Camden Christian Scientists Say He Must Go.

Philadelphia 'report: The breach in the flock of Camden Christian Scientists, which had its inception in the legal proceedings recently taken by Miss Kate McCulloch, one of the fold, to recover some \$4,000, which she alleges was wrongfully obtained from her by Dr. Tomkins, the spiritual and business head of the association, whose kissing exploits were recently the subject of gossip, is widening and deepening. There was a stormy scene on Wednesday night in Taylor Hall, Market street, where the meetings of the congregation are held. Tomkins and his faithful adherents

to the number of five were the first to reach the room, and they at once proceeded to bar the door against the disaffected party, which numbers about twenty. Later on, however, it was decided to throw open the entrance, and no sooner was this done than in marched the whole party of malcontents.

Dr. Tomkins was just giving out the opening hymn when he was handed a written demand or request for his resignation, the paper bearing twenty signatures. The doctor merely glanced at the document, then laid it upon the table, both technically and literally, and proceeded with the services.

The doctor's adversaries do not propose to be thus breezily disposed of. "He has got to get out," said a leader among them yesterday, "and if he thrown out next Monday evening. We sent a committee to Boston, and found that Dr. Tomkins had been ordered by the Methodist Church to make restitution to Miss McCulloch,

but he has not done so." . n. out. He says the members of the Estimates for 1900 From Appearsociety have no authority to depose was him, and that the power to do that the is vested alone in Mary Baker Eddy, ealing the head of the Mother Church in Boston. He further says that he had thought of voluntarily resigning, but that for certain reasons the Mother Church had persuaded him to remain. in November. "This whole agitation," declared the doctor, "has been gotten up by interested parties for the purpose of affecting certain matters that are in litiga- 21.3 bushels per acre. In 1899 the

Following are the closing quotations at important wheat centres to

Toronto Farmers' Market.

Receipts of grain on the street market here to-day, 400 bushels. Wheat-One hundred bushels each of red and white fall wheat sold today at 70c to 71c.

Oats-Two hundred bushels of old oats sold 1-2c to 1c higher at 32 1-20 Hay and Straw-Twenty-five loads of hay sold at \$12 to \$13.75 a ton-

No straw offered. Practically no trade on the general market. Prices are quoted nominally unchanged.

Bradstreets' on Trade.

Trade in Montreal is only fair. WILL APPEAL TO MRS. EDDY. Trade in dry goods is as I-risk as usual for this time of the year. There is a good deal of complaint about payments. A good many fall goods have already been shipped Butter is easier. Cheese is steady. Cheese exports are heavy. Business circles at Toronto have

been moderately active this week for the holidays. Orders from travellers and by mail have been up to the average. A good deal of dry, goods paper matured this week. Values for all domestic and imported dry goods are firm and in other departments of trade prices are keeping steady.

Business at Hamilton this week has been of a fair average for this season. A good many merchants through the country are holidaying. Considerable shipments are being made by jobbers. The outlook for business is good. Payments have been very fair.

Trade at the coast cities has been disturbed somewhat by the strike in the fishery industry. There is a slackening off in building operations in Vancouver. The coal trade is very active. There is also marked ac tivity in the lumber industry. The dry weather has enabled the farmers to make good progress with the

In London the prospects for the fall and winter are very bright. Retailers are pleased with the outlook for business for the fall. Values are firm in almost all staple lines. Payments this week have been fair. 4 Trade has been a little quiet since the close of the exhibition in Winnipeg. Merchants have been buying cautiously owing to the small wheat production. Large shipments of cattle are being made.

THE CROPS OF ONTARIO.

The following are the crop estimates for 1900, as judged from appearances on Aug. 4th. The acreages are final, but the yields (except in the case of hay) will be revised from actual threshing results

Fall wheat shows an area of 1,068,-640 acres harvested, the estimated yield being 22,812,293, bushels, or yield from 1.049,691 acres was 14,-439,827 bushels, or 13.8 bushels per acre. The average annual yield for 18 years was 18,220,140 bushels, or

20.1 per acre. Spring wheat has an area of 376,-

of 16,296,332 bushels, or an average For some time past, according to of 28.2 bushels per acre. Last year the detectives, Andrews made it a an average of 30.2 bushels produced

received a letter from Paterson, N. J., area was 743,139 acres, and in 1898
