SHIRT-WAIST STYLES.

Two or three novelties in shirt-waists are shown in August DELINEATOR and will probably do more to create a sale for that number among women than any other style shown at this season of the year. The most notable feature in shirt-waists is that in which a diagonal direction of the fabric from the shoulders to the lower front is secured without cutting the fabric bias. It is a novel effect, and THE DELINEATOR shows several shirt-waists cut in this manner. Another great novelty in the August DELINEATOR is that of a shirt-waist cut to produce a pouch effect. It is called the Grecian Pouch Shirt Waist.
