## Ontario

**TORONTO**—George Grubb, a 66-year-old farmer, who lives in suburban York Township, died in hospital Saturday of injuries suffered when he was attacked by a bull. He was exercising the animal in the farmyard, slipped on the ground and the bull trampled on him. A son, Arthur, lives in Woodstock.

**KINCARDINE**—Alf. Carver of Torbermory, lays claim to the title of Bruce County's champion wolf hunter and can back it up with a long record of successful encounters. This week he trapped his first wolf of the winter. In the past four years he has trapped 11 each year for a 44 total, and estimates he has taken altogether 270.

**TILBURY**—James J. Hickey, 61, of Detroit, suffered bruised ribs and shock Saturday when the automobile he was driving overturned on the Middle road four miles west of Merlin and travelled more than 100 feet on its top. Hickey, treated at the office of Dr. Grant Berry and then taken to St. Joseph's Hospital, Chatham, for X-ray examination, told police he was driving east and took to the ditch to avoid a westbound car attempting to pass a parked trailer. Hickey's car was wrecked. Provincial Constable Ben Mulholland investigated.

**WOODSTOCK**—Cpl. Russel Henry Christensen, 21, while with the Algonquin Regiment in Belgium, was taken prisoner September 17. The young soldier was on the continent since early in July. Friday, November 24, Cpl. Christensen was heard over short wave in a message from a German prison camp stating that he had been wounded but was now well. He requested letters as he was lonely. Sympathetic listeners from near and distant points have written his relatives, all telling the same story. This is the first word of him since official word was received late in September that he was missing on September 17. He is the son of Henry Christensen of Plattsville, and the late Mrs. Christensen.

**CHATHAM**—Theives late Saturday night broke into the service station known as Porky's Corners, operated

by George Turner, at the intersection of No. 2 Highway and the fourth line of Harwich Township, and secured loot valued at more than \$100. The break-in took place while the proprietor and his family were in Chatham, and the thieves, apparently were not thwarted in their work by a watch dog left on the premises. The robbers gained access by breaking the glass in the door through which they opened the latch. They took a large quantity of cigarettes, tobacco and cigars of various brands, candies and chocolate bars, and also a small radio. They smashed the lock on the pump outside, and stole an undetermined amount of gasoline. Provincial police, who are investigating, said no clues were left.

**WINDSOR**—Seven men were arrested by Windsor police over the week-end as alleged safe-crackers, house-breakers and gasoline thieves. Maurice Bourdeau, alias Maurice Henderson, 36, of no fixed address, was captured by Constable Arnold Burdon, who heard a noise inside Nessel's dry goods store, 1736 Wyandotte street east, shortly before 5.30 a.m. Sunday. Constable Burdon was making the rounds of his beat at the time. He ran to the rear of the building, saw a man clamber out of the skylight and run across the roof, climb part way down and then leap. The fellow apparently hurt his ankle in the leap and Constable Burdon was there to grab him. On his person were found an envelope containing 27 cents, belonging to Miss Esther Applebaum, a clerk in the store, two pairs of lady's hose, a new wallet and a pair of eyeglasses. Near the skylight police found two other pairs of lady's hose. Officers summoned to the scene found the office safe smashed open and the back torn off the cash register. Near the safe they found a wrecking bar, two hand axes, two machinist's hammers, a hacksaw, a keyhole saw, and a chisel.

**MEAFORD**—Over 300 quarts of spawn was secured on two Meaford fishing tugs, it was revealed by Kenneth Clock, who has just completed operations. At Thornbury over 200 quarts was taken. As the estimated number of eggs in a quart of spawn is 7,000, the total take from the two ports is in excess of 4 million eggs. Spawn is taken aboard the tug by Government-paid men. Only live fish are used, and after killing the fish the man in charge of operations removes first the milk from the male fish and then the spawn from the female. The spawn is removed by pressure on the belly of the fish. By the time the gatherer reaches shore the spawn that is not fertilized has turned white. All of the good eggs are a deep cream in colour. Meaford spawn is shipped to Warton Hatchery and by spring it has hatched and during the summer of next year will be distributed to the various lakes. Mr. Clock intends that the method of hatching the eggs in a hatchery is superior to the natural state, as today carp and so many scavenger fish the spawn is soon gobbled up.

**SARNIA**—Roy Quinn, of Penrose street, was fined \$10 and costs in magistrate's court Saturday, when found guilty of common assault on his wife, Erie Quinn. Evidence given by Mrs. Quinn was to the effect that on Monday evening, during a quarrel, she threw a knife at her husband who was using abusive and profane language to her. She also told him to get out of the house. When he left the house she followed him to close the door, and he struck her giving her a black eye. To Will A. Donohue, defence counsel, she admitted that the quarrel arose out of her association with another man with whom she had been to Detroit over the week-end, and that later in the evening the police had to be called to settle a dispute between her husband and the third party. At that time Constable Duffield warned the man to keep away from the house of the husband objected to his presence. Mrs. Quinn's mother gave corroborative evidence and raised a laugh by suggesting it should have been a hammer thrown at the husband rather than a knife. H. M. Taylor, appearing for Mrs. Quinn, objected to certain questions put in cross-examination, but Mr. Donohue said he was anxious to develop the facts since he understood further proceedings under the Deserted Wives and Children's Act might be instituted by Mrs. Quinn.

### PLAYING SAFE

In an effort to get more letters en masse, to correspond with his rivals Fearing she might use this convenience printed on some gift stationery, of her girl, a wily corporal had her take a further step. On each sheet he had printed the salutation: "Dear Herbert."—Coronet.

## Crawford

Mrs. Alvin Oppert and son, Flight Sergeant Orval Oppert, spent a couple of days last week here with the former's parents and sister, Mr. and Mrs. George Fisher and Lynne.

Mr. and Mrs. Albert Gowing and little son were recent visitors with Mr. and Mrs. W. K. Bolton. Mr. Bolton purposes holding an auction sale and will leave next week for their new home in Hespeler.

Mr. and Mrs. W. Campbell and family visited with Mr. and Mrs. McClocklin on Sunday. We are

pleased to hear that Mr. McClocklin is feeling better.

Mr. and Mrs. Ronald MacDonald and Sharon spent an evening recently with Mr. and Mrs. W. Glencross of Glenelg.

Mr. and Mrs. Herman Kaufman and family spent Sunday with Mr. and Mrs. John Peglo and son, Clifford of Elderslie Township.

Miss Waiterina Corlett is assisting Mrs. Herb Dirstein of Elmwood at present.

Mr. and Mrs. Archie Hastie, daughters, Phyllis and Eileen and son, Eldon of Detroit spent the latter part of last week with Mrs. Hastie's mother and brother, Mrs. John Kauf-

man and Albert. A family reunion took place on Saturday evening when about fifty were present.

Mr. D. J. MacDonald and daughter, Florence and Ralph Campbell are in Toronto this week attending the Federation of Agriculture meeting.

## North Egremont

Miss Evelyn Atchison of Hespeler, Mr. and Mrs. James Johnston and Sergt. Douglas Johnston and Miss Leona McNally had Sunday dinner with Mr. and Mrs. Will Atchison.

Mr. and Mrs. Andrew Lindsay, Clifford and Freddie were Sunday visitors with Mrs. William Marshall, Sergt.

Douglas Johnston and Miss Leona McNally were also visitors at the Marshall home.

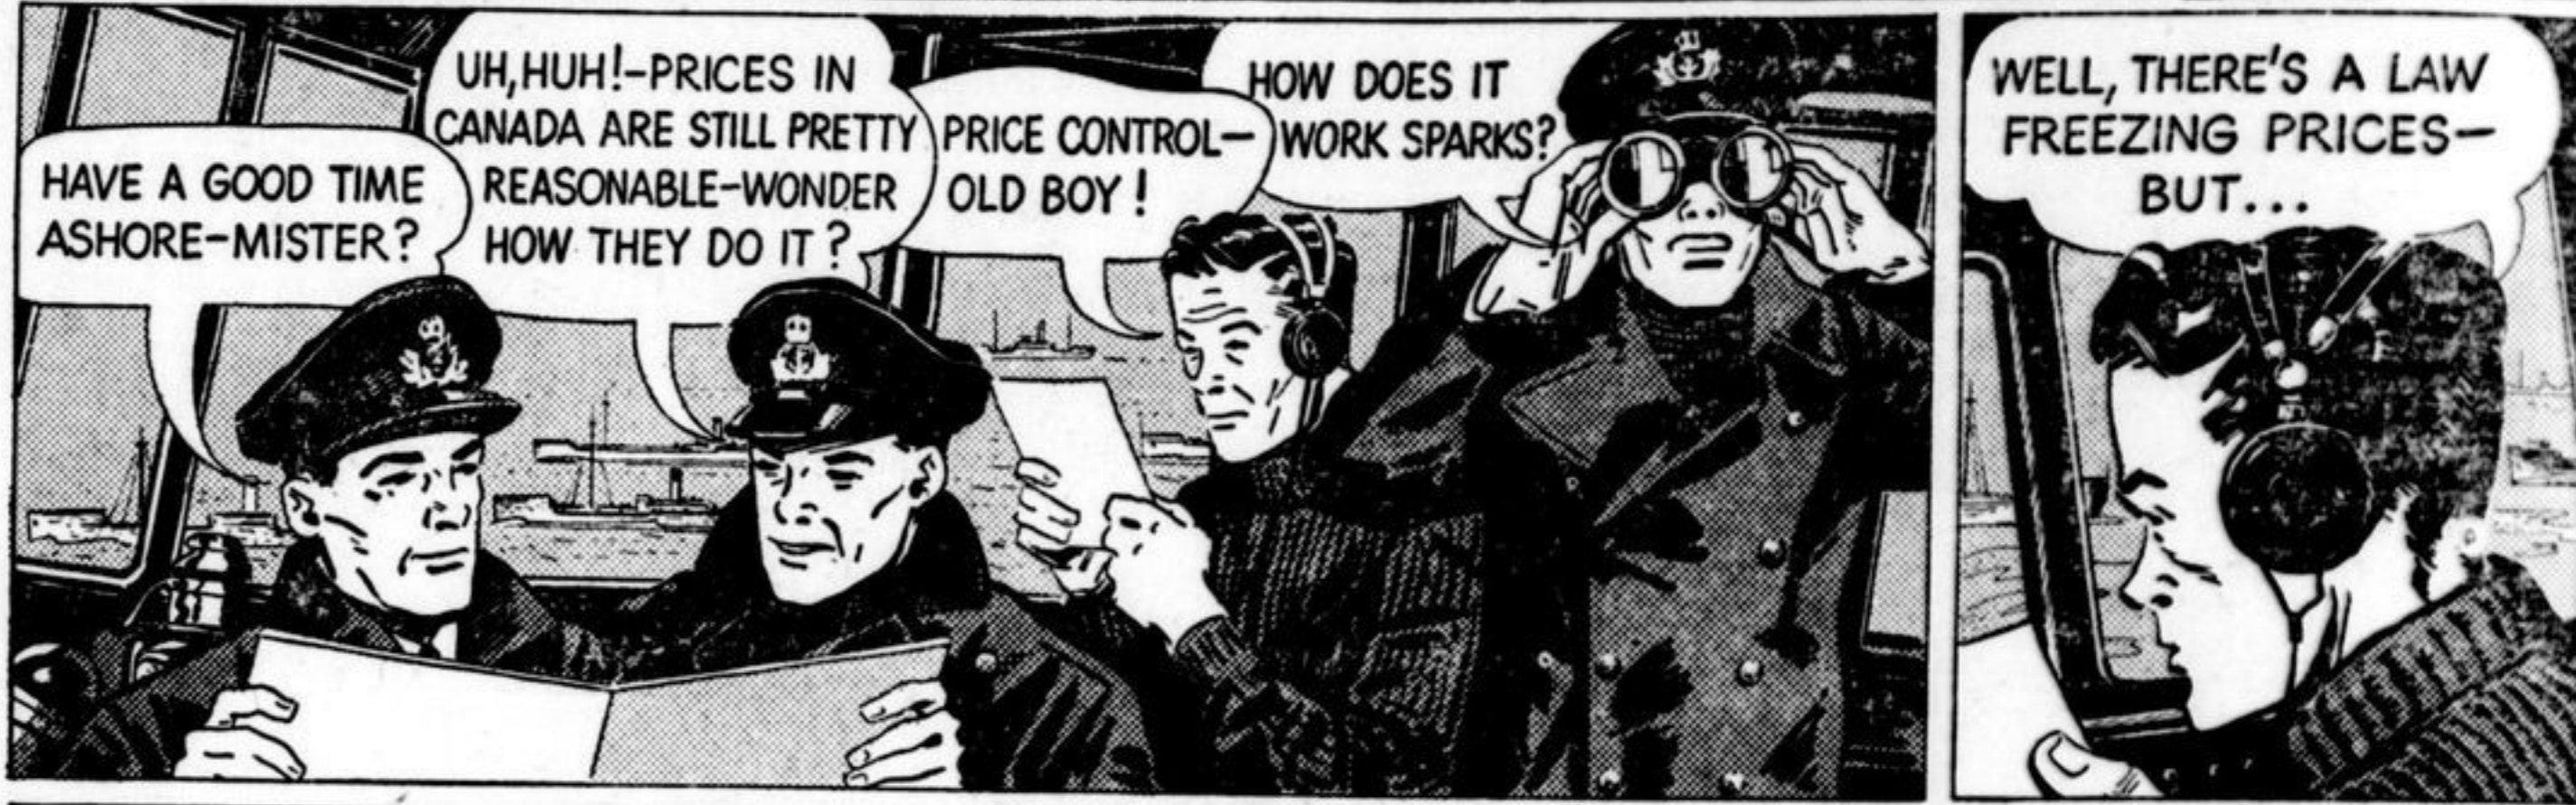

Mr. Bruce Marshall of Hespeler spent the week-end at his home here. Mr. and Mrs. Ray Brown spent the week-end with Mr. and Mrs. Robert Wilson.

Mrs. Carman Wilson and Wilma and Miss Marion Patterson spent Thursday with Mrs. Archie Henderson and Mrs. A. Lawrence.

There was a fine turnout at the Farm Forum meeting at the home of Mr. and Mrs. Ed. Strong and a very enjoyable evening spent.

Mr. and Mrs. Stanley Sharpe and Wayne spent Saturday evening with Mr. and Mrs. Arthur Lawrence.

The Goodyear Research Laboratory, dedicated to scientific research, is believed to be the finest laboratory for its purpose in the world.

## Out of Goodyear Research...

...A RUBBER LIFERAFT ... A BULLET-SEAL "GAS" TANK ... AND A CONTINUOUS STREAM OF TIRE IMPROVEMENTS!

Goodyear dealers have it ... for eligible drivers only. It is the result of Goodyear's forty years' experience in tire-building plus Goodyear's specialized knowledge of synthetic rubber ... gained through unceasing research and testing.

Since its foundation, at the turn of the century, Goodyear has carried on with relentless energy its quest for improvement in the making and application of better rubber products.

In the Goodyear Research Laboratory, skilled chemists and engineers with "shirt sleeve" imaginations, utilize all the skill, all the experience, all the knowledge Goodyear has acquired through more than forty years of working with rubber.

There is no waiting for the results of Goodyear research. Ideas and improvements, created by need, become practical realities in the laboratory. Then, tested and proven, in day to day service ... they are incorporated into modern Goodyear products.

Spurred by war, many history-making products, born of Goodyear research, are serving the fighting forces of the United Nations. Some of these are illustrated below, some must remain secret until another day.

During the years that have passed, many Goodyear discoveries have been adopted as standard in the tire building field. During these years tire performance has improved immeasurably ... tire costs have consistently reduced.

Goodyear continually reaches ahead of tomorrow to provide the best for you today. That is one reason why there was no delay in utilizing synthetic rubber to meet the needs of wartime. Goodyear was ready when the need arose. Long ago Goodyear discovered how to use this new material.

In today's Goodyear Synthetic Rubber Tire you get all the benefits that Goodyear skill and experience can put into a modern tire. If you are eligible for new tires :: Goodyear is your best buy.

**Rubberized Life Rafts**, developed by Goodyear, save the lives of air-crews when planes are forced down at sea. These rafts inflate in seconds with chemical gas released by a rip cord.

**Bullet-Sealing Fuel Tanks** for warplanes are another product of Goodyear research. When a bullet pierces the tank the puncture is automatically sealed, to eliminate the hazard of fire and loss of fuel.

**Dektred is a new Goodyear "war paint"** that provides a flame-proof, non-skid, weather-resistant floor and deck covering for ships, trucks and aeroplanes. It also has many potential civilian uses.

**Goodyear Pliofilm**. A transparent, water-proof, moisture-proof wrapping material with literally thousands of applications as positive protection for moisture sensitive products.

**LifeGuards**, another Goodyear development, replace ordinary inner tubes, provide positive blow-out protection. If a blow-out occurs, the LifeGuard carries the load, allows the driver to steer to a safe, sure stop.
