provided that the advertiser is able to do what he advertises to do and a man is a fool to pay good money for advertising what he is not able to carry out for the public soon find out that such a man is a deception and a fraud. I am not professing to do business for fun or entirely for the other fellow's benefit but I have found during the twenty years that I have been doing business in Hanoyer and Durham that I can make the most money for my self by doing the very best I can in every instance to save money for my customers. Every customer who once does business with me to his own profit continues to patronize me and gives me, not only his business, but his influence and this accounts for the very large business that I am doing to-day. Farmers are now busy and will not be paying much attention to business affairs while busily engaged on their farms. Some of them,

howevr, will require to borrow money and I wish to say that I am at present lending at five per cent and in some cases at less. I am also paying closer attention than ever before to the collection of old debts and claims placed in my hands will be collected if it is possible by any means in the world to to get the money-no charge for my trouble if nothing collected. I also buy old notes. I have had great success in settling up and arranging business Saving entanglement and difficulties and in making settlements with creditors and any such business placed in my hands will be faithfully attended to the profit, I think, of them who deal with me . I have always a number of farms in hand which I am able to sell at very low figures and on very easy terms. After so long a residence in this locality I have formed a connection with all the leading Loan Companies and when they have farms in hand for sale they are placed in my hands and I am thus always in a posi- Lower Town . - Durham. tion to offer bargains.
