Afflicted the Sufferer for Postage Marks First Intro-Twenty Years.

Oftet: Sat Up in Bed Coughing the Whole Night Long-Doctors Ultimately Told Him the Frouble Was Developing Into Consumption How Relief Was Obtained.

(From the Times, Picton, Ont.)

Nothing racks the body more than a severe cough. If it is allowed to run for any length of time, it is very Rowland Hill. Sir Rowland did not hard to get rid of, and often leads attach so much importance to the to the most dreaded of all diseasesconsumption. Such a sufferer was Mr. Thomas Jinks, of Prince Edward county. Mr. Jinks relates the following facts to a Picton Times reporter -"I am sixty-seven years of age, and for the last twenty years I have had a bad cough. I was troubled with catarrh, which started in my head, place. but later spread to my stomach, leaving me dyspeptic. For two years I was troubled with pains in the stomach, and was not able to raise my arms above my head without experiencing severe pains about my neys began to trouble me and at cate. times I could not get out of a chair without help. My limbs and feet unable to lace my boots, but as soon age stamps to their patrons as as the swelling went down I was but a mere shadow. My wrists and arms were so shrunken that I could span 1842, the United States governthem with ease. My cough racked ment bought the entire outfit, remy whole body. I have sat up in bed taining the design for the postage and coughed the whole night long. I stamp, a three-quarter face portrait tried several doctors without suc- of Washington, changing the inscripthe first stages of consumption. In the spring of 1899, a little pamphlet was thrown in the hall door telling about Dr. Williams' Pink Pills, and I decided to try them. Before finishing the second box I noted a change and after using them for a couple of months I was completely cured, and the cough had left me. At present my health is as good as I can wish for, and I can truly say through all my suffering, I never got any permanent relief until I took Dr. Wil-Mams' Pink Pills."

Mr. Jinks added that it was not in his own case alone that Dr. Williams' Pink Pills had proved of advantage in his family. His daughter, Miss Mildred, was in very poor health, and scarcely able to go around. In fact, her friends feared her trouble was developing into dropsy. She five boxes of the pills and is now enjoying the very best of health.

Dr. Williams Pink Pills cure such apparently hopeless cases as Mr. Jink , because they make new, rich, red blood, and thus reach the root of the trouble. These pills are the only medicine offered the public that each a pretty stamp, designed with can show a record of such marvelous a crown in the centre, surrounded cures after doctors had failed. If by the rose, thistle and shamrock. you are at all unwell, this medicine | The rarest stamp is that of British will restore you to health, but be sure you get the genuine with the bears a ship in full sail, with these full name, "Dr. Williams' Pink Pills words- "Damus Petimusque Vicisfor Pale People" on the wrapper sim," which means, "We give and around each box.

A Neat Reply.

Sir William Harcourt, while dining one evening with Mr. Disraeli, made a delightfully courteous repartee. It happened that on the occasion in question Mr. Harcourt, as he was Mercury, clasping hands across the then, was placed next to the hostess. On the wall opposite them hung a picture of a lightly-draped female fig- the eagle of the Empire upon it, but ure, and during a pause in the conver- there are several exceptions. The sation the guest's eyes happened to island of Reunion has an open rose, wander to the painting. "I see you and Guadeloupe has a small stamp are looking at the picture," suddenly | with the value alone marked on it. broke in Mrs. Disraeli, with a laugh. "I always say that it oughtn't to be allowed in here; but it is nothing to was the first of the many states the Venus that Mr. D. has in his bedroom." "That I can quite believe," tute the German Empire to adopt required the Squire of Mallwood gallantly, with a bow, and, feeling that he had ventured on rather delicate ground quickly changed the subject. Later in the evening the incident was related to the host, who laughed own stamps. heartily at the neat reply of his Austria had first (1850), the double-

The Irish Guards.

Now that the Irish Guards are at Chelsea, Londoners have a chance of as profitable as if we bought from seeing what a fine body they are. Instituted by the Queen to commemorate the brave deeds of the sons of Erin in South Africa, the Irish Guards -who at Chelsea are 260 strongare all picked men. The consequence is that they are a level lot as regards height and physique, and present a very imposing appearance when marching. The uniform is a striking one, the green in the cap and the shamrock badges being particularly conspicuous. Colonel Richard Joshua Cooper, the commander of the new Irish Guards Regiment, has turned forty years of age, having been born on July 18, 1860. He entered the Grenadier Guards as second lieutenant in 1880, and became major of that regiment in 1898. He saw active service in the Egyptian expedition of 1882, when he took part in the action of Mahuta and the battle of medal with clasp and bronze star.

SCIENCE OF TAKING COLD. Conditions That Render One Liable

to Throat and Lung Troubles. There has been a noteworthy change of medical opinion in recent years as to the subject of taking cold. In no other country is this matter of such general importance as in the United States, where catarrhs, acute and chronic, are so common as to be almost universal. The explosive clearing of the throat which is characteristic of an Amer-

ican audience has been commented on by English and French visitors, and the surprise has been great that pneumonia should be so much more Oil? prevalent and fatal here than it is in foggy and muggy England. An understanding of the conditions under which a cold may be contracted should prove of especial value at this time of the year. It is a popular idea that if one

be amply provided with warm clothing, wraps, a mackintosh, rubbers and an umbrella little risk is run of tarrhal affection may be developed or pneumonia set in. The fact that weariness, depression of spirits, fright, anxiety or something which has affected the nervous system unfavorably has preceded the attack is frequently overlooked. When free from every form of nervous debility a person may expose himself to draughts, dampness and other usual causes of colds, and escape entirely, while at another time, when weary or depressed from any cause, he may of pneumonia from a much slighter Still the best society held her at seems to be recognized by all physicians who have made a special study does.
