HANDLING LAYING HENS FOR PAST MONTH

Feeding and Housing Must Both

Give the Birds a Good Run-Dry Mash Hoppers Save Waste-Suggested Ration-Forage Crops-Don'ts for the Layers.

Be Considered.

(Contributed by Ontario Department of Agriculture, Toronto.)

Following are results of experiments carried on by the writer when connected with the Agricultural Experiment Station for Vancouver Island, Sidney, B.C.

Houses and Yards. The house in which the birds are kept is provided with a water-proof roof and a floor that is always dry. In preparing the house for the new flock of pullets, everything movable is taken out, cleaned, and then saturated with a mixture of equal parts of creosite and coal oil. The interior of the house is well scraped and swept clean of any foreign material. A coating of lime-wash is then applied, and the movable equipment replaced after the lime-washing has been done. When everything is dry, a 6-inch layer of dry straw is placed

floor. The house is now ready e five-month-old pullets, and care is taken to see that only strong, wigorous birds are permitted to occupy house space.

The runs provide ten square yards | wood. of surface for one bird. They are in duplicate and are used alternately for feed growing and exercise space. Late-leafing, deciduous trees only are used about poultry yards. The coniferous windbreaks are located far enough away from the poultry yards and buildings to permit of maximum sunlight entering all space occupied by the birds. Feeding.

A dry mash hopper of such construction as will prevent waste is supplied with the following mash mix-

Wheat bran..... 400 pounds. Ground oats 800 " Beef scrap..... 200 " Beef scrap..... What shorts..... 200 Corn meal..... 100 Fine salt.....

This mixture is always available for the birds. The whole grain ration is composed of two parts wheat, one part cracked corn, and one part oats, by weight. This is fed on the floor of the house morning and even-Watson's Dairy, R.R. 4, Durham. ing, in the daily proportion of five pounds per fifty birds, during the late autumn and winter. When a supply of skimmilk is available, the birds are given all they will take, and the beef scrap is reduced one-half. Shell, grit, and charcoal are always before the birds, being supplied in small metal hoppers which are conveniently

3 29 tf Forage Crops for Poultry.

Small areas of kale, chard, and alfalfa were grown to be used as green feed for poultry. The chard was relished to a greater extent than the other green feeds. Green alfalfa was most usful during its season from May to November. For winter green feed, kale and mangles were used. For little chicks, chickweed was supplied during the first ten days, then lettuce and chard. A supply of clean water is always available for all the poultry; it is given in fountains placed thirty inches above the floor and surrounded by the narrowest possible platform on which the birds may stand to drink. This method has Wm. Foster, Proprietor. proved very satisfactory, as it prevents the birds from working dirt and foreign matter into the receptacles.

The laying houses are kept thoroughly clean. Dropping boards are scraped and sanded every morning. All litter and dust is removed every three weeks, the house swept out, and fresh litter again placed on the floor. The perches are sprayed with a creosote and coal oil mixture in equal parts, every three weeks. During the winter period a dust box four feet square and ten inches deep is provided. The birds are always given the freedom of an outside run, no matter what the weather is. The drawer type of trap nest is used, the birds readily becoming used to its action. Broody hens are confined in slat-bottom crates for the necessary period required for the change of their opinion on the subject.

Don'ts For the Layers.

Don't put pullets into an unclean

house. Don't waste time on unthrifty, deformed, or ailing birds; get an axe and a block of wood.

Don't neglect to clean the dropping boards daily.

Don't forget to clean the house and provide new, clean litter every three

Don't neglect to keep the dry mash hopper filled with a mash made from clean, wholesome grain, and meat Don't waste your time with wet

mashes; feed everything dry. Don't neglect the drink; supply abundant water and milk. Don't neglect the supply of shell,

grit, and charcoal. Don't waste time and money feeding tonics; well-cared-for poultry do not need nor are they benefited by, such a practice.-L. Stevenson, Sec. Dept. of Agriculture.

The worthlessness of poor quality bulls lives after them-in their lowproducing daughters.

Apples are not very subject to blight and if we are careful the apple orchard can be kept clean. "Agriculture, for an honorable and

high minded man," says Xenophon. "is the best of all occupations and arts by which men procure the means

In the morning, sow thy seed, and in the evening withhold not thy hand; for thou knowest not whether shall prosper either this or that, or whether they both shall be alike good .- Eccleciastes XI, 6.

HERE AND THERE

Smoking compartments are to be provided in the new wooden winged monoplanes for use on the London-Amsterdam-Berlin air route.

301,980,268 feet of lumber were produced from mills in the Ottawa Valley last season as against 238,-116,764 feet in the 1921-1922 season.

Last season's grain shipments through the port of Montreal exceeded 153,000,000 bushels. Revenues reached \$3,460,810 providing a surplus of \$266,362.

Forest rangers of the Quebec and New Brunswick forestry departments will co-operate to the extent of covering fires on either side of the provincial border.

Two thousand maples and one thousand green ash trees, natives of Saskatchewan, were shipped to the Canadian War Memorial Park at Poperinghe, Belgium, recently. Vancouver is to have direct con-

sular trade relations with Spain.

A vice-consulate has been estab-

lished there which embraces the prairie provinces and is the only one west of Montreal. During the year 1922 boring operations for the discovery of oil and gas in Alberta were continued to the extent of 230,000 feet, resulting in the discovery and develop-

ment of a field with an output of

180,000,000 feet per day. ditions in the prairie provinces, Saskatchewan officials estimate that after paying all expenses the farmers of that province last year had \$100,000,000 in net proceeds to apply on debts.

In 1906, in Iowa, a single head of cats was selected as being a desirable variety. In thirteen years this single head had multiplied to the extent that 1,500,000 acres were sown to it and showed an increased production of 6,500,000 bushels.

One of the largest timber sales that the Canadian Pacific Rahway has made in several months has just been made on Vancouver Island. A group of Stattle lumbermen have acquired 12.000 acres of timber land at Horne Hill. The timber on this stand exceeds 200,000,000 feet.

Part of the plans for keeping the St. Lawrence open all winter submitted by Dimitry Jonavici, Roumanian engineer, to the Federal and Provincial Governments would call for the erection of a nine mile dam at the east end of Belle Isle strait, which would prevent the cold currents from the north entering the river.

The Bungalow Camps to be opened this year by the Canadian Pacific Railway in the French River, Nipigon and Lake of the Woods districts of Ontario will consist of a community house, containing a dining room with stone fireplace, surrounded by several double and single bungalows comfortably furnished for the accommodation of from one to four persons. A number of canvas houses will also be used.

The official opening of the Banff-Windermere Highway will take place on June 30th at Kootenay crossing, B.C. Motorists from all over Alberta, British Columbia and the Western States will be present in large numbers. A lunch will be provided for several thousand people at Kootenay Crossing. Prominent representatives will be present from the Canadian and United States Governments and from previncial and state governments both sides of the line. The official spening will be marked by the cut ing of red white and blue ribbon

How Backache and Periodic Pains Yield to Lydia E. Pinkham's Vegetable Compound

Leslie, Sask.—"For about a year I was troubled with a distressing downbearing pain before and during the periods, and from terrible headaches and backache. I hated to go to a doctor and as I knew several women who had taken Lydia E. Pinkham's Vegetable Compound with good results, I finally bought some and took four bottles of it. I certainly do recommend it to every woman with troubles like mine. I feel fine now and hope to be able to keep your medicine on hand at all times, as no woman ought to be without it in the house." - Mrs. OSCAR A. ANDERSON, Box 15, Leslie, Sask.

Mrs. Kelsey Adds Her Testimony

Copenhagen, N. Y. — "I read your advertisement in the papers and my husband induced me to take Lydia E. Pinkham's Vegetable Compound to get relief from pains and weakness. I was so weak that I could not walk at times. Now I can do my housework and help my husband out doors, too. I am willing for you to publish this letter if you think it will help others." - Mrs. HERBERT KELSEY, R.F.D., Copenhagen, N. Y.

Sick and ailing women everywhere in the Dominion should try Lydia E. Pinkham's Vegetable Compound before they give up hope of recovery.

Pr. A.-Clarence McNally, Elmer Dunsmoor, Olive Dunsmoor, Gordon Greenwood, Davie Aljoe.
