A NEW SOLOMON.

His Judgment Was Good in This Case Anyhow.

The following remarkable incident occurred recently in the Province of Honan, in China: Three men appeared before a Judge there, and each laid claim to the same woman as his wife. Not one of them would retire in favor of the other two. but ear' insisted that justice should be done to him. Finally the Judge, remembering, doubtless, how King Solomon had acted in a somewhat similar emergency, exclaimed: "Well, if you three men cannot come to some agreement, nothing remains for me but to order that the woman shall be killed, as there is no other way in which the matter can be satisfactorily settled." He then called for a large cup of wine and. when it was brought, he poured into it some dark powder and compelled the woman to drink it. Excited as she was, the woman speedily began to feel the effect of the strong liquor. She stammered when she tried to speak and her flushed cheeks were an indication to the observers that the poison was working and that her end was near at hand.

This was the climax for which the Judge had waited. When he saw that the woman was apparently dying he called one of the three men who claimed her as wife and bade him remove her from the court room. This man, however, showed no inclination to do so, and the Judge thereupon insisted that he renounce all rights to her. This he willingly did, and so did the second man. Only was by this mean; that duelling was agreed to remove the woman and to stopped in a certain district in Ken- care for her until she died. Satisfied
