NOTICE TO CREDITORS

In the matter of the estate of Arthur Sealey, late of the Township of Glenelg in the County of Grey, Retired Farmer, deceased.

Notice is hereby given, pursuant to R.S.O. 1914, Chap. 121, Section 56, and amending Acts, that all persons having claims against the estate of Arthur Sealey, late of the Township of Glenelg, in the County of Grey, Retired Farmer, deceased, who died on or about the 1st day of June, 1923, are required to deliver or send by post prepaid to Lucas & Henry, Solicitors for the Executor of the estate, on or before the 14th day of July, 1923, their names and addresses, a full description of their claims, in writing, and the nature of the security, if any, held by them.

And take notice that after such last mentioned date, the Executor shall proceed to distribute the assets of the estate among the parties entitled thereto, having regard only to the claims of which he shall then have notice, and the said Executor shall not be liable for the said assets or any part thereof, to any person or persons of whose claim notice shall not have been received by him at the time of such distribution.

Dated at Durham this 26th day of June, A. D. 1923.

JOSEPH SEALEY, Executor, by his Solicitors, Lucas & Henry, 6283 Durham, Ont.

WALNUT INVESTMENT

It Pays to Plant Walnuts and Wait Fifty Years.

No Better Legacy for the Farm Lad—The Government Forestry Branch Will Assist—Tree-Growing Requires Little Labor—Black Walnut Trees As Memorials—How to Treat Poison Ivy.

(Contributed by Ontario Department of Agriculture, Toronto.)

"Say, Mr. Forester, if a boy of my age were to plant an acre of black walnut this spring would I live to see the trees large enough to be used for the building of a house to shelter me in my old age?"

"Yes, my lad, you could plant the trees to-day, and in fifty years time the trees would be large enough to cut into interior finishing lumber for your house."

There is some satisfaction in planting a tree and watching it grow to merchantable size.

A Walnut Tree Grows for Many Years.

A walnut tree will keep growing long after it has passed the half century mark, and keeps on making timber until it is one hundred and fifty years old. However, a very nice tree can be grown in fifty years on good soil; yes, large enough to make all the finishing lumber for the interior of a house. Ten acres of land planted under same forestry methods with walnut will make, in time, a fine tract of valuable timber, which when ready to harvest, would at present prices be worth \$1,000 per acre.

No Better Legacy Could Be Left.

A man could leave no better legacy for his heirs than a block of good timber. The long time between seed-time and harvest in forestry frightens the average mortal, and deters him from planting forest trees. But people should not take the long time view seriously. Generations of humans are yet to be born to live in this country, and since the present generation has largely destroyed the original timber, it is only just and fair that we should provide for the wood and lumber requirements of the future. On nearly every farm there is some waste land or the remnant of a wood lot. It may be odd, rough spots or sandy hills, areas that have not produced profitable grain or grass crops and which could well be used for the growing of wood.

The Government Forestry Branch Will Help.

The Forestry Branch of the Lands and Forestry Department is co-operating with four hundred Ontario farmers in which the Forestry officials try to point the way to success in wood lot management. As a result of such co-operation, many walnut, green ash, and red oak seedlings have been given a start toward useful production. A small seed will grow into a big tree. Nature does nearly all the work; man simply plants the seed or the little seedling tree and waits. The young forest is established by planting a tree every six feet, crowding the trees together to force them to grow tall, straight stems. As the crowding becomes too great for thrift, alternate trees are taken out. These thinnings can be used as fence poles, rails, gate material, small lumber, such as chair and table legs, lamp stands, curtain poles, etc. So there is a source of revenue after the trees have been planted twenty years that will take care of the overhead expenses incidental to maintenance.

Very Little Labor Required in Tree-Growing.

With the farm labor situation never satisfactory, and many farmers trying to crop twice as much land as they can handle properly, forest planting should show the way out. If the people of Ontario are to use wood in the house-building of the future, a lot of land owners must do some forest planting very soon.—L. Stevenson, Sec. Dept. of Agriculture.

Black Walnut Trees As Memorials.

Planting of black walnut trees as memorials to soldiers is recommended by the United States Department of Agriculture. It is pointed out that the black walnut played a valiant part in the World War. The wood was used for gunstocks and airplane propellers, and the nutshells contributed carbon for gas masks, while the kernels were used in many delicacies for the boys in the trenches. Demand for the wood for war purposes depleted the number of fine old trees, and this method is suggested for filling their places.

How to Treat Ivy Poisoning.

In the early stages of ivy poisoning remedies having a fatty or oily base, such as ointments, should not be used, as the grease or oil tends to disperse and spread the poison, according to specialists of the United States Department of Agriculture. Instead as they advise simple remedies such as local applications of solutions of cooking soda or of Epsom salt, one or two heaping teaspoons to a cup of water. Fluid extract of grindelia, diluted with 4 to 8 parts of water, is often used.

Solutions of this kind may be applied with light bandages or clean cloths, which should be kept moist, and should be changed and discarded frequently to avoid infection. During the night, or when moist applications can not be used, the poisoned surfaces should be carefully cleaned and dried and left exposed to the air rather than tightly bandaged. In the later stage, after the toxic material has exhausted itself, zinc-oxide ointment and similar mild antiseptic and astringent applications hasten healing.

The practical dairyman has learned that any radical changes in the feeding of his cows should be made gradually if the milk flow is not to suffer.

Here and There

In 1922 Canada produced minerals estimated to be worth \$180,622,000, an increase of practically \$6,000,000 over the previous year.

A British silk manufacturing firm has decided to establish a large plant near Quebec city for the manufacture of artificial silk yarn.

A train nearly a mile long and drawn by a single locomotive recently carried 165,000 bushels of grain over the Canadian Pacific western lines.

Almost sixteen and a half million bushels of wheat were exported from the port of Vancouver during the period September 1, 1922, to May 31 of the present year, according to figures issued by the Merchants Exchange.

Among the large number of unaccompanied women on the last westward voyages of the Canadian Pacific liners "Montclare" and "Melita" were twenty-three who were coming to Canada to be married in various parts of the Dominion.

An official in charge of the cattle shipments from the Port of Montreal recently stated that nearly 40,000 head of store cattle would be shipped from the port this year. He declared the rush seasons would be the months of August, September and October.

On her last eastward voyage the Canadian Pacific liner "Empress of Canada" established a new trans-Pacific record of 8 days, 10 hours and 55 minutes from Yokohama to Vancouver. The previous record, 8 days, 18 hours and 31 minutes, had been held since 1914 by the "Empress of Russia" of the same line.

If public deposits in banks and loan companies can be taken as a fair indication, the Canadian is the world's richest man, according to a statement made by F. A. Hatch, retiring president of the Ontario division of the Canadian Manufacturers' Association. These deposits amount to more than two billion dollars, or \$250 per capita.

According to a report of the Dominion Bureau of Statistics, 62,273,169 tons of railway freight originated in Canada in 1922, and 26,581,631 was received from foreign connections, making a total of 88,854,800 outgoing. Also 62,548,578 tons terminated in Canada and 25,438,906 were delivered to foreign connections, making a total of 87,987,484 tons.

A distinct type of sheep, adapted to prairie range conditions and said to possess superior wool and sheep qualities, has been developed by R. C. Harvey, an Alberta sheep raiser. It will be known as the "Rommellet," and has been evolved after eight years' experimenting with crosses of the Romney-Marsh with the Rambouillet. As evidence of the wool production from this species, Mr. Harvey's annual clip is 120,000 pounds.

That Canada was gradually becoming more and more of an industrial country, and that Canadians themselves were not truly aware of the fact, was the opinion expressed before the Winnipeg Rotary Club by Prof. R. C. Wallace, of the University of Manitoba. He stated that during the past twenty-five years the population of Canada had increased 80 per cent., the railway mileage 120 per cent., while the industrial life of the country increased 700 per cent.

St. Hyacinthe, Que., has the distinction of having developed the world's largest organ plant, and by native invention and improvements evolved an instrument which receives praise from the world's first artists. An organ recently shipped by Cassavant Freres of that place to Paris, France, is absolutely the first to leave the American continent for Europe, the movement having heretofore been in the opposite direction, and was so shipped because the purchaser desired the finest and most up-to-date instrument that could be secured.

R. T. EDWARDS & SONS, R. R. 1, Markdale. Residence: Lot 8, Con. 7. 6213

SUNNY CLIME UNFAVORABLE TO CHINA-BLUE EYES OF NORTH

Optometrists, now in annual congress at Chicago, have announced that blondes with baby-blue eyes are rapidly approaching extinction in this part of the world.

"It is all on account of the intense light in this latitude," explained Dr. H. C. Paul, chairman of the congress. "Pigment protects the retina by screening out the destructive light rays, and the blonde, with not enough pigment for our intense light, suffers accordingly."

"The blonde, of course, comes from Northern Europe, where the light is softer than here, while the brunette comes from warmer, sunnier climes. In America the brunette has a marked optical advantage over her fair-haired sister."

"The only thing that the blue-eyed baby doll can do to keep from going the way of the buffalo and the dodo is to wear glasses that shut out the ultra-violet rays—but can you imagine a blue-eyed flapper trying to practice her wiles through smoked goggles?"

People with blue eyes were advised to roll them frequently, look up from their work often, give them plenty of fresh air and frequent bathings in cold water, sit up straight, and, as often as possible, look at green grass or flowers or the blue sky.

GIRL KILLED BY LIGHTNING

(Dundalk Herald.) Birdie Coutts, the seven-year-old twin daughter of George Coutts of Osprey townline, about five miles

NOTICE TO CREDITORS

In the matter of the estate of Robert Gadd Webber, late of the Township of Bentinck in the County of Grey, Farmer, deceased.

Notice is hereby given, pursuant to R.S.O. 1914, Chap. 121, Section 56, and amending Acts, that all persons having claims against the estate of Robert Gadd Webber, late of the Township of Bentinck in the County of Grey, Farmer, deceased, who died on or about the 18th day of March, 1923, are required to deliver or send by post prepaid to Lucas & Henry, Solicitors for the Executor of the estate, on or before the 14th day of July, 1923, their names and addresses, a full description of their claims, in writing, and the nature of the security, if any, held by them.

And take notice that after such last mentioned date, the Executor shall proceed to distribute the assets of the estate among the parties entitled thereto, having regard only to the claims of which he shall then have notice, and the said Executor shall not be liable for the said assets or any part thereof, to any person or persons of whose claim notice shall not have been received by him at the time of such distribution.

YOUNG DAUGHTER MADE WELL

Mother Tells How Her Daughter Suffered and Was Made Well by Lydia E. Pinkham's Vegetable Compound

Vancouver, B.C.—"My daughter is a young girl who has been having severe pains and weak and dizzy feelings for some time and had lost her appetite. Through an older daughter who had heard of a woman who was taking it for the same trouble, we were told of Lydia E. Pinkham's Vegetable Compound. My daughter has been taking it for several months and is quite all right now. It has done all it was represented to do and we have told a number of friends about it. I am never without a bottle of it in the house, for I myself take it for that weak, tired, worn-out feeling which sometimes comes to us all. I find it is building me up and I strongly recommend it to women who are suffering as I and my daughter have."—Mrs. J. McDONALD, 2947 26th Ave. East, Vancouver, B. C.

From the age of twelve a girl needs all the care a thoughtful mother can give. Many a woman has suffered years of pain and misery—the victim of thoughtlessness or ignorance of the mother who should have guided her during this time.

If she complains of headaches, pains in the back and lower limbs, or if you notice a slowness of thought, nervousness or irritability on the part of your daughter, make life easier for her.

Lydia E. Pinkham's Vegetable Compound is especially adapted for such conditions.

from Dundalk, was killed by lightning at her home in an electric storm Saturday afternoon. When the storm broke she was playing with her sister outside and sought shelter under the summer kitchen, but the lightning struck into the house and the lightning knocked the chimney of the kitchen and passed through the floor, killing the child.
