STANDARD MEASURES, -By all means let us have honest boxes for berries and honest baskets for larger fruit. The packages in which fruit is sold are of all sizes, and whether or not they are made in irregular shapes and sizes for the express purpose of deceiving buyers, the fact is that they are deceptive and cause a great deal of dissatisfaction. Almost all other commodities are sold by the Office, over Grant's store. Lower Town pound or quart. They is no reason why Not only should they be sold by the pint ing cattle and preventing the horn-fly or quart, the same as other articles, but steps should be taken to prevent fraud by the covering up of inferior stuff with selected fruit on top of the basket or box. The Government should do all it can to enforce the principal of honesty in transactions between buyer and self-er. The law should step in and protect the consumer in eyery legitimate way, and one such way is the use of standard measures in the sale of these articles.
