**Defies Rust!**

There's one big point about "Toronto" Stable Equipment which makes me specially proud to sell it. It's the fact that the galvanizing thoroughly covers and completely coats both the inside and the outside of the steel tubing with pure zinc spelter. This "hot" process makes it absolutely rust-defying and proof against strong stable acids for the maximum period. This is a mighty valuable feature. Let me explain some of the many others.
