You hatcheth them not, so he that get- if a man buys anything he does not seave them in the midst of his days and at his end shall be a fool."

Allusion is here made to a wellknown fact in natural history. If a partridge or a quail or a robin brood the eggs of another species, ly a man who has gone through life that happened to brood them, but at the first opportunity will assort with their own species. Those of us who have been brought up in the country have seen the dismay of the farmyard hen, having brooded aquatic fowls, when after awhile they tumble into their natural element, the water. So my text suggests that a man may gather under his wings the property of others, but it will after awhile escape. It will leave the man in a sorry predicament and make him feel very silly.

What has caused all the black days of financial disasters for the last 60 years? Some say it is the credit system. Something back of that. Some say it is the spirit of gambling ever and anon becoming epidemic. Something back of that. Some say it is the sudden shrinkage in the value of securities, which even the most honest and intelligent men could not have foreseen. Something back of that. I will give you the primal cause of all these disturbances. But there is a line to be drawn between adornment and decorations that we can afford and those we cannot afford, and when a man crosses that line he becomes culpable. That is a misall the time sailing so near shore that business misfortune or an attack of sickness prepares them for pauperism. You know very well there are thousands of families in our great cities Who stay in neighborhoods until they have exhausted all their capacity to get trusted. They stay in the neighporhoods until the druggists will let them have no more medicines, and the butchers will sell them no more meat,

Of course sometimes men are flung of misfortunes and they cannot pay. I know men who are just as honest in having failed as other men are honest but there have been some times when could not meet his obligations, but all that I put aside. There are a multitude of people who buy that which gance accounts for a great deal of what they never intend to pay for, for which there is no reasonable expectation they will ever be able to pay. Wholesale trade at Montreal this week has been without any marked change. The shipping business is quite at Toronto has been less active this week. The conditions of business are generally healthy, and a large turnover is looked for the next three or four months. At the Coast business is reported as dull. Trade at Hamilton this week has been fair for this season. The heat, and the fact that many people are away on bolidays now, tends to make business less active. A good many fall goods are being shipped. Trade in wholesale circles at Winnipeg this week has been very fair. Business at London has been well maintained. At Ottawa there has been a fair movement so far in fall goods and the sorting trade has kept up well.
