

# Winter Wheat Tests:

Results of Experiments Conducted at the Ontario Agricultural College, 1900.

Upwards of three hundred plots were used for the winter wheat experiments conducted at the Ontario Agricultural College during the past year. The greater number of these tests have been carried on for several years in succession, and the average results are of greater value than those obtained from tests of only one season. The following summary results of some of the experiments are presented with the hope that they may prove of service to the people of Ontario who are interested in the production of winter wheat.

One hundred and fifty-nine varieties of winter wheat have been grown at the College within the past thirteen years. These include the Canadian varieties and also those imported from Germany, Russia, France, England, Scotland, Australia, and the United States. Ninety-four kinds have been tested for at least five years, and only the best kinds have been retained. The thirty-three most worthy varieties in the five years' tests were all grown again this year.

The five varieties which gave the highest and the three varieties which gave the lowest average yields in the six years' tests of the thirty-three varieties are as follows:

Strength	Lbs. Bush	Bush
1. Dawson's Golden Chaff, white	Strong	60.3 56.7
2. Egyptian Amber	Weak	61.3 52.6
3. Imperial Amber	Weak	60.6 52.1
4. Early Genesee	Strong	60.5 51.9
5. Reliable, red	Weak	61.4 50.9
31. Treadwell, white	Strong	60.7 42.3
32. Turkey Red, white	Weak	61.9 41.3
33. Velvet Chaff, red	Strong	62.5 40.7

## Milling Qualities.

The grain of each of these varieties was recently judged for milling qualities by representatives from the James Goldie Milling Company, Dawson's Golden Chaff, good; Egyptian Amber, extra good; Imperial Amber, extra good; Early Genesee, good; Reliable, medium; Treadwell, extra good; Turkey Red, good; Velvet Chaff, poor. Some millers speak against and some in favor of the Dawson's Golden Chaff as a milling wheat. The grain of the Turkey Red variety is very hard and evidently is well liked by the millers of some of the Western States.

For each of four years, different selections of seed have been made from each of two varieties of winter wheat and have been sown on separate plots. The average results in the yield of grain per acre of the eight tests thus made are as follows: Large plump seed, 42.1 bushels; small plump seed, 35.0 bushels; shrunken seed, 33.5 bushels, and broken seed, 7.3 bushels. The grain produced from the large plump seed also produced a heavier weight per measured bushel than that produced from any other selection.

## Average Results.

The average of several years' results from seeding at different dates show that the grain which was sown on or before the ninth of September gave a considerably larger yield of both straw and grain than that which was sown after that date. The very best yields were obtained from the wheat which was sown in the last week of August. An experiment with different preparations of winter wheat land has been conducted in duplicate in each of four years. The average results in bushels of grain per acre of the eight tests are as follows: Twenty tons of farm-yard manure per acre on bare summer plough, 40.9; crop of peas ploughed under, 36.1; bare fallow, 33.8; crop of buckwheat ploughed under, 29.6. These results show that peas give much better results than buckwheat when used as a green manure on land to be used for winter wheat.

In an experiment conducted during the past year in growing wheat on grass sod and clover sod, it was found that the former gave 28.2 per cent. less in yield of grain per acre than the latter. Ten plots were used for the experiment. The crop of both grass and clover was removed from the land in 1899, after which the land was ploughed and the wheat was sown during the first week of September. The experiment will likely be repeated for several years.

## Drill and Broadcast.

In each of six years an experiment has been conducted in duplicate by sowing winter wheat broadcast, and with a drill. The results from the same quantities of seed by the two methods are very similar. The yields per acre being practically equal. It should be understood that the land was in a good state of cultivation when the seeding took place in every case.

In order to find out the influence of cutting wheat at different stages of maturity upon the quality of the grain for seed purposes, samples were taken from the crop cut on different dates, and these samples were carefully sown upon separate plots. In the average results of these tests made with two varieties in each of five years, it was found that the heaviest weight of grain per measured bushel, and the largest yield of grain and straw per acre, were produced from seed taken from the crop which had been allowed to become very ripe before it was cut.

## Co-Operative Experiments.

Five varieties of winter wheat were sent out for co-operative experiments in the autumn of 1899. These were divided into two sets, with three varieties in each set, the Dawson's Golden Chaff being used in both sets as a basis by which the results of all the varieties could be compared with one another. We have received one hundred and four reports of successfully conducted winter wheat experiments for 1900.

The following table gives the comparative yield of straw and grain per acre of the varieties of winter

wheat tested in 1900 on 114 Ontario farms:

Varieties.	Bush of Gold Coin	Tons of Straw (60 lbs)
Dawson's Golden Chaff 1.8	30.1	28.1
Early Genesee Giant 1.7	27.2	26.8
Early Red Clawson 1.6	25.9	25.9
Diamond Grit 1.8	25.9	25.9

The popularity of the varieties with the experimenters is represented by the following figures: Dawson's Golden Chaff, 103; Early Genesee Giant, 84; Gold Coin, 76; Diamond Grit, 71; Early Red Clawson, 69; The Diamond Grit variety was sent out owing to its quality rather than its yield of grain per acre. The Early Red Clawson, which is a soft red wheat, made comparatively poor results in the co-operative experiments of Ontario. The Dawson's Golden Chaff gave a yield of upwards of forty bushels of grain per acre in twenty-one of the experiments.

The one hundred and fourteen reports of successfully conducted experiments from twenty-nine of the counties of Ontario; the counties which sent the largest number of good reports were Grey, Huron, and Middlesex, in Western Ontario; York, Muskoka, and Northumberland, in Central Ontario; and Hastings, Frontenac and Lanark, in Eastern Ontario.

Many of the experimenters deserve much credit for the care they have taken in conducting the co-operative tests with winter wheat during the past year.

## BRIDE AND MONEY MISSING

### Said She Had "Gone With a Handsomer Man."

## WEDDED ONLY SIX WEEKS.

Danbury, Conn., Sept. 14: Deserted by his bride of six weeks, Jacob Krebs is seeking a divorce, which, under the law of Connecticut, he cannot obtain in less than three years. Krebs is a farmer, and has many acres of land in the suburbs of this city. He is elderly and rich. Until the early part of July he was a widower, lonely in his country home, and longing for someone to take charge of the domestic affairs of the old farmhouse and make happy his declining years.

The farmer saw a matrimonial advertisement. It described a prettier widow who longed to make some comfortable home and a husband's love. The old farmer had no time in communicating with the widow. The days seemed years until the mail from New York brought a sweet-scented letter, in which was enclosed a photograph of the widow, and which named a meeting place in the event that the farmer wished to renew the acquaintance. The first train to New York had Krebs as a passenger. He met the widow and their love was apparently mutual upon first sight. Marin Lang was the widow's name and she lived at No. 114 East 168th street at the time she first communicated with the Danbury farmer.

Krebs' attorneys learned to-day that she was mistress of the building at that address until June 30th last. Krebs and the widow were married in New York on July 4th, and after a short wedding trip they came to this city, and Mrs. Krebs was formally installed as mistress of the farmhouse.

"Our married life was so happy the first few weeks," said Krebs, describing his misadventure. "She was so sweet and kind, and such a good housekeeper."

When the farmer came to town on Saturday his wife remained at home to complete some household duties that she said were imperative. Krebs returned home at dusk. His wife was not there, but on the dining-room table he found a note, signed and written in the dainty hand that had so thrilled the farmer's heart when he opened the first letter from New York. It said simply:

"I have gone to Germany with another man. You will not see me again. I have taken some money and other things, but they are only my share as a wife."

A large sum of money, just how much Krebs' attorneys will not say, a gold watch and chain and some articles of household utility were gone.

## Value of Birds to the World.

A French naturalist asserts that if the world should become birdless man could not inhabit it after nine years' time in spite of all the sprays and poisons that could be manufactured for the destruction of insects. The insects and slugs would simply eat up all the orchards and crops in that time.

## Definite.

"You look worried," remarked the first cabin passenger.  
"I am," replied the other. "Two days ago I called to my wife, who is in Rome, that I would sail for Paris to-day, and asked her where I could meet her. Just before sailing I got this reply: 'Will meet you there on Friday at 3 o'clock.'" — Philadelphia Press.

You think I look so much better; yes, and I feel better—Miller's Compound Iron Pills did it.

## Tien Tsin and Its History

The attention of the civilized world is now concentrated upon Pekin and Tien-Tsin. An authoritative description of the latter city will therefore doubtless be of interest. A gentleman, who has spent many years at Tien-Tsin, Dr. Jaishon, gives the following account of that city:

Tien-Tsin is situated at the junction of the Yun Ho or Hwai River, better known as the Grand Canal, with the Pei-Ho. It is distant from Pekin by about 80 miles, but the bulk of the enormous trade between the two cities is by the river Pei-Ho as far as Tangelow (13 miles from Pekin) and thence by carts and wheelbarrows over the once magnificent but now dilapidated stone causeway. Tien-Tsin was formerly a place of no importance, till recently had few historic associations; till the end of the Ming dynasty it was only a second rate military station, but as a result of the expansion of the Grand Canal it gradually assumed commercial importance and by the end of the Seventh century had become a great distributing centre. The navigable canal of the Pei-Ho sea going junks ceased at Tien-Tsin and this made it the emporium for the very large quantities of tribute which were sent up to the capital, after the quality of the goods had to be unfit for carriage to Peking. The expedition of the allies in 1858 greatly enhanced the importance of the city as it then proved to be the military base of the capital and an excellent base. It was here on June 26, 1858, that 42 years ago, that Lord Elgin signed the treaty which was to conclude the war, but which unhappily led to its prolongation. The temple in which the treaty was signed is about a mile distant from the West Gate and is now inclosed in a small arsenal (Hsi Kwan Tze) and surrounded by factories for the manufacture of small arm ammunition.

## MASSACRE OF FRENCH SISTERS.

The city will ever be infamous to Europeans and Americans from the massacre of the French sisters of Mercy and other foreigners on the night of 21, 1870, in which the most appalling brutality was exhibited. As usual in political agitators who instigated the massacre, the ringleaders of the Roman Catholic Cathedral "Christ the tower" upon a commanding site on the river bank, but the entire mission has been transferred to the French concession, a mile lower down the river.

The population is reputed to be 1,000,000, but there is no statistical evidence to justify such large figures. The only such exception are very extensive and there is the town begins and ends. The city walls are quadrate and extend about 4,000 feet in the direction of the cardinal point. The advent of foreigners in the past has brought a great increase in the value of real estate all over Tien-Tsin.

Li Hung Chang authorized the government to send a staff at Tong Shan in the several districts was done and proved the precursor of a railway, which has since been extended to Shan Hai Kwan for military purposes, and to Peking.

## The Foreign Section.

The foreigners live in two concessions—British and French, which fringe the city, and cover an area of less than 200 acres. The Germans in 1889 acquired an extensive concession adjoining and behind the British. The British municipal police and a modern town hall, completed in 1889, adjoining were a well known public garden Victoria Park. An excellent recreation ground of ten acres has also been reserved for the British. There are two hotels, The Astor House and The Globe, clubs, a theatre and an excellent library.

## LIFE OF RUSSIA'S RULER.

Silent, Laugless Man Who is Said to Be Simple in His Tastes.

The present Czar of Russia, whose extraordinary likeness to the Duke of York has often been remarked, is one of the most reserved monarchs in Europe. He speaks little and briefly, and while he is talking his eyes are generally fixed on the ground. He rarely laughs, and does not often smile. Of danger he has a grandfathers' fear. He is said to live and die for Russia; how die I care not," he said a few days after his accession.

The Czar's home life is simple. He likes plain food at dinner, and seldom has many guests at his table. He eats quickly, like all men who are accustomed to work a good deal, and he says very little when he is about in the carriage, and so wears a uniform always, for he does not like civilians attire. Nicholas is an unwarlike ruler. All documents submitted to him he reads carefully, and he frequently makes notes on them with a red pencil. His memory is wonderful, and it often happens that months after he has given an unimportant order he will ask as to the manner in which it was carried out. Summer and winter he is the first to arise in the morning, and he is working hard while the others are still sleeping.

During the Czarina sits beside his desk sewing or embroidering. Whenever a court official enters she prepares to leave the room, but the Czar invariably says: "No, my dear, you won't disturb us," and with gentle insistence he lays his hand on her arm and draws her back to her seat. A firm believer in popular education Nicholas, while he was heir-apparent he once said: "Russia has had a Czar who was a liberator; it also needs a Czar who will be an educator," and the people have not forgotten those words. Of the Czar's interest in popular education there are many evidences. Hardly a day passes that the Russian papers do not contain articles about new schools, new libraries, and new educational societies.—Mainly About People.

Father Bouchet, who refused to celebrate mass for the late King Humbert at the request of the Italians of Louisville, said the night that his refusal was due to the fact that Humbert had been excommunicated.

## One of the most dangerous and repulsive forms of Kidney Disease is

# DROPSY

For which Dodd's Kidney Pills are the only certain cure. In Dropsy the Kidneys are actually damaged, and the water, which should be expelled in the form of urine, flows back and lodges in the cells of the flesh and puffs out the skin. Remove the fifth which plugs up the drain. Restore the Kidneys to health. There is only one Kidney Medicine

# DODD'S KIDNEY PILLS

## HOW TO BE RID OF FAT.

### Simple Method of Reducing Superfluous Flesh.

Do you want to lose some of your too, too solid flesh these warm days? Nothing simpler, as one learns after a chat with one of our representative women. This representative woman not only has already been benefited herself, but she has a more determined friend who lost 16 pounds of superfluous tissue in half as many weeks. This knowledge came from Dr. William T. Cabell, of Baltimore, who came upon it in his practice, and who read in an essay on the subject at the ninety-ninth annual meeting of the Medical and Chirurgical Faculty of the State of Maryland.

Fat, by the way, should constitute from one-fourth to one-twentieth of one's weight, and one may vary from 15 pounds either way without discomfort or disease. There's danger in too much of it, however. Danger, too, from the remedies resorted to for cleaning out the distended cellular structures. Many of these agents act as slow poisons, damage the functions of digestion and cause indigestion to food, which means anything from anæmia to consumption. Banting, exercising by ironical rules, and the rest, are all tiresome.

STATE OF OHIO, CITY OF TOLEDO, ss.  
FRANK J. CHENEY makes oath that he is the joint owner of the firm of F. J. CHENEY & CO., doing business in the city of Toledo, Ohio, and State of Ohio, and that said firm has for each and every case of Catarrh of the Bladder and every case of Catarrh of the Uterus, and every case of Catarrh of the Prostate, a certain medicine called DODD'S KIDNEY PILLS, which he swears to before me and subscribed in my presence this 6th day of September, 1896.  
A. W. GLEASON, Notary Public.

Hall's Catarrh Cure is taken internally and acts on the blood and mucous surfaces generally. It is sold by Dr. F. J. CHENEY & CO., Toledo, O. Hall's Family Pills are the best.

## CARRYING OUT THE BOYCOTT.

The union labor leader took the \$5 he had examined it critically. Then he handed it back and shook his head. "I can't accept it," he said. "Why not? You've earned it," protested the other. "True," replied the labor man, "but I can't find a union label on it anywhere."

## Unnaturally Large

"Yes, sir," said the actress, haughtily, "that is my figure—one thousand dollars per week."

## Used to be continually tired, now I am strong as well—Miller's Compound Iron Pills did it.

## Miller's Liment Cures Colds, etc.

My daughter has improved so much that you would scarcely know her—Miller's Compound Iron Pills did it.

## WELL, RATHER.

A woman is much more likely to forget her birthday than to leave the pickles behind when she goes to a picnic.—Chicago Times-Herald.

## Miller's Liment Cures Garget in Cows.

The Social Labor party of London, Ont., has decided to nominate a candidate for the Commons.

## MR. ECKLE BELL, traveler for the well-known boot and shoe firm, Frank Brock, New York, writes: "On a recent trip through Canada I was stricken with acute rheumatism and for days could not even turn in bed every movement caused the most excruciating pain that mortal ever suffered. I tried many of the so-called cures for rheumatism, called in a doctor and had him prescribe, but obtained no relief. Nothing seemed penetrating enough to relieve my suffering until I secured a bottle of your Rheumatism Cure. The relief was immediate. I was able to get up and walk in a few days. I feel that your Rheumatism Cure is a great benefit to the world and cannot say too much in its favor."

## THE HOUSEWIFE SHOWS EXCELLENT JUDGMENT

## When Buying

## St. Lawrence Granulated.

## IT IS

## 100 Per Cent. Pure.

is a great household remedy that is worth its weight in gold. Its highly penetrating powers make it never-failing in all cases of Rheumatism, Neuralgia, Sciatica, Pain in the Back and Side. It relieves in one minute the most excruciating pains, and its taste and the best known remedy for all pains.

Sold by all dealers. Price 25c. Prepared by N. C. Mohan & Co., Kingston, Ont.

Futman's Cure. Extractor cures constipation without pain in 24 hours. Try it.

## MAKE THEIR FUNERAL TOILET

Decapitated insects Lay Themselves Out for the Last Rites.

It has often been noticed that there are no animals which are more cleanly and fastidious in their toilet habits than insects. The extreme pains which the common house-fly takes in attending to its toilet, being a good example of the racial characteristic. The discovery has now been made that certain insects which have such a respect for Mrs. Grundy and are endowed with such an innate love of neatness and order, that not even death, or, rather, decapitation, can prevent them from making one grand final toilet, which is clearly designed to give them a sedate and respectable appearance after death.

Dr. Ballou, an expert entomologist, has discovered this remarkable fact. "During one of my recent horseback rides," he says, "I frequently caught one of those large flies which annoy cattle and horses so much, and I promptly got rid of it by crushing the mutilated insect away. I placed it on the back of my hand and idly watched it. For some seconds the insect remained motionless, but then to my unbounded surprise it moved its front legs forward to the place where the head should have been, after it had been cut off. I promptly brushed its body and smoothed its wings with my hand. Under the gentle pressure of my thumb the body gradually became extended and the extremities curved, while the wings gradually changed their natural position and left the upper part of the body exposed. Meanwhile the hind legs continued to brush each other from time to time. Naturally I watched this extraordinary sight with great interest, and in order to see the finale I took the insect into my study, where it lived an entire day, expending the time at the ungrateful task of making its own funeral toilet."

## SICK STOMACH,

Biliousness, Cramps, Spasms, Nausea, Vomiting, Cured in a few Minutes by Polson's Nerviline.

This marvelous remedy has wonderful power in eradicating all kinds of pain. For internal use a few drops in sweetened water gives relief. As a stimulant for external use nothing can approach its penetrating power. Ten times stronger than any other, but pleasant. Banting, exercising by ironical rules, and the rest, are all tiresome.

## How the Trouble Began.

A citizen walking past a butcher shop in Beatrice, Neb., saw the butcher and a customer rolling over the saw-dust floor in lively rough-and-tumble fashion. He tried to step apart and then learned that the customer had come in to buy some dog meat. The butcher nonchalantly asked: "Do you wish to eat it here or shall I wrap it up?" Then the trouble began.

## Practically Applied.

"My dear," said a husband, "pray devote just half a minute to repairing my coat. Which a pointed nail has chanced to 'It's 10 o'clock," said his drowsy mate. "yes," said hubby, "it is rather late. But you know it is never too late to mend."

## Miller's Liment Cures Distemper.

A "Fort" and a "Fortress." People often ask why it is called Fort McHenry instead of Fort Monroe. The difference between a fort and a fortress lies in the fact that the former is designed to contain solely the latter is often a city containing a large number of noncombatants, France has on the German frontier, three first-class fortresses—Belfort, Verdun and Briouay; on the Belgian frontier, Lille, Dunkirk, Arras and Besancon; on the Italian, Lyon, Grenoble and Besancon; and on the Atlantic coast, Rochefort, Lorient and Brest.

## WANTED.

## ISSUE NO 35, 1900.

# Weak Lungs

When your throat and lungs are perfectly healthy you needn't worry about the germs of consumption. They don't attack healthy people. It's the weak, debilitated, inflamed membranes that are first affected. Hard coughs and colds weaken your throat and lungs and make consumption more easy.

## SCOTT'S EMULSION

is the best remedy you can take. It soothes and heals and gives tone and strength to these delicate membranes. In this way you can prevent consumption. And you can cure it also if you haven't had it too long. Keep taking it until your lungs are strong and your weight restored.

At all druggists, etc., and 25c. SCOTT & BOWNE, Chemists, Toronto.

## THE HEAVIEST BRAIN.

It Was Possessed by an Epileptic Idiot of Germany.

In a German psychological journal Professor Dr. Walsen gives a short description of the heaviest brain on record. The possessor of this prodigious organ was an epileptic idiot, who died at the age of twenty-one years. He began to walk at four years of age, never attended school, and was received into the institution at Meerberg at his fourteen years.

He was an idiot of low intelligence, and of changeable but good humored disposition. The senses seemed normal, but the muscular system was developed. He suffered from epilepsy, during an attack of which he died. The brain weighed 2850 grams and seemed to be a general enlargement. The cerebellum and spinal cord were normal. The spinal cord seemed regular in form, but the spinal nerves were enlarged. On microscopic examination the ganglion cells of the brain seemed normal. The layers indistinct, the pyramidal layer wanting, the nerve fibres everywhere distinct. Neither the cerebral vessels nor the neuroglia were altered.

## Miller's Worm Powders occasionally will keep the children healthy.

## Egging Him On

"Language," quoted Willie Washington, "was given for the concealment of thought." "Indeed," rejoined Miss Cayenne, "language," "permit me to congratulate you on being so perfect a master of English."—Washington Star.

## Minard's Liment Cures Dysentery.

The Albion Hotel, at Stratford, has been refused a transfer of license, and Mr. Gordon, the owner, is circulating a petition to dismiss the Commissioners.

## NOTICE TO HORSE OWNERS.

It is well-known fact that Horses troubled with Heaves, if placed on Prairie Paste, are soon cured of the disease.

## PRAIRIE WEED HEAVE POWDER

Is composed of the Prairie Weed which has been found so effective in curing Heaves, combined with other valuable remedial agents and will prove an effective remedy for Heaves and Coughs in Horses and Cattle.

## FRUIT FARM FOR SALE.

One of the finest in the Niagara Peninsula, at Winona, Ont., 10 acres, on two railroads. 12,000 bushels of fruit, mostly peaches, in sight this season. Will sell in lots to suit purchasers. This is a bargain. Address JONATHAN CARPENTER, P.O. Box 408, Winona, Ont.

## WANTED.

## TALMAGIA FROM

Very Hard For Right and Wrong

Washington report—Peterburg, the Russian emperor and empress dowager, Mr. Talmage, course, in which he showed that may be done and also the vast evil of their
