

**Other Papers' Opinions**

**Should Have Some Sympathy.**  
(Kincardine Review.)  
Sympathy should be extended to Hon. Howard Ferguson. The Drury government carried on public expenditure on a grand scale and the country cannot stand the pace; but it is not so easy to stop such expenditure as to start it, nor is it quite so popular. The people recognize that public debts, municipal, provincial and federal, are enormous, but too many of them still approve unnecessary expenditure, so long as it is in their own neighborhood. If you doubt, this, look around.

**Must Modify Volstead Act.**  
(New York Times.)  
When the Volstead Act was passed no one foresaw the complication into which it would get us with foreign shipping. We should have heeded the wise saying that it is "always impolitic to irritate great Powers with small matters." This special irritation was not heeded, but it is complete, and is having unpleasant results. It is already seen to be hampering our diplomatic approaches to Great Britain in the matter of conceding to us, for a consideration, the right to search and seize liquor in "rum-runners" up to twelve miles off our shores. What we have done in due execution of the Volstead law, as interpreted by the Supreme Court, leads to such sardonic comment on our conduct as this from the London Morning Post:

American totalitism must be so spotted to the world that even the presence of liquor under seal in American harbors becomes intolerable. But outraged virtue has its price. The moralist is willing to do a deal. They will consent to the presence of the shameful thing if we, on our side, will agree to extend the three-mile limit to a twelve-mile limit.

We shall be continuously exposed to sneers of that kind until Congress meets and modifies the Volstead Act so as not to make it flout the comity of nations. Until then we shall have to grin and bear it.

**British Labor Firm.**

(Buffalo Courier.)  
The British Labor Party has voted with all necessary emphasis against affiliation with the Communists. The returns as given in Associated Press cable dispatches, were: For affiliation, 360,000 votes; against affiliation 2,880,000 votes.

A majority of almost eight to one against patting with Bolshevism, should be proof enough of where British Labor stands. Labor's spokesmen in parliament may indulge occasionally in oratorical flights of communistic tinge. But British labor is fundamentally sound and sane as American labor is sound and sane. The doctrines of Lenin and Trotsky have not laid hold, nor will they lay hold of American and British workmen.

**Tried in Nova Scotia.**

(Buffalo Express.)  
Henry Ford proposes to get a distillation from coal which will be available as motor fuel.

A similar experiment has met with success on Cape Breton Island, N.S. There a liquid called benzol retails at 40 cents the imperial gallon and is said to give a greater mileage than 40 cents' worth of gasoline, while there are no complications in the lungs of the engines. Much of the Cape Breton coal is coked, the benzol is extracted and gas is manufactured for use in blast furnaces of the British Empire Steel Corporation. It is asserted that eight tons of this coke is equivalent to ten tons of anthracite.

**A Thrift Proposition.**

(Toronto Saturday Night.)  
In the case of a matured endowment policy, the life insurance part of the contract costs nothing at all, as a policy-holder gets back all he pays in, in addition to the protection he has had during the endowment period. As has been aptly said, this kind of life insurance, in the final analysis, is simply getting people to save their money. It's just a thrift proposition.

**Once Enough For Present.**

(Woodstock Sentinel-Review.)  
It is the boast of a character in a recent book that he is willing to try any drink once. The Ontario electors in 1919 showed that they were willing to try class or occupational government for once. Apparently once was enough, for the present, at least.

No doubt there were several causes for what happened on Monday. No doubt many of the electors were tired of the Drury Government. There was division among the United Farmers, and there was a longing for a return to the old two-party system. Having decided that it was time for a change, the electors went about the making of the change in such a way as to leave no room for doubt. Just why the electors having decided against the U.F.O., should have shown such a strong preference for the Conservatives over the Liberals, is not easily explained; it is evident, however, that a good many electors who voted U.F.O. last elec-

**Durham High School**

The School is thoroughly equipped to take up the following courses:  
(1) Junior Matriculation.  
(2) Entrance to Normal School.  
Each member of the Staff is a University Graduate and experienced Teacher.  
Intending pupils should prepare to enter at beginning of term.  
Information as to Courses may be obtained from the Principal.  
The School has a creditable record in the past which it hopes to maintain in the future.  
Durham is an attractive and healthy town and good accommodation can be obtained at reasonable rates.  
C. H. DANARD, B. A., Principal.  
C. L. GRANT, Chairman.

tion gave their support to Conservative candidates this year.

**Teaching Folks to Eat More.**

(Farmers' Sun.)  
The average citizen with a more or less limited digestive capacity is rather nonplussed by the hectic appeals that are shouted at him from all sides to "Eat More" of this and "Use More" of that. No matter how good his intentions, the sad fact that he has only one stomach, and that one with certain fixed limits of expansion, is a deterrent factor. Over in the States one campaign has followed another; just now they are trying to get people to Eat More Wheat, so that the Western farmers can get rid of their surplus. And the cattle men and packers are trying to tickle up the public's appetite for good, wholesome meat. For years, say the cattlemen, faddists have been snooping around giving meat a bad name and telling people to eat more nuts and birdseed and such-like stuff unfitted for the table of any red-blooded man and his family. The raisers of fat steers are on the war-path, and the vegetarians will have to fight for their lives.

Billboards and advertisements bare out the news that we must eat more raisins for our iron requirements, and more oranges for our vitamins. Dairymen want us to drink more milk and smear bigger hunks of butter on our bread. One enthusiast has calculated that if we all eat twice as much cheese as we are in the habit of doing, Ontario won't have to worry about the overseas market and New Zealand competition. We'd be delighted to do all these things. Every one of the articles mentioned is a first-class food, and we would like to see the dairy, cattle, wheat, raisin and orange industries on a basis of prosperity. But if a man eats more of one thing he

has to eat less of another, except on Christmas and Thanksgiving, when he stuffs beyond the limit of elasticity and suffers for it afterwards. Marvellous surgical operations and transplantings are a matter of daily news in the press. The time may come when every child will be provided with seven stomachs from a calf, so that it will grow up with seven times the food capacity of the poor handicapped individual of today. Then the industries will thrive and over-production of foodstuffs will be a thing unheard of.

**WILLIAMSFORD**

Mr. and Mrs. Albert Krause are at Carrick attending a camp meeting.

Mr. Lloyd Kuglin of London is home on his vacation.

The school picnic held in Mr. Stafford's grove last Friday was quite a success. Lots of races for the children. As our esteemed teacher, Miss Halliday, is leaving us, the children presented her with a fountain pen. There was lots of ice cream, then lunch was served. There was swinging as well. Everybody enjoyed themselves as it was a fine afternoon.

Mr. Robert Elliott and sisters of Toronto visited their brother, Mr. T. Elliott last Monday.

Mr. Archie Hawkin of Detroit visited Mr. and Mrs. Elliott last Wednesday.

Mr. D. McClure of Chesley, accompanied by Mr. Kenyon of Toronto, visited the former's brother and sister, Mr. and Mrs. A. M. McClure, one day last week.

**CELEBRATED GOLDEN WEDDING**

The golden wedding anniversary of Mr. and Mrs. Carl Waynoffski was celebrated at Williamsford recently, with a large family re-union, which came as a most pleasant surprise to

the elderly couple. The members of the family present were Mrs. Sutton, Mrs. Wernholz, Mrs. Lippert, of Kitchener; Mrs. Humphreys, Windsor and Fred and William of Kitchener. Three other sons, Geary, Charles and Jack, live in the West and could not be present at this time. There were also eleven grandchildren and one great-grandchild present, and a large number of other relatives and intimate friends.

The pastor of St. James Lutheran Church, Rev. P. G. R. Pfeffer, motored from Neustadt to where he attended conference, to bring greetings from the congregation with which the happy couple were affiliated ever since their residence in Holland. After a short and impressive religious service congratulations poured in upon the bride and groom of fifty years.

Miss Irene Lippert, of Kitchener, the eldest grandchild, read an address and presented purses of gold to each of the grandparents and flowers to Mrs. Waynoffski on behalf of the family circle. Mrs. L. Purforhl of Desboro, a sister of Mrs. Waynoffski, expressed the good wishes of all in a poetic address and also presented a handsome wedding gift.

Delightful refreshments, followed by fireworks, brought the festivities to a close. May the bridal couple in the golden glow live happily together for many years to come and enjoy the sweet lustre of mellow age is the wish of the community where they have lived so long and won so many friends.

Mr. and Mrs. Waynoffski were born in the Old World and married there in 1873. A year later they came to the land of their choice, Canada, and settled first in Sullivan Township, but later moved into Holland Township on the second concession, where they have since resided.
