CANADIAN DAIRYMEN FACE COMPETITION

Dominion Dairy Commissioner, Just Home From New Zealand Declares Canada Must Wake Up or Lose Her Overseas Market.

The Dominion Dairy Commissioner, Mr. J. A. Ruddick, who visited New Zealand and Australia recently in the interests of Canadian dairying has published his observations in a bulletin entitled "Dairying in New Zealand and Australia." These countries are competing strongly with Canada on the British market and Mr. Ruddick points out, by way of encouragement, some of the advantages enjoyed by Canada in the manufacture and sale of dairy products. These advantages are:

Greater experience in breeding and handling dairy cattle.

A more profitable use of the by-products of the dairy, such as skim-milk and whey.

Lower cost of manufacturing butter and cheese.

Nearness to market and lower cost of marketing.

The existence of what is probably the best competitive primary dairy market in the world at Montreal.

A well established and economical export business.

An established reputation for cheese.

Excellent dairy schools and systems of field instruction.

That we may make the most of these advantages, and regain and retain our export business in dairy products with Great Britain, Mr. Ruddick says that attention must be given to half a dozen points, which, summarized, are:

A keener appreciation of the supreme importance of quality.

A new spirit must be aroused to meet the change of situation that has taken place in the last two or three years.

Universal grading, more frequent deliveries of cream for butter-making and the proper maturing of cheese before shipment.

Reorganization of the factory end of the business by improvement in buildings and equipment, including cool curing rooms and decent salaries for competent cheese- and butter-makers.

The fullest co-operation between all the elements that make up the dairy industry in Canada.

The unfair and demoralizing practice of holding cheese- and butter-makers financially responsible for "cuts" in the sale price of butter and cheese on account of defects in quality must be dropped as quickly as possible.

The bulletin contains a great deal of information of much interest and value to those engaged in dairying, including the methods of manufacturing and marketing and the laws that prevail in New Zealand and Australia. Copies of the bulletin may be had on application to the Publications Branch of the Department of Agriculture at Ottawa.

PROHIBITION

(Louisville Courier-Journal.) "This gin has queer effects. It may be all right, but who is the lady dancing on the table?" "The chaperon."

If you'd succeed in what you do, And from the world gain thanks, Just be in the self-starter class, And not among the cranks.

ST. PAUL'S, EGREMONT, PLAY WILL BE GIVEN SHORTLY

The Young People of St. Paul's Church, Egremont, will give a play entitled, "Mrs. Briggs of the Poultry Yard," in the school-house near the church; on Friday, November 16, Admission 25c. and 10c.

HOW IS YOUR LABEL?

Though we have endeavored to explain it, there are still some who are unable to interpret the meaning of the label on The Chronicle. Let us try to make it clear. "Dec. 24" following the name indicates that the paper is paid up to the end of the year 1924. "Aug. 24" shows the subscriber paid up to the end of August, 1924. According to our method of marking, the paper expires at the end of the month named in the year indicated. "Dec. 09" means that the subscription is paid to the end of the year 1909. The labels are usually changed about the beginning of each month and the changed label is to be taken as a receipt for moneys received. If money be sent at any time during the month and the label is not changed shortly after the beginning of the next month, it would be well for the subscriber to make inquiry. About the end of the year when renewals come in more rapidly than at any other season it means a lot of work to acknowledge each remittance separately. We hope we have made the matter sufficiently plain. Look at your label now and see what it says.

SAVING FENCE POSTS

Ontario Puts in Twenty Million Fence Posts Yearly.

White Cedar Posts Will Soon Be Unobtainable—Coal Tar Creosote the Best Wood Preservative—Directions for Application—Cottage Cheese Easy to Make.

Contributed by Ontario Department of Agriculture, Toronto.)

Every year the decay of fence posts in Ontario farms requires a replacement of not less than twenty million posts. This repair bill of five million dollars each year could be very greatly reduced through the use of wood preservatives. A white cedar post lasting twenty-five years may last fifteen years in the natural condition, but treated with creosote it will last thirty years. It should be good business to treat all posts, saving money, posts and labor.

White Cedar Posts Soon Unobtainable.

White cedar posts will soon be unobtainable. Other woods can be used; woods with a reputation for early decay, but which can be made very efficient by the creosote treatment. For instance, soft maple or willow posts will last but four years in the natural condition; treat them with creosote and such will be serviceable for twenty years. It costs about twenty cents per post for creosote treatment. If the post will last double or five times as long through being creosoted, surely the twenty cent investment is a profitable one.

Decay Caused by Fungi and Bacteria.

Decay or rot in fence posts is caused by fungi and bacteria. Wood tissue being largely cellulose is a good food for bacteria and fungi, and the moist, away from light, condition just beneath the surface of the soil is also suitable to their development. Hence we see the posts rotting off just below the surface of the soil in which such are set. When a post is soaked with creosote it becomes a poison medium to the fungi and bacteria that may attack it; and their growth is greatly retarded. Coal tar creosote is the most satisfactory preservative that we can use on the farms. The posts to be treated must be thoroughly seasoned and dry to absorb sufficient creosote. The practice of spraying or brushing on hot creosote is not a very profitable one, as the wood does not absorb enough of the preservative to be of much use.

How to Get Best Results.

To get good results, an open tank with fire place beneath, or other heating arrangement, should be set up. The coal tar creosote is heated in the open tank, and then the posts are immersed long enough to permit a good soaking with the hot oil. A large oil drum with one end removed and set over a fireplace makes a cheap and efficient tank, if nothing larger is at hand on the farm. The following points should be kept in mind by the man doing the work:

- (1) Have the posts clean, dry and free from bark.
(2) Heat the creosote to 180° F., and maintain for 2 to 6 hours, according to condition of posts.
(3) Immerse the posts in the creosote deep enough to give a treatment that will extend six inches above the ground line after posts are set in fence row.
(4) Leave the posts in the hot oil long enough to permit them to cool after the fire has been drawn.
(5) Add more creosote to the tank to take the place of that absorbed.
(6) Use small posts; 4 1/2 inches in diameter and round are to be preferred.
(7) Do not let the temperature go above 200° F.—L. Stevenson, O.A.C., Guelph.

Cottage Cheese Easy to Make.

On most farms there is produced considerable skimmilk. It is fed to calves, hogs or chickens, while little thought is given to its value as human food on the farm. One form of utilizing this valuable food in the household is as cottage cheese, or Dutch cheese.

Cottage cheese contains all of the proteins of milk and a little fat. It contains more protein than most meats and the cost is very slight. Each pound of cottage cheese contains about one-fifth of a pound of protein, most of which is digestible.

This food alone is delicious and palatable, and it may be made more so by adding a little sweet or sour cream, salt, chopped onion, and pimientos. It may be used in sandwiches, and salads, and served with fruits, jellies and nuts. As a meat substitute cottage cheese rolls make a pleasing dish.

Cottage cheese may be made in any home by permitting the milk to sour naturally until it curdles or clabbers. Cut the curd into fine pieces with a knife and cook slowly over a slow fire, preferably at the back of the stove, until the curd contracts and wheys off. Remove the whey, wash with cold water to firm the curd and wash out some of the acid taste. Place in colander or hang in a cloth sack to drain. After cooling and draining it is ready for the table. It requires no curing.

Any one who likes game birds to eat, such as quail, grouse and pheasant, can have a supply of meat just as good as any of those by raising a few guinea fowls. Guinea hunt their own feed nine months in the year, and are as good as a watch dog to raise an alarm when something goes amiss. It is a hardy hawk that will take a chicken when there are guinea around.

Do not include the common green or the purple barberry in your list of shrubs for this season's planting. Both are a host plant for the wheat rust and must not be planted near wheat fields. The Thunberg's or Japanese barberry is much more satisfactory for ornamental purposes.

FATHER AT DEATH'S DOOR AS CHILD IS BURIED

Hundred Attend Funeral of Southampton Babe As Mother Speeds to Husband's Side.

The saddest funeral ever held in Southampton was that of little four-year-old Loreen Longe, daughter of Mr. and Mrs. J. A. Longe, which took place on Thursday of last week.

The sad feature of the case is that the little girl's father, who is a returned soldier, is in a serious condition in a London hospital and the mother was unable to attend the funeral of her child, she having received a telegram requesting her presence at the bedside of her dying husband in London. The grief-stricken mother had to leave Southampton on the 5.40 a. m. train for London, while a few hours later hundreds of friends accompanied the remains of the little girl to their last resting place.

The graveside presented an impressive scene such as few of those who were present would care to witness again. No mother's tears flowed as the little white casket was being lowered, yet hundreds stood with bowed heads, unable to understand the designs of Providence in this sad case.

MEAFORD MAN SENTENCED FOR MILL BURNING

Former Meaford Man Given Four Years in Kingston.—Alienists Find Incendiary Is Not Insane.

Pleading guilty on September 27 to a charge of arson in connection with the burning of the mill of the Euphrasia Lumber Company in August, 1922, and after having been remanded for five times, Walter J. Moore, former Meaford man, was on Saturday sentenced to four years in Kingston penitentiary by Police Magistrate Cresor at Owen Sound.

The last of the five remands was made a week ago at the request of the Attorney-General's application for an examination as to the sanity

Is Your Battery in Tip-Top Shape?

Better get it Recharged before the Cold Weather comes along.

Mr. Jack Frost and a run-down Battery don't agree, and the Battery always comes off second best.

Start the Cold Weather with a fully-charged Battery and be safe from all possible injury from Frost.

YOUNG DAUGHTER MADE WELL

Mother Tells How Her Daughter Suffered and Was Made Well by Lydia E. Pinkham's Vegetable Compound

Vancouver, B. C.—"My daughter is a young girl who has been having severe pains and weak and dizzy feelings for some time and had lost her appetite. Through an older daughter who had heard of a woman who was taking it for the same trouble, we were told of Lydia E. Pinkham's Vegetable Compound. My daughter has been taking it for several months and is quite all right now. It has done all it was represented to do and we have told a number of friends about it. I am never without a bottle of it in the house, for I myself take it for that weak, tired, worn-out feeling which sometimes comes to us all. I find it is building me up and I strongly recommend it to women who are suffering as I and my daughter have."—Mrs. J. McDONALD, 2947 26th Ave. East, Vancouver, B. C.

From the age of twelve a girl needs all the care a thoughtful mother can give. Many a woman has suffered years of pain and misery—the victim of thoughtlessness or ignorance of the mother who should have guided her during this time. If she complains of headaches, pains in the back and lower limbs, or if you notice a slowness of thought, nervousness or irritability on the part of your daughter, make life easier for her. Lydia E. Pinkham's Vegetable Compound is especially adapted for such conditions.

of Moore being made. An examination was carried out on Friday and the official from Toronto who made the examination stated that Moore was not at the time he committed the offense, nor is he now insane.

In passing sentence the magistrate remarked that the crime of arson was so serious that he could send a man to jail for life. Moore had made restitution to the insurance company and the magistrate said he would give some consideration to this fact.

IN MEMORIAM

McNally.—In loving remembrance of Stanley M. McNally, dearly beloved son of the late James McNally, and Mrs. McNally, aged twenty-eight years, two months and fifteen days. But oh, for the touch of a vanished hand, And the sound of a voice that is still. —Mother.

Durham High School

The School is thoroughly equipped to take up the following courses:

- (1) Junior Matriculation.
(2) Entrance to Normal School.
Each member of the Staff is a University Graduate and experienced Teacher.

Intending pupils should prepare to enter at beginning of term.

Information as to Courses may be obtained from the Principal.

The School has a creditable record in the past which it hopes to maintain in the future. Durham is an attractive and healthy town and good accommodation can be obtained at reasonable rates. J. A. M. ROBB, B. A., Principal. C. L. GRANT, Chairman.
