

LETTERS TO THE EDITOR.

To the Editor of the REVIEW  
Dear Sir,

Kindly allow me space in your valuable paper to offer a few comments re remarks in last week's Chronicle "Conviction Quashed" Rex vs McKinnon. As stated in the article referred to, the above conviction was quashed on a mere technical objection in view of the case not having been entered within six months after the offence was committed.

In other respects the judgment has apparently been good as no costs were granted in the case to the Defendant whose expenses will be very much larger than the Town's expenses will be, he having to pay all Court Costs, etc.

A full explanation of the case was given to the ratepayers of the Town on nomination night and the necessity of bringing the suit on, fully gone into, the principal necessity being the defence of the Fire By-Law, which had been attacked as being bad and not capable of enforcement.

The Courts have now decided that our By-Law is good, and although a certain amount of expense has been incurred, it was absolutely necessary to know if the By-Law could be enforced. The Editor of the Chronicle concludes the article by stating that this is the fourth judgment given by me that has been quashed by the higher courts, and advises me not to sit on any more cases.

This is one of his many mistakes, as in eight years I have only had two judgments quashed in which I disposed of the case myself.

In this particular case the Town Solicitor submitted his side of the case to outside legal talent who agreed with him in his contentions that a conviction should be made. While on my part, to guard the Town as far as possible against expense, after the evidence was all in and arguments made and noted by the Council on both sides of the case, I reserved judgment for a week and submitted the whole case, including evidence, arguments of Counsel, &c., to Mr. Kingston K. C. of Mr. Forest. After a careful reference to the Statutes, &c., he believed that a conviction should be made and largely framed the judgment which was given.

If Mr. Irwin will watch the legal columns of the Toronto papers for a few days he will find that it is a daily occurrence for judgments of even the High Courts to be reversed, although these are supposed to be making a daily study of the Statutes and law of the land.

And now Sir in conclusion just a few remarks in regard to the "Chronicle." It has been quite patent to every reader of that paper for some years that the Editor has not allowed any opportunity to pass which presented itself to abuse me publicly, by misrepresenting facts or in any other way which he possibly could to injure me through his paper.

The right is granted to every public journal to criticize public men or their actions in a fair minded manner for the good of the community but when your journal loads these criticisms with personal abuse and misrepresentations as Mr. Irwin has done many times in the past and thus screens himself behind a newspaper, all fair-minded citizens will agree that such articles stamp him as a sneak and a coward.

Respectfully Yours,  
W. CALDER.
