

PRICEVILLE MAN KILLED WHEN KICKED BY HORSE

John Kerr of Artemesia Died Friday Evening in Owen Sound Hospital From Injuries Received That Morning On Farm of John Dow, Three Miles East of Village.—Other Interesting News of Priceville and Vicinity.

A sad fatality occurred three miles east of here last Friday morning about 7 o'clock when Mr. John Kerr, employed by Mr. John Dow of the Old Durham Road, was kicked by a horse and so seriously injured that although he was rushed to the Owen Sound Hospital and an operation performed, he died that evening.

From what can be learned of the accident, Mr. Kerr went to the field with a dish of grain to catch a horse and while there another animal came up, wheeled and kicked at the one Mr. Kerr was attempting to catch, but missed it and struck the unfortunate man in the region of the stomach. The bowels were punctured in several places.

The deceased was in his 70th year and was a man reputed comfortably well off and had been helping Mr. Dow for the summer. The remains were taken from the hospital to Hanover, his former home, and interment made on Tuesday afternoon. Besides his wife, Mr. Kerr leaves three sons, Thomas and John in the West, and Roy in Toronto. He also leaves two sisters and a brother, the two former in Chicago and the latter at Rockwood, Ontario.

Many tourists stop at our Soldiers' Memorial and, judging by consensus of opinion, we have one of the finest and most fitting that this country can show. Great credit is due the committee in their excellent judgment.

We wonder what special inducement we can offer as a village to the different ratepayers to get them to take Hydro-Electric power. Only about half our householders are power consumers. Now is a good time to instal, as labor is cheap and wiring probably as cheap as it will ever be. It is to everybody's advantage to take power. Apart from the great convenience to house, there is a wonderful labor-saving to it and a good protection against fire. We could ask for greater co-operation. The long nights are approaching.

The heavy rains of Monday night and Tuesday caused a general halt to harvesting. Probably the rain will do more good than harm, as the wells are drying and root crops were in crying need of rain.

All signs point to a change in the feeders on the fox ranch. We hear that Mr. Ford contemplates giving up his work and moving elsewhere. We also see Mr. Angus McLachlan making regular trips to the ranch. We may have lost Mr. McLachlan to the farm to have him as a resident. We hope so. However, more authentic information will be forthcoming soon.

The good roads gang is off for a short while to permit harvesting to get ahead.

(Our own correspondent.)

Since we last wrote Mrs. Janet McMeeken has enjoyed a visit from her sister, Mrs. Fred Fiuett and son, of Michigan.

Some of our neighbors have thrashed a few loads of this year's crop and report the yield both in quantity and quality, very satisfactory and far beyond expectations. The root and corn crop will improve much now with the rain. The latter crop with some so far has been rather poor, while others have a good crop. Lorne Allan has a field of corn between nine and ten feet high.

We extend our sympathy to the sorrowing relatives.

Allan Park

(Our own correspondent.)

A few weeks ago a story was circulated that Albert E. Thompson, known in this vicinity as "Irish," who used to drive J. B. Park's grocery truck, was dead. He went back to Ireland last spring, and just recently J. B. Park received a letter from him, written under date of August 5, stating that he is well and that times are very hard in Ireland. There are thousands walking the streets with nothing to do. He landed in Belfast the beginning of March and never got a day's work until July 29. He also stated that all being well next spring, he would again sail for Canada. We do not know who circulated the story—it even was in the Hanover Post, but we are glad to know that he is hale and hearty.

You want to get the most out of the money and labor you are putting into fields of corn and beef and dairy cattle? Then you can't afford to be without a good silo—like my "Toronto" Silo. It supplies the equivalent of rich June pasturage all through the winter. It quickly pays for itself in more milk and healthier cattle.

"Toronto" Silos are made of double tongued and grooved staves of selected spruce, treated with creosote. Silage juices do not affect treated wood. You get 15% extra capacity, due to the special "Toronto" Hip Roof construction.

I'll be glad to talk about these splendid dividend-payers at any time.
