Said Frederick The Great, "Facts are Divine Things."

and what applies to things of state applies | Portland Cement plant in the wolld. with double force to matters concerning health. When it is said that Dr. Pitcher's Backache Kidney Tablets can, if intelligently used cure all kidney and bladder troubles, and such other diseases as can be traced to a singgish or imperfect kidney action, it is always backed up by the positive proof and testimony of some reputable person, some one who is glad and willing to tell the world the result obtained. The following testimonial of Mrs. W. Eaton, 10 Fensing St. Toronto, has the ring of truth, and bears out the claim that it is a cure beyond a doubt for the young, middle aged, and aged.

Mrs. Eaton says :- "Dr. Pitcher's Back-Come and see what a lot of tinware we so much backache it extended to my hips and limbs. At times there would be an used a bottle of Dr. Pitcher's Backache Kidney Tablets. My back has recovered from its lameness, and I am sleeping well

them, and can highly recommend them." Any reader of this paper can test the merit of Dr. Pitcher's Backache Kidney Tablets free by enclosing 2 cents postage to the Pitcher Tablet Co., Toronto, Ont. Regular size 50 cents per bottle.

Mr. Henderson of Halton has made a suggestion to the Dominion Government that instead of placing a very expensive building in some large town in a riding that a lump some be voted for public buildings, which would be divided among the incorporated towns and villages for building for post offices. Take for instance Grey County and in- alumina, with smaller proportions of the oxides of iron, lime and magnesia. stead of spending all the public money for this district in Owen Sound let the Cement, these proportions must be forty or fifty thousand dollars be divided among Owen Sound, Meaford, Hanoyer. Durham, Markdale, Thornbury and Dundalk. A five thousand dollar building in any of these places would be suitable for the post offices and custom houses. As it is now if a town is not a absent. lake port their share of government support is very small. Thousands of dollars are spent every year in harbor towns should have some of the government pap. The present rents paid for suitable buildings for post offices etc. would go far to pay the interest on the money required for building. There is and clay and by the above formula. not a town but what would gladly fur "Pats" and "briquettes" from this nish a free site for such a building.

Continued from Page 1.

THE FACTORY

It is the purpose of The National Cement Company to construct works at Durham which will be the finest product of the best mechanical and engineering skill obtainable. The power generated is to be electrically distributed throughout the plant, which itself will be modern in every detail; the buildings will be models of convenience and equipped with the best and strongest types of machinery specially designed for this plant. Under these circumstances, a most economical and perfect Have advanced in price, grinding, mixing and clinker burning but we have a large stock process is insured, and hence the best in plain, decorated, fringe, Portland Cement Company fully realize lace, and lace and insertion | the magnitude of the undertaking and appreciate the expensive dangers of possible misguided judgement, founded price. We also have a upon lack of experience and knowledge, in connection with the construction and equipment of cement plants. The Official Report of The Bureau of

Mines for the Province of Ontario states that our manufacturers of cement have acquired their experience slowly and dearly; that of the factories now in existence, large amounts of money have been speat in processes and equipment proving us dess and costly experiment :: Where paper cannot be that one factory spent five years of time and much money, aided by chemists and experts, before it was satisfied ter mixes with cold water to start its works; and that another spent many thousands of dollars, a visit to some of the best Portland Cement Factories in Europe-where they were admitted as a special favor-and the services of two experts in the construction of a suitable plant before they could produce a commercial article. It is also well known that millions of dollars have been spent in Germany and the United States in learning and experimenting in the economical manufacture of a high grade Portland Cement; therefore The National Portland Coment Company believe they are especially fortunate in having associated with them a staff of the most practical and competent cement engineers in the country, who have designed and superintended the construction of many of the principal and best dividend-paying cement mills in North America, and who are recognized as leaders in cement manufacture; their last and crowning effort being the magnificent plant of the Peninsular Company at Cement City, Michigan, which is acknowledged by exports to be Such was the saying of a master mind the most modern and best equipped

> CHEMISTS' REPORT National Portland Cement Company, Limited, Toronto, Ont.

Gentlemen: A thorough inspection of the property owned by the National Portand Cement Co. in and near Durham n as been made, and over one hundred samples of marl have been taken at regular intervals at different depths which have been subject to chemical Cream Separators, and physical examination at this laboratory, and I herewith make my final

1. The marl was found to be covered with water so shallow that it can be dredged without any difficulty.

2. There is but yery little organic sediment overlying the marl so that it would be unnecessary to do any strip greatest benefit to me. Formerly I had ping before dredging for use at the 3. The marl is found in a very finely

divided condition, which is an admiracute lameness in my hips and a burning able feature, since it will require but little grinding preliminary to calcination and therefore cheapen cost of

4. The marl is of the finest quality, no better material having been analyzed at the laboratory. The chemical analysis which I include in this report at nights. From my experience in using shows it to be of exceptional purity, bethe Tablets I have much confidence in | ing very high in carbonate of lime and 5. This mail when mixed with the

proper amount of clay will, on calcination, produce the finest grade of Portland Cement. The average percentage composition

of the marl is as follows:-

Sand......None Silica (SI 02)..... 0.40 Carborate of Lime (Ca COS)... 98.05 Magnesia (Mg O)..... 83 Sulphuric Anhydride (8 03) ... Trace

Clay is a decomposed orthoclase feld-spar, consisting chiefly of silica and For the manufacture of Portland within certain definite limits, and the silica must be in a state of chemical combination, or what is known as "soluble silicate" and not in the form of free sand. Careful and exhaustive analysis of the clays submitted show that they include all of these very desirable qualities, while free sand is entirely

I have also made the necessary computations to determine the proportions in which your marl and clay will need to be mixed in order to make cement,

With this report I send you a sample of cement and a "briquette" of same, cement, when subjected to boiling

THE NATIONAL PORTLAND CEMENT CO. water for several hours do not shrink or crack, but set quickly and harden water for several hours do not shrink

I therefore conclude that your marls and clays possesss all the essential good qualities, and none of the poor ones, for the manufacture of the highest grade of Portland Cement.

> Yours very truly, JOHN GCDFREY DEAN,

THE LOCATION.

Tais is still unsettled, as shareholders it is of little consequence where the works are placed, for dividends will not be affected by the location, but as citizens of the town the matter is of first importance as planting it at extreme limit and especially the southern one will cause a divergence of growth which this town should shun by all means in the light of past experience. The long struggle between Upper and Lower values well maintained. Milch cows sold Town came to an end a few years ago. a little brighter. Sheep, lambs and calves Establishing great works at the south- were steady, with prices unchanged. ern limit would be the beginning of another long struggle. We hope that even the southern residents may see the oc cattle, 100 sheep and lambs, 61 calves force of our article of two weeks ago and 1,150 hogs. and unite in urging the council to secure a central location. The suggestion of a public meeting made by our confrere in the bidding owing to the falling off in called forthwith as the sooner the et held its strength. The inquiry for high question is settled the better. Durham | grade shipping cattle was keen and buyers one and undivided must be the motto were not able to secure all they wanted

Live Stock Market.

Toronto.

Trade was a little quieter at the West-

ern Cattle Market to-day; buyers seemed to be well supplied with cattle and were not anxious to buy at the prices asked by holders. There was a satisfactory volume of business on the whole, but price concessions were made in many instances in order to dispose of the stock. Particularly was this the case with the common and medium grades; the choice to picked lots sold quickly at excellent prices, as usual. A great many buyers were prepared to take only choice cattle, and the heavy receipts of indifferent stuff, especially in butchers', made trade drag a little. The ron was protty well cleared out, however. and prices were not materially changed. Exporters were steady and good to choice butchers' were firm. Export bulls were quiet and other bulls were steady. Feeders and stockers were rather active, with

Export Cattle-There was less activity last week is a good one. It should be the quality of the offerings, but the markfrom the day's receipts. There was a large supply of medium cattle and these were slow of sale. Choice lots are quoted steady at \$4.85 to \$5.20, and medium, in- D. McPHAIL cluding light weights, are worth \$4.85 to

Butchers' Catile-Buyers found it difficult to obtain good cattle, as there was an abundance of unfinished stock. Prices held steady, but sellers found it necessary to occasionally let small lots go at a sacrifice. There was only a slow demand for the ordinary grades and the principal activity was in the gilt edged stuff. Picked lots are steady at \$4.10 to \$4.50, and choice readily bring \$3.85 to \$4.10. Good are quoted at \$3.35 to \$3.75, and medium to common sell from \$3.35 down to \$2,50.

Export Bulls-Trade inactive, with light offerings. Market is steady at \$4 to \$4 25 for heavy and \$3.50 to \$4 tor light. Feeders-Short-keep were in good demand and steady at \$4 to \$4.35. Medium weights were quiet, but lights were active and active and steady at \$3 25 to \$3.65. Stockers-There is a fair inquiry for the

select weights and prices are unchanged at \$2.85 to \$3.25. Milch Cows-Offerings where only fair and market showed no strength. Quotations are a little higher, as sales were made

Sheep and Lambs-A little run and no change in prices. Business was brisk while the st poly lasted and everything was

Calves-Moderate receipts and an active market. Prices are unchanged at \$1 to \$8

Hogs-Market has eased off on account of heavy offerings and weaker tone of foreign markets. Selects of 160 to 200 lbs natural weight are 12th lower at \$6.25 Fats are unchanged at \$6.25,
