The Pan-American Dairy Test.

There is no other condition which makes as much variation in the flow of milk as does that of atmospheric temperature. So long as the temperature is about the seventies the cows keep up a good, even flow of milk, but just as soon as the thermometer goes up in the eighties, down goes the milk, no matter what the feed is. Green corn, cut, and green millet have taken the place of silage for the past ten days and the cows were doing well on this feed until the present hot spell came upon us which commenced on the 19th inst and the cows are now suffering from the heat as much as they have done at any time since the test commenced with a consequent shrinkage in milk. There is the greatest variation in the heavy milking breeds, they drop the most when the conditions are unfavorable and they respond more quickly when the conditions are favorable. The week ending July 23rd was the most trying week of the season until the present, and when the cooler weather came in about the first of August there was a good increase in both milk and butter in most of the breeds, but at the present writing the thermometer stands from 85 to 86° and the milk has again fallen off badly. Up to the present time all the cows have been milked three times daily—5 a. m., 12.30 p. m. and 8 p. m. but there has been much debating as to whether this is the wisest course under such trying conditions with the result that three of the American herdsmen broke over the lines yesterday and are now milking only twice per day. The result will be closely watched during the next month, as some claim that more milk and butter will be produced by three milkings than by two milkings, and those interested will do well to watch the result, which will be given from time to time as the test goes on.

During the cool weather the Holsteins made the greatest gains with the exception of Meg as she had a week's sickness which put her back very much in her milk. The cost of feed, however, still keeps them down to 4th or 5th place on the butter test. The Guernseys Mary Marshall, has again asserted her supremacy as queen of the barn and headed the list with \$2.09 profit while last week she gave a profit of \$2.37. The Jersey, Primrose, which headed the list two weeks ago with \$2.35, stood second last week with \$2.22 profit, and this week with \$1.91.

The Jerseys as a breed, stood at the head last week with a lead of 95 cents but they have lost heavily during the week just ended, August 20, and the Guernseys have increased their lead by 56 cts making their total lead at present \$6.66. It may not be generally understood how the Guernseys got such a lead of the Jerseys during the first month, but, in justice to the other breeds, it might be stated that the Guernseys were all in fine working trim at the beginning of the test. Four of them freshened in April, (2 of them after they arrived on the ground) The Jersey, Primrose, had been milking two months before the test commenced and Rexina did not calve until the end of the second week after the test commenced, and she was paying for her feed in the meantime which put her back about \$4.00.

The Red Polls are making a remarkably good record and Mayflower holds second place on total profit since May 1. Mary Marshall, (Guernsey), standing 1st with \$39.33, Mayflower, (Red Poll), 2nd, \$33.79, and Primrose, (Jersey), \$33.66. The whole of the Red Polls in the test are owned by Capt. V. T. Hills of Delaware, Ohio, who has made some remarkably good sales as a result of his cows' record here.

The Canadian cows, as a whole, are making a good record and are a much finer lot of cows than their competitors and they will all give a good account of themselves by the time the test is closed.

There are four prizes given in this test—one for most profit on estimated butter as revealed by the Babcock test, the butter valued at 25 cents per lb., one prize for most butter by the churn to one prize for total solids in the milk valued at 9 cents per lb. and one prize for total solids plus the gain or loss in flesh of the cows valued at 3c per lb.

The first is creating the greatest interest and is the one on which the profits, so far, have been based and published. The churn test is not considered to be at all reliable on account of only one day's milk from each herd per week being separated and churned, the result for the week being estimated from that one day's churning. There are so many contingencies which might and do arise to affect the product of one particular day that the result can only be approximate at best. The prize for total solids is based on the value of the whole milk as food, estimated from the wholesale price for city delivery, and in this, the sugar of the milk figures very largely, forming about 33% of the total solids.

In the making of cheese the greater part of the sugar passes off in the whey and comprises about 70 per cent of the solids in whey and of which no account would be taken if a cheese test had been used as a basis for a prize but in this test for total solids a pound of milk sugar figures the same as a pound of Casein or a pound of Milk Fat.

In the competition for this prize the order of the herds is completely changed and at the present writing they stand as follows:

Holsteins	\$173.91 profit
Ayrshires	162.55 "
Brown Swiss	145.12 "
Shorthorn	145.08 "
Guernsey	143.55 "
Red Polls	142.00 "
Jerseys	133.86 "
French Canadian	124.76 "
Polled Jerseys	103.79 "
Dutch Belted	96.76 "

When the test commenced there were only a few newspapers in the United States that took any notice of it, but there are now over 200 articles for reports from the Associated Press, thus showing the intense interest which has been created all over the country. At the World's Fair in 1893 the test extended over only three mos., while this test is expected to cover a period of six months and it will be a test of endurance.

The following is the standing of the herds in the Butter Fat Test for the week ending August 20th:

Guernsey	\$8.66 profit
Jerseys	8.10 "
Ayrshires	7.62 "
Red Polled	7.37 "
Brown Swiss	6.97 "
Holsteins	6.82 "
Polled Jerseys	6.47 "
French Canadians	6.17 "
Shorthorn	5.93 "
Dutch Belted	5.06 "

Jas. Stonehouse, Model Dairy, Pan-Am. Exposition.

Additional Locals.

Mr Thos Reid received a severe injury to his hip while employed at the station last week.

Mr. Harry Bennett captivated the audience with his funny songs and sayings, particularly in his inimitable song "The moving job."—World. In Town Hall evening of Show Day.

Rev. Mr Farquharson on Sunday evening prayed very warmly for the stricken President and the sorrowing people of the Republic and we notice that both in Canada and Britain this was widely done. Great sorrows have their uses.

Mr. R. Torry is in enforced idleness this week through an injury to his right hand received while on duty round the Fire Engine. As we think of it what a about the Firemen's picnic? Is the first year of the Century to pass without recognition? The Fire and Light committee might make a move.

IMPROVING.—Events have thickened round the Review corner since last issue. Mr. T Black has made great progress in the renovation of his residence, a fine piece of sidewalk has been laid, a new roof placed on our printing office while a lusty young printer has made his appearance inside.

OUR SCHOOL.—Is fast assuming importance judging by the number of outside pupils availing themselves of its advantages. The higher rooms have a fine attendance and 14 Modelites are under Mr. Allan's tuition. Following are their names: Misses Nellie Moran, H Lawrence, and A Lawrence, Durham; H Mearns, Hanover; Dargavel, Warton; Dinsmore, Warton; Rutledge & Small, Fleeston; Sinclair, Paisley; Messrs Tyreman & Willis, Allan Park; Winkler, Hanover; Buchanan, Chesley and Ritchie, Edge Hill.

A PROMINENT GLENELG MAN LEAVING.—Mr. George Lamb, for nearly half a century a resident of Glenelg, leaves in a few weeks for Sault Ste. Marie, Michigan, near which his wife's parents and other friends are located. Mr. Lamb came with his family from Dundee in this country in 1849 and after five years in Brantford moved to Glenelg, settling near Edge Hill in 1854. The family remained here many years and moved to Glascoot nearly 20 years ago. Mr. Lamb was 7 years in Glenelg Council, and for two years was one of the Township Auditors. He was also a local Justice of the Peace. Mr. Lamb was a public spirited man and will be missed from the district where his activities have been laid. He will be missed much too from Dornoch Presbyterian Church where he has been on the Managing Board for 14 or 15 years. The Review while regretting his leaving extends hearty good wishes for the future.

THE REVIEW will receive new subscribers to the balance of the year as follows: The Review 25 cents, The Mootreal Family Herald with a beautiful 14x20 inch photo picture of the Duke and Duchess of Cornwall 25 cents; or the lot for 40 cents. This is a cash offer for new subscribers.

CEMENT WORKS.

Great progress is continually being made in the making of cement blocks, stone crushing, grading of the switch, &c. The grading is now well into the 2nd Concession and is approaching the town line. Over 150 men are employed and many teams and thus the work goes rapidly on. We will next week give a detailed account of the progress made.

PRESBYTERY NOTES.

The Saugeen Presbytery met at Mt. Forest on Tuesday, the Rev. G. Kendall moderator elect in the chair. Reports show that nearly \$3000 has been contributed by the Presbytery to the Common Fund branch of the Century Fund, of this amount Durham congregation contributed nearly \$450.

The case from Cedarville occupied the attention of the commission in charge of it most of the day and though the conclusion is not yet reached there is hope that an amicable settlement will

Rain and sweat have no effect on harness treated with FUREKA HARNESS OIL. It keeps the harness soft and pliable, sticks to the harness and does not wash off. It keeps the harness from cracking and keeps the harness from becoming stiff and brittle. It is made by Imperial Oil Company.

made at a meeting to be held at Cedarville on Tuesday next week. The commission, who have the matter in charge, consists of Revs. W. Farquharson and T. McCullough, and Messrs W. Young and J. Crow. The next meeting of Presbytery will be held in Palmerston on the second Tuesday of December.

W. F. M. S. The annual meeting of the Presbyterian W. F. M. S. was held on the same day in the Presbyterian church Mt. Forest. An interesting programme was presented to which life and interest was added by the presence of Miss Dow, M. D. and Rev. Norman Russell both of Central India, who gave inspiring and instructive addresses afternoon and evening. Mrs. McMurchy, of Harrison was elected president in room of Mrs. Morrison who has filled the chair for several years. Over \$700 was raised by the society for mission work during the year which shows an advance of \$100 over last year. The next meeting will be held in Harrison in September 1902.

Live Stock Market Toronto. Trading at the Western Cattle Market today was lively, and the small offerings were soon sold. There was an excellent demand, particularly for the better grades, but even the poorest animals found buyers at steady prices. There were not enough cattle to go around, and at the close of the day's business several dealers found themselves short of the supply they wanted. Prices were steady, and there are no changes in quotations. The total run was 45 loads, including 493 cattle, 1,008 sheep and lambs, 22 calves and 873 hogs.

EXPORT CATTLE.—The quality of the offerings was not good, but all the receipts were soon sold. The demand was rather good and the offerings were very small. Good export cattle are wanted, and they would sell at higher prices than are now quoted if they were of the proper grade. Prices for to-day's sales were unchanged at \$4.75 to \$5 for the best lots and \$4.25 to \$4.65 for mediums.

BUTCHERS' CATTLE.—The offerings were chiefly low grade and there was a great scarcity of well finished lots. Prices for the best were firm at \$4.50 to \$4.85, and choice were steady at \$4 to \$4.50. Everything, including the "scrubs," was soon sold, and there was a call for more.

FEDDERS AND STOCKERS.—The heavy weights were dull, and supply and demand being small. The light weights were very active, however, and all were sold at steady figures. Prices unchanged. SHEEP, LAMBS AND CALVES.—The run was fairly large and the market held steady. Almost everything was sold, and the outlook is for a fairly steady market. Prices are unchanged.

HOGS.—Steady and unchanged at 67.25 per cent for select, 37 for corn-fed and \$6.75 for lights and fat.

WEDDED IN RAT PORTAGE. A pretty wedding took place on August 22nd last at the residence of Mr. and Mrs. Howard Barnes, when their second daughter, Mable Blanche, was united in the holy bonds of matrimony to the man of her choice, Mr. Marshall C. Estabrooke. The bridesmaids were Miss Barnes and Miss Eva, sisters of the bride, while the groom was supported by Messrs Carmichael and J. E. Thomas. Miss Holmes, a cousin of the bride, played the wedding march. After the ceremony, performed by the Rev. Mr. Huskins, a stupendous repast was served in a large tent on the lawn. There was a large number of guests and the presents were many and beautiful.

The bride was dressed in white cashmere trimmed with white satin and lace and chiffer, and held in her hand a large bouquet of white roses. The bridesmaids were prettily dressed in lemon-colored muslin trimmed with black velvet baby ribbon and wore a bouquet of flowers.

Mr and Mrs Estabrooke have the best wishes of a large circle of friends. They will take up rooms on second street for the rest of the season.

[The bride is a niece of Mr and Mrs J. Barnes, Norman, the latter of whom is a daughter of Mr and Mrs Albert Bell, North Egremont.] They Must go out Watches at JRELAND'S Three (3) Solid Silver Cases containing good WALTHAM and ELGIN Movements at half price. This is your chance if interested in a time piece. I do not intend carrying this line of goods; so out they go. JAMES IRELAND.
