come sluggish. He trusted that the fashlon of docking and cutting the hair off the tall will be stopped There is, he said, not so much objection to the docking of horses as the cutting off of the hair, at least it rendered them useless to him when this was done. "Dock them if you will," Mr. · Dollar exclaimed, "but leave the hair on," Jobbed, or leased, horses, he explained, are used all over England, Scotland, Ireland and Wales, and quite three-quarters of all the large carcage horses that are in use in London and its neighborhood are jobbed. Mr. Dolar said he was a practical veterinary surgeon, and the fact that he was a gold medallist attracted the attention of the largest job-master in England, which eight and a half years ago led to his taking up the business. He would pay as high as a thousand dollars for a horse that suited his business. He now owned 600 horses.

He found that many of the horses shipped to England from Canada were angular, skewlegged or belocked, but horse, which fact led him to come to Canada and choose for himself. He was exceedingly satisfied with his vis(t, and did not doubt that Canada could produce in quantities exactly the horse that he wanted. He said the accommodation at Toronto Exhibition was equal to anything he had seen in Great Britain except at Ball's Bridge, in Dublin, and there the situation was not so good. He thought the purchaser should have the right to say as to docking. Canadian horses needed more bone, muscle and weight. but still Canadian breeders needed to on the cellar floor. It will keep for in this country. pay more attention to bone and sub- several weeks.

By Laura Rose, Instructor in Dairying. O. A. C., Guelph.

It is the things we are interested in-the things we are familiar with -which we like to hear and talk about, and so we find a bit of newsy gossip relating to our next door neighbor far more exciting than the latest daring bank robbery in a distant city. I am going to say a little about

bread, for it certainly is a very familiar article of food, and one which everybody apparently likes. This being the fact every thrifty housewife's aim should be to have upon her table the very best bread procurable. But our ideas of the "best" may differ.

I fear, as cooks, we study to please the eye more than the palate or stomach, and therein have we greatly

Food is taken that our bodies may be built up, and that energy, heat and nervous activity be maintained, and whereas bread forms so large a portion of our diet, and relied upon to such a great extent to supply the demands of the body. we should take special thought to the food value of the bread we eat, in connection with its digestibility. The appearance, odor and taste all help to increase its nutritive value, as they excite the flow of the digestive inices, and as a result a larger quantity is eaten and is better digested. Fresh bread, sour bread, underdone bread, heavy, soggy bread are accountable for much of the serious stomach trouble which is so rife in our country.

Especially should care be exercised with regard to the kind of bread fed to infants and invalids. I have seen many a child eating a huge slice of fresh baker's bread -bread which, had I pressed together in my hand, would have become nothing but a lump of dough. As I thought of the tax put upon the dear little child's frail stomach, my heart ached for the lack of knowledge the mothers of our land

Much more thought and study are given to the care and feeding of the calves in the farmer's stable than to the rearing of the young at our own tables.

Lately, in talking with a baker, the question of lightness in bread came up. He said the people

In the morning sift sufficient flour into the bread tins, sprinkle over two large tablespoons of salt, pour over the sponge, mould into a stiff dough and knead thoroughly for fifteen minutes. This thorough kneading gives a nice, fine, white, close-grained bread. When the dough has risen twice its original bulk, form into small loaves.

I would just like to say a word regarding "show" bread. I have taken special notice for a number of years of the exhibits in bread at our fairs. and in four cases out of five the loaves are too large. It is almost impossible to thoroughly bake to the centre a large loaf, and more especially so if two or three loaves are baked in the same pan. If the yeast plants are not all killed during baking fermentation still goes on and the bread becomes

It is well to slightly prick the loaves with a sharp fork before putting them in the oven. This allows the gas to escape, and you will not have large

cavities under the top crust. The oven should be moderately warm. If too warm a thick crust immediately forms which acts as a non-conductor of heat and the result is an underdone centre and a burnt crust. If, on the other hand, the oven be too ccol the bread rises too much and often exhausts itself and sinks, giving a loaf with a very light top and a heavy streak near the bottom crust. Usually bread requires from an hour to an

hour and a quarter to bake. When taken from the oven lift at once from the pans, and do not cover with a cloth, but lean it up against something so the air may circulate freely all around it. A CITY CASE.

One of a Thousand Such Come to Light in the Queen City.

Mr. John Blow, 67 Princess St., Toronto, An Interesting Letter—High Praise
For Dodd's, Kidney Pills.

Toronto, Oct. 2 .- This city is one of the finest in Canada, and among the healthiest on the continent of Amerman has his sight," he said, "the ica, but like everywhere else it has its victims of kidney disease. Nevertheless it is safe to say, however, that these cases are seventy-five per cent. less common now than ten years ago, and but few of those that do exist are anything like so severe as formerly. This is due wholly and solely to the popular use of Dodd's Kidney Pills.

Dodd's Kidney Pills have been found to be the only medicine that will cure Bright's Disease, the only cure for Diaary Troubles, Women's Weakness, Blood Disorders and any other form,

Concerning their virtue for Lumbago and Diabetes, Mr. John Blow, No. 67 Princess street, Toronto, says: "I have been a great sufferer with Diabetes and Lumbago for years. Every remedy I could hear of was given fair tria! in hopes it would help me. But until I began to use Dodd's Kidney Pills my hopes were all in vain, and tives. That's why the shock is al- my torture night and day unbearable. No one could imagine the sufferings l endured; night and day my pains kept put no extra power whatever in my me in misery. NEW WOMAN NOBLY PLANNED. Keep the Shoulders Straight and the

Chest Inflated. To be physically well and perfectly

proportioned the modern woman must be ever on the alert. A common form of neglect is the

shoulders, which are allowed in childhood to grow lop-sided, and take on an ungraceful stoop. Often they are crowded so by ill fitting corsets that they seriously displace the collar bone. Instead of such malformation they be level, large, erect, in sensibly descending and well poised, making the waist appear round and to tone up the neglected shoulders, and the skin can be whitened and made beautifully firm by this paste, which is of Spanish origin: Beat the whites of four eggs in rose water, adding a few grains of alum .. Beat until the paste is thick, spread the and apply to the neck and shoulders at night. French ladies are so expressive with their shoulders that they give them every advantage, as their "shrug" is a part of French conversation. An authority on this subject says: "A difficult habit to break is that easy, lazy manner of sagging down when sitting, which, in addition to sleeping on high pillows, makes so many round shoulders and sunken chests. People should always watch themselves, and when they discover the fault straighten up; but it is so easy to settle down in this way after years of indulgence in the habit that many get discouraged and prefer to grow crooked. Let me warn you, ladles, to be eternally vigilant in acquiring a good sitting posture. The joints you possess were given to you to bend with, and it is almost a crime to sag down as if you had no lungs or other vital organs. Hold in the backbone, throw the chest out, bend from the hips only, and so contribute to the perfection of your figure, your | \$12,500 to build a summer hotel beauty and your health."
