The Secret of Success. succeed, surround yourself with spe-

cialists smarter than yourself." It is pleasing to note, without reflection upon the directorate, that they have acted on Carnegie's advice, and have in all departments of the construction work on the Durham mill secured the first men in America.

plans have been so accurately followed out that the heaviest machinery has been set in place without so much as stripping a thread in a bolt.

falls much of the mantle of praise. Mr. Bogardus is a young man, but has already crowded more experience into his life than many men do in an entire existence. He is a genius-that's all there is about it. Mr. Bogardus has already erected nine of the largest plants in America. Mr. Bogardus knows the business from the ground floor up, from A to Z, from stem to gudgeen, and has assisting him in the engineering staff M. De Lano, jc., W. J. Maytham, J. Trainor, W. H. Sutliff

and A. Laidlaw. Mr. C. E Layton has been a valuable aid to the engineering department, and is also an expert by reason of having assisted in the construction of many leading American plants. He has charge of all concrete and

foundation work. Own Their Own Road.

The National Portland Cement Company own their own road, cars, and under Government charter with full railroad privileges. The line was constructed by Barnabas Gibson, for over 30 years connected with the Grand Trunk Railway, and while the road is not as long as the Trunk, it is, so Mr. Gibson boasts, just as strong and just as wide. It runs out to the marl bed, where the supply is absolutely inexhaustible.

The other specialists who have charge of the various branches of construction are : G. McGrane. machinery; H Weiner, carpenter on buildings; W. Neufer, carpenter on foundations and templets.

pany, and besides giving them sand and gravel for building, she has produced a flow of splendid water, close at hand. Taking advantage of the similar to which the marl is received large hoppers are provided for receiving the clay. This is done in a manner similar to which the marl is plant, and shifts are working night and day. steam being turned on for handled, the clay being discharged by the first time to-day.

gentle incline from the marl bed to the mill, the cars of marl will run without appreciable power to their destination, thus at one stroke lopping off a considerable item of expenditure. Gas and oil are distinctly traceable in the company's land, and your correspon-Carnegie said : "If you want to dent would not be surprised if in the future the entire plant would be run, power generated, and lightgiven, by these natural forces. This would mean an immense saving.

A Modern Marvel.

of the marvelous. A few years ago it This is the day of specialists, and would have been looked upon as inthe men engaged in the erection of the eredible, and even to-day, with the big plant here are specialists The most perfected methods on every side, it will rank as the only mill in the world where the marl is scooped up by machinery, and by machinery car-On W. B. Bogardus, chief engineer, at last emptied into barrels, and all without the touch of a human hand.
