#### The Most Phenomenal Success in the Heating Business in Canada

Only placed on the market a year ago, the Gilson furnace has had an astounding success. It has taken the trade by storm. Over 400 of the best hardware men and tinsmiths in Ontario alone—men who KNOW furnaces—have taken on the Gilson because it appeals to them as the best heating plant made.

#### Here are Some of the Reasons Why:—

- (1) A real cast-iron furnace—fire pot, feed section and radiator are heavier in construction than in any other furnace I know of.
- (2) Burns coal or wood. A splendid furnace for soft coal. Big roomy door makes it ideal for burning wood.
- (3) GUARANTEED FOR TWENTY-FIVE YEARS—The broadest and longest guarantee given with any furnace. Two-piece fire pot, straight-walled to prevent ashes lodging against the side and deadening the heat radiation.
- (4) Triangular duplex grates, easy to shake, and big roomy ashpit.

#### CARRICK TOWNSHIP DRAINAGE IS BEING SURVEYED

Engineer Making Award For Dredging of Teeswater River.—Cost Estimated at \$100,000.

A party of engineers have been making a survey of the western part of Carrick Township, Bruce Co.,

during the past three weeks to ascertain how much land in that Township drains naturally into the Teeswater River, which flows through Culross and Greenock and finds an outlet, in the Saugeen River at Paisley.

The engineers say that this river has its origin in Carrick and that Vogan's Creek on the second conce-

sion, and Fischer's Creek, on the Elora Road, are tributaries.

An engineer is now engaged in making an award for the dredging of the Teeswater River near the boundary line of Culross and Greenock Townships, the estimated cost of which will be \$100,000. Each township will be assessed according to the amount of land drained.
