail to Vancouver and via Canadian Pacific Empresses to Hong Kong under 28 days.

During the year 1922 the Canadian Pacific Railway handled a as compared with 8,732,674 for the previous year. Of this amount 5,175,203 pieces were passengers baggage which compared with 5,-486,455 for the previous twelve months. 9,697 bicycles were handled. 19,336 dogs travelled as baggage and 23,988 baby carriages were moved. There was also a considerable increase in the movement of milk. In 1922, the Company moved 1.623,-707 cans as against 1,614,791 in 19:1; and it is remarkable that most of this increase was in the three provinces, Manitoba, Saskatchewan and Alberta, which is an apparent 4 123 indication of the further development of mixed farming in those

provinces. One of the best examples of a town "growing up over night" that of Climax, the end of steel on the Consul-Assiniboia branch of the Canadian Pacific Railway. All that there was on the quarter section on February 19th, the day on which the settled, was a homestender

site of the new town was finally and a small barn. When the steel was laid in Climax on March 15th there was a restaurant, one rooming house, over a score of dwellings, two blacksmith's shops, a drug store, gents' furnishing store, a big general store, pool room and barber The new town is situated in four large flat marchouses which nearly 100,580 bushels grain were stored, and a butcher on. The new town is situated in I are Tree R.M. number 18, about 20, miles south of Shaunavon.

NOTICE TO CREDITORS

CLIFFORD TO PURCHASE

ELECTRIC LIGHT PLANT Voting on the electric light bylaw at Clifford village, which was postponed a week on account of a snow-storm, took place on Thursday of last week, the ratepayers voting 56 to 33 in favor of purchasing an electric light plant at a cost of \$8,000. The small number of votes polled was not due to a lack of interest on the part of the ratepayers, but rather to disagreeable weather conditions prevailing on the day the vote was polled.
