RESIDENCE FOR SALE

A desirable 2-storey brick residence with all modern conveniences; good location in Upper Town; terms to suit purchaser; owner leaving town. Apply to Mrs. Bailey, Upper Town, Durham. 531 f

COULD ONLY DRINK HOT WATER SHE SAYS

Mrs. A. White Finds Relief in Her First Dose of Dreco—This Splendid Body-builder Went to the Root of Her Troubles Immediately—"It is a Wonderful Medicine," Says This Grateful Lady.

Many women are suffering the ailments that made life a misery for Mrs. A. White, of 1063 Mabel street, London, Ont., for over two years. Indigestion, gastritis, dizzy spells and pains in the body—how many do not know them? Suffice it to say that the remedy is simple as Mrs. White found, when she took her first bottle of Dreco, the natural herb tonic and regulator. Here is Mrs. White's story that every sufferer should read and profit by:
"I have never taken a medicine that did me as much good in so short a time as Dreco," declares Mrs. White. "I suffered for two years from gas bloating me up after meals. It was so bad sometimes it pressed against my heart causing palpitation and shortness of breath. I could only drink hot water. My liver was sluggish, causing dizzy spells and I had severe pains between my shoulder blades. Constipation was also a source of great annoyance. I surely feel fine since I started to take Dreco and I gladly praise it for restoring my health. I have felt better in the past week than I have for many months. My appetite is improving and the pains through my shoulders have been greatly relieved. My bowels are becoming regulated and I haven't had an attack of indigestion since I began taking this remedy." Dreco is a wonderful medicine.
All the symptoms described by Mrs. White are due only to one thing—run-down digestive system. To correct which, Dreco is especially compounded from Nature's own herbs, roots, bark and leaves. Give Dreco a trial to-day. You will find in it the same curative properties that Mrs. White discovered. Dreco contains no mercury, potash or habit forming drugs.
Dreco is being specially introduced in Durham by McFadden's Drug Store and is sold by a good druggist everywhere.

After the beets are cooked be sure to plunge them into cold water. The skin will rub off easily with this method and the beets themselves hold the heat so thoroughly that the cold plunge will not affect them.

SEED DRILL AND PLOW

How to Properly Care for These Useful Implements.

Watch the Bearings and Attend to Oiling—Cover the Plow's Bright Parts With Thick Oil or Grease—How to Tell the Bushels of Grain in a Bin—"Holding Up" Milk.

(Contributed by Ontario Department of Agriculture, Toronto.)

The seed drill shows the result of neglect in a way so impressively as to deter the owner or operator from abusing this machine to the same extent as he may practice with the plow or harrow. A warped seed box, or rusty and clogged grain runs, leave tell tale evidence over the field that even make the neglectful man repent. With many moving parts, the drill requires frequent careful oiling. Disc and double disc drills have many more moving parts than the shoe or hoe type of drill, and with the disc bearings subjected to dust and sand, considerable trouble will develop if there is any neglect to keep the bearings properly adjusted and oiled. When once the bearings become worn, it is impossible for the disc to function properly and renewal of the parts that have become worn is the only remedy, if the drill is to give best service. All bearings should receive attention and be kept smooth and free from grit. This is best done by a frequent application of light mineral oil. The grain drill bearings are not the easiest to get at; a long flexible stem oil can is generally the most useful type of oiler.

Keep the Oil Can Constantly at Hand.

An oil can should always be with the seed drill. The large wheels turning slowly may not need oiling more than once each half day, but the discs may turn 15,000 times in a day under considerable pressure, hence the need of frequent oiling. The seed box mechanism turning slowly can generally be well served by oiling twice a day. The grain drill should not be exposed to the weather when not in use. A canvas cover sufficiently large to fully protect the grain box should go with this machine for use over night or idle periods if it is not desired to move the drill back to its proper storage in the implement shed until the close of the seeding season. The matter of keeping bolts tight and everything in adjustment is just as important with this machine as with any other. If the drill gets proper care, it will last the lifetime of the operator, and the original cost of paint will carry it through.

When the plow is not in use its bright surfaces should be protected by a layer of thick mineral oil or grease. Heavy machine oil or good axle grease rubbed over the mouldboard, share, coulter and jointer point will save a plow from the ravages of rust. The rusting of one winter period may injure a plow more than a long season's service in the field. Rusty plows lose a lot of time for man and team in the spring, through delay caused by haits to clear and scrape a mouldboard that will not scour. All braces and bolts should be kept tight, the points of share, coulter and skimmer sharp and of proper shape. The plow wheel and axle should be kept well lubricated and packed in such a way as will prevent sand reaching the wearing surface of wheel hub or axle. The small wheel of a plow will turn 40,000 times in a day plowing two acres. If the wheel is to last and do good service, the axle should get a little heavy oil every hour. An oil can holder should be attached to every plow, so that the oil supply will always be at hand and screeching prevented by its timely use.

Watch the Plow Point.

If the plow point becomes worn the inclination of the mouldboard is changed; the plow tends to run on the point, the work becomes heavier on both the horses and the plowman, and poorer work is done. The heel of the share wears nearly as quickly as does the point. With the dulling of the heel the plow will wing over to the land and require more exertion on the part of both man and team. Keep the plowshare sharp and in proper form. A coat of paint applied to the handles, beam and all other parts that do not come in direct contact with the oil will do much to keep up appearances and prevent weathering.
—L. Stevenson, Sec., Dept. of Agriculture.

Bushels of Grain in Bins.

To compute the number of bushels in bins multiply the length by width and depth, and divide the number obtained by 1 1/4. This gives the number of bushels.
If figuring on ear corn, divide by 2 1/2 instead of 1 1/4 as for small grain or shelled corn.
A common farm wagon box, 10 feet long and 3 feet wide, will hold about 2 bushels of grain for every inch in depth, that is, a box 18 inches deep will hold approximately 36 bushels.

When Cow "Holds Up" Milk.

The suppression of secretion of milk is the reflex result of irritation of the nervous system. Shock, chill, fright, pain, rough milking, sensitive teats, weaning of a calf, etc., are some of the causes. If possible have the cow milked by a woman. Try the effects of placing a young calf at her head before starting to milk. Massage the udder gently for a few minutes before milking. If the teats are tender apply some melted lard each evening. An old-fashioned treatment is to lay a sack of grain on the cow's loins at milking time. This is expected to detract her attention so that she will "let down her milk." We cannot vouch for the efficiency of this plan as we have not tried it in practice. In stubborn cases it is best to let a calf nurse.

When cutting in the woodlot, think twenty years ahead.

Here and There

Shipments over the T. and N. O. Railway during the month of May amounted to 329.15 tons of silver ore.

The movements of the mackerel schools will, when observed, be broadcasted from radio apparatus erected for the purpose by the Canadian Marine Department.

Mrs. Dan Otto, of Stratford, Ont., set 33 eggs and hatched 34 ducklings from them. One egg was apparently of the double yolk variety and both yolks were hatched.

A new direct passage service between Canada and northern Ireland has been inaugurated by the Canadian Pacific Steamships, Ltd. Three steamers have been assigned to the route.

James Edwards, of Port Robinson, declares he has a chicken out of this year's hatch which out-freaks most chicken freaks. This one has four legs, four wings, two backs, two necks but only one head. It has been preserved in alcohol.

One hundred and fifty families are to be brought into British Columbia and settled under private enterprise in the valleys east and south-east of Fort George, W. A. Leithwaite announced, following his return from England recently.

A Swedish scientist claims to have perfected a process for the manufacture of "artificial wood" from 50 per cent. sawdust and the balance chalk and chemicals. The product is as hard as oak, and can be planed, sawed, bored, nailed, painted, stained or polished. It will not deteriorate in water.

A start on the actual work of electrifying sections of the Canadian Pacific Railway's main line through the Rockies may be made next year. D. C. Coleman, vice-president of western lines, says that traffic demands and financial conditions would determine when a start would be made.

The decision of the Government of the province of Quebec to grant a bonus of \$4 per acre for land cleared will result in an approximate outlay of \$250,000. Clearance in the past few years has amounted to approximately 40,000 annually, but the total this year is expected to be 60,000 or more.

Speaking to the Canadian Club in London, Eng., recently, E. W. Beatty, President of the Canadian Pacific Railway, contrasted the "irritating tortoise-like slowness" of Canada's population policy with Australia's progressiveness. "We Canadians would be wise to keep our gates open for brains as well as brawn," he said.

One hundred and fifty delegates of the Canadian Weekly Newspaper Association will tour the British Isles next summer, and hold their annual convention in London, according to decisions reached at the final meeting of the convention here. The party will leave about the first of June, and will attend the British Empire Exhibition. The tour will last about six weeks.

Up to the end of 1922 dividends paid by the gold and silver mines of northern Ontario amounted to over \$123,135,000. Cobalt camp was discovered late in 1903 and hardly began producing until 1905. Dividends paid out of Cobalt mines amount to \$98,863,820, which represents practically 50 per cent. of the gross value of production. Porcupine mines have paid \$28,472,988.

George E. Buchanan, of Detroit, head of the "On to Alaska with Buchanan" movement, will have 52 boys and 24 adults or members of the boys' families when he personally conducts his party from Vancouver July 18 via Canadian Pacific "Princess" steamer. Buchanan thinks, with President Harding, that a trip to Alaska is a liberal education to any boy who takes it. He puts up one-third of the expense, the boy earns one-third and the boy's parents put up the remaining third.

The Prospect Park zoo has received as a gift a hen that crows like a rooster after she has laid an egg. That's what comes of this feminist movement.—New York Herald.

WRIT FOR \$600 ISSUED AGAINST FLESHERTON VILLAGE

(Flesherton Advance.)
The Muskoka Free Hospital authorities have issued a writ for \$600 against the village of Flesherton for the keep of a young man named Youngblutt during the past two years.

The facts as we are informed are as follows: The young man worked here some three years ago in Nuhn's woolen mill but left here and went to Muskoka and took a job with the hospital people there at \$30 per month. Later he went into the sanitarium as a patient. The hospital billed the village, but were informed that the charge would not be paid as the young man was not a citizen of this place. We believe he came from the vicinity of Elmwood. Notwithstanding this notification the hospital continued sending along a monthly bill and now, as stated, have issued a writ for \$600 against the village.

There is no notification as to when the case will be heard. Legal advice is to the effect that the little bill cannot be collected.

LUTHER TOWNSHIP GIRL BURNED BY GASOLINE

(Grand Valley Star.)
A rather strange and unaccountable accident occurred at Elwood Turner's, Luther, on Friday afternoon, whereby his eldest daughter, Lorraine, was severely burned. He had just filled the reservoir of a gasoline iron, and handed the cup containing a few drops to his daughter. As she passed him the gasoline burst into flames, setting fire to the child's apron. She escaped Mr. Turner's first efforts to grab her and got outside, when her action fanned the flames. She was rather painfully burned on face and arms, the deepest injuries being on the hands. The

MOTHER OF TWIN BOYS

Tells How Lydia E. Pinkham's Vegetable Compound Relieved Her of Inflammation and Great Weakness

West St. John, N. B.—"I was in a general run-down condition following the birth of my twin boys. I had a great deal of inflammation, with pains and weakness. Finally my doctor recommended Lydia E. Pinkham's Vegetable Compound. He said that your medicine would be the only thing to build me up. I am sure he is right, for I am feeling much better and am gaining in weight, having gone down to ninety-three pounds. I was in bed for over a month, but am up again now. I have recommended the Vegetable Compound to my friends and give you permission to use my letter."—Mrs. ELMER A. RITCHIE, 82 Rodney St., West St. John, N. B.

There are many women who find their household duties almost unbearable owing to some weakness or derangement. The trouble may be slight, yet cause such annoying symptoms as dragging pains, weakness and a run-down feeling.

Lydia E. Pinkham's Vegetable Compound is a splendid medicine for such conditions. It has in many cases relieved those symptoms by removing the cause of them. Mrs. Ritchie's experience is but one of many.

You might be interested in reading Mrs. Pinkham's Private Text-Book upon the "Ailments of Women." You can get a copy free by writing the Lydia E. Pinkham Medicine Co., Cobourg, Ontario.

doctor does not expect there will be any permanent disfigurement, the burns being largely on the surface, although one hand may be marked a little.
