

# A RAILWAY MAN.

Extraordinary Unpleasant Symptoms of - Kidney Trouble in this Case.

Tortured by all kinds of pains and aches he tried everything, but failed to find relief till a friend advised him to use Dodd's Kidney Pills. They have made a well man of him and he is grateful.

Ottawa, Ont., July 7.—(Special).—Frank Chartrand, a railway man, whose home is 130 Little Chandler street, has acknowledged that Dodd's Kidney Pills have done more for him than anything else in the world has ever done. He says: "I suffered with backache and was always drowsy and had a very heavy feeling in my limbs."

"I had frequent severe headaches and more times very sharp pains in the top of my head, which gave me much annoyance in my work."

"My fingers would cramp and I would have an uneasiness in my legs and occasional pains in the loins."

"I was dizzy in spells and short of breath. If I ate a hearty meal I would have a pain in my left side. My appetite would sometimes be very good and sometimes I couldn't eat anything."

"I had a constant soreness and tenderness over the spine and tired feeling in the region of my kidneys."

"I suffered quite a little with a dragging, heavy feeling across the loins."

"Dodd's Kidney Pills were recommended to me by a friend of mine who had been cured, and I began to use them."

"Almost from the start I began to feel the wonderful improvement which continued as the treatment proceeded, till the unpleasant symptoms had one by one entirely disappeared."

"Dodd's Kidney Pills have worked a wonderful cure in my case, and I cannot speak too highly of this great and good remedy."

What Dodd's Kidney Pills have done for Mr. Chartrand they have done for thousands of others, and they'll do the same for you if you give them a chance.

There are many railway men in Canada to-day who find Dodd's Kidney Pills indispensable. They are the railway man's surest and best friend.

The constant vibration on trains and engines is very hard on the kidneys, and Dodd's Kidney Pills make these organs well and able to resist disease.

## What He Was Afraid of.

(State Journal.)

Clean, Safe, Effective.

# STILTON CHEESE; HOW IT IS MADE.

By an English Authority.

In the equipment of a dairy for making Stilton cheese it is essential (urges Professor James Long) to obtain milk vessels, and those of tinned iron are now generally used, although they do not retain the heat of the milk so well as wooden vessels, of a size which is in accordance with the number of cows from which the milk is obtained. These vessels are narrower at the bottom than at the top. The milk intended for manufacture having been strained and purified as far as possible in this way, is poured into the vessels, and when the temperature which is regarded as the essential temperature for renneting is reached, the rennet is added. It is usual to dilute the rennet with pure water when it is being poured into the mixture to make it briskly that the mixture may be complete. Under most systems the temperature of the milk varies between 50 and 90 F., the curd being sufficiently coagulated to commence work in about fifty minutes. Temperature, however, is a question, which the maker—having learned both practice and principle—will determine for himself when he goes to work with his own milk.

It is needless to say that the dairy must be well ventilated, sufficiently cool to prevent too high a temperature in the middle of the summer, and in the more rapid does the whey or serum leave the curd, with the result that the curd may be too dry. In days gone by semi-watery primings or drainings or sinks or drains were used for all terms are used—were employed for the removal of the whey. Now, under the best equipment, white earthenware sinks or troughs are employed, and of a length in proportion to the quantity of milk used. They may have a hole in the bottom for removing the whey, a plug being used, and if it is necessary a pipe may be screwed on to the bottom to carry the liquid elsewhere. Across this tank pieces of well-planed hard wood are placed to hold the sides of the curd in position, the cloth having been spread across its supports, the curd, when fit, is removed, slice by slice, into it, and the whey at once commences to leave the curd. As it found necessary the four corners of the cloth are subsequently tied loosely together to keep the still tender curd in a compact mass, and to slightly encourage continued drainings by the gentle pressure which is thus applied. Presently it may be that the corners are tightened, and further pressure given. The object is to obtain curd sufficiently firm to handle without real pressure, but with sufficient pressure to separate the curd from the whey. Sometimes the maker draws the plug, and allows the whey to escape; under other conditions he prefers the curd to remain in the cloth, but soaking in the whey. The success of the cheese in its primary stage depends upon the proper development of acidity and upon temperature, so that neither too much nor too little whey is removed. When the curd is firm enough to handle it is either cut or broken into blocks, and placed in a dry vessel to air, or to ripen by contact with the air. Before the hoop or mould proper is filled with the curd, and the most improved size is 15 lb. by 8-1/2 in. in diameter, the curd, ripe and sufficiently firm but mellow, is broken into small pieces, usually by the hands of the maker. It should perhaps be pointed out that the growth of the blue mould or fungus common to Stilton cheese is possible only because it is not pressed. It will be noticed that as the curd is broken into small pieces the complete cheese is crowded with interstices. During the process of manufacture the seeds of the blue mould are deposited from the atmosphere upon the curd, and as it is a congenial soil upon which the fungus can subsequently feed, and as, too, the interstices provide both space for their expansion during growth, and air, so it is important that the greatest cleanliness should be observed, otherwise destructive germs will also find their way into the interstices and in the end destroy the cheese.

**The Height of the Tallest Men.**  
Turner, the naturalist, declared that he once saw, upon the coast of Brazil, a race of gigantic savages, one of whom was twelve feet in height. M. Thevet, of France, in his description of America, published at Paris in 1575, asserted that he saw and measured the skeleton of a South American which was 11 feet 2 inches in length. The Chinese are said to claim that in the last century there were men in their country who measured 15 feet in height. Josephus mentioned the case of a Jew who was 10 feet 2 inches in height. Pliny tells of an Arabian giant, Gubarus, 9 feet 9 inches tall. The tallest man in the days of Claudius John Middleton, born at Hale, Lancashire, in the time of James I., was 9 feet, 3 inches in height, his hand was 17 inches long and 8 1/2 inches broad, says Dr. Platt in his "History of Staffordshire." The Irish giant, Murphy, contemporary with O'Brien, was 8 ft. 10 in. A skeleton in the Museum of Trinity College, Dublin, is 8 feet 6 inches in height, and that of Charles Byrne, in the museum of the College of Surgeons, London, is 8 feet 4 inches. The tallest living man is Chang-tsing, the Chinese giant. His height is 7 feet 3 inches.—Medical Examiner and Practitioner.

Plants for the destruction of sewage by cremation are now operated in 97 cities of the United States.

# There is

no escaping the germs of consumption; kill them with health. Health is your only means of killing them.

**A Discreet Lover.**  
(Detroit Free Press.)  
He—I love you, darling. I swear it by those lofty elms in yonder park. She—Don't swear by those, Reginald. He—Why not? She—Because those trees are slippery elms.

**Minard's Liniment is the best.**  
Wanted to Get It.  
"Mamma," said Tommy, "do sugar ever cure anybody of anything?" "Why do you ask, my boy?" "I thought I'd like to catch it," said Tommy.

**Minard's Liniment cures La Grippe.**  
Bengal Tigers.  
The man-eater is usually an old tiger, whose strength is falling and whose teeth have partly lost their sharpness. Such a beast finds it easiest to lurk in the vicinity of settlements and to pick up an occasional man, woman or child than to run down wild cattle.

The largest, fiercest, and most brightly colored tigers are found in the Province of Bengal, near the mouths of the Ganges River, and not far from Calcutta. A full-grown Bengal tiger sometimes measures ten feet from nose to tip of tail. Such a monster makes no more account of springing upon a man than a cat does of seizing a mouse. He surpasses the lion in strength and ferocity, and has no rival among the beasts of prey except the grizzly bear and the recently discovered giant bear of Alaska.—St. Nicholas.

Printed words alone may not convince, but anybody who has used "The D. & L. Menthol Plaster for sciatica, lumbago, pain in the side or wrist, what he thinks of it. The answer will be safe guide.

**WRIT IN BLACK AND WHITE.**  
New Telephone That Writes the Messages Sent Over the Wires.

Among the patents recently issued in Denmark is one to Peter Oluf Pedersen, of Copenhagen, who has perfected a method of using the telegraph in such a way as to record a number of messages on a single steel strip and to reproduce each message without interference from the others. With this improvement the size of the drum or the length of the wire or ribbon used therein may be materially lessened, so that a long speech or a number of speeches or signals may be stored upon a comparatively short or small magnetic body.

The telegraph is the invention of a Danish electrical engineer, Valdemar Poulsen, and is, as the name implies, a combination of the telegraph, telephone and the graphophone or phonograph. By the use of a steel band, a telephone or telegraph conversation can be recorded on a steel wire or tape and reproduced at any time and as often as desired without the record deteriorating.

In this apparatus a steel wire or steel band, is moved by any suitable means with considerable velocity between the poles of a small electromagnet. On speaking into the telephone, the electrical currents set up in the transmitter react upon the electromagnet and cause a continuous vibration in the direction and in the degree of magnetism at the poles of the electromagnet. These variations are permanently recorded on the steel wire as it rushes by, and when the message is complete the steel wire retains its place in the shape of a continuous series of transverse magnetized lines varying throughout in their polarity and in their strength. On connecting a telephone receiver to the electromagnet, an agreeable conversation can be heard, and the telephone to repeat what was said in an almost absolutely perfect manner.

**Willing to Oblige.**  
"Yes, I like you very much, George," said the fair girl with the fluffy hair, "but I really couldn't think of marrying you." "Why not, darling?" queried George. "Because we could never be happy together," she replied. "You know I always want my own way in everything."

**Go Take a Swim.**  
Secretary of War Root, while on his way to the commencement at Hamilton College, stopped at a hotel in a little New York hotel where he is well known. He called on some woman whom he knew as a boy and she asked him if he was comfortable at the hotel. "Oh, yes," he said, "but I would like a bath, and they haven't one." "Go 'way, sir," said one of the women. "You're putting on style since you got in the cabinet. You go out to Cedar run and take a swim as you did when a boy."—Chicago Chronicle.

**Defied.**

Freddie—When do you call a woman a grass-widow, dad? Cowdigger—When the grass isn't over her husband.

# MODERN SPLENDOR

WILL PREDOMINATE.

Queen Alexandra insists that the robes shall not be sacrificed to historic precedent or to the College of Herald. She has no mind to walk to her throne in Westminster Abbey looking like a picture out of the Middle Ages. Her robes will have a modern style so far as is possible.

The selection of robes for such a historic ceremony involves countless considerations of detail, which do not enter into the choosing of dress for state ceremonials in general.

The Queen has her trials, and her boudoir at Marlborough House has had on occasions the appearance of a school of design and a modiste's atelier, combined. Shall it be silk or shall it be velvet? Is it to be embroidered with gold or studded with gems? Shall the heraldic devices be put here or shall they be put there are the questions which the Queen and her ladies are even yet discussing.

The Queen will not walk under a canopy, that ancient custom being omitted from the coronation ceremony, but the president of having her train carried by her three daughters will be followed, and would certainly give distinction to the procession and prevent rivalry among the princesses.

The Queen will wear everything new on her coronation day, down to the most insignificant item in her apparel.—London Daily Mail.

When washing greasy dishes or pots and pans, Lever's Dry Soap (a powder) will remove the grease with the greatest ease. A Miracle.

**Aunt Jemina.**—What is a miracle, Aunt Jemina?—Paw said it would be a miracle if you got married.—Chicago Daily News.

The human stomach is subject to many diseases, such as cholera, dysentery, morbus and dysteria, which, if neglected, are dangerous. The best and quickest remedy is Dr. Cassell's Food. Look out for substitutes. 25c. and 50c.

**Merely Looking.**  
Landlady (grudgingly).—You seem to be examining that egg very critically, Mr. Sloppy. Is there anything wrong about it? Mr. Sloppy.—Not at all, Mrs. Hashish! I was only looking for the wishbone, that's all!—Puck.

**Stops the Cough and Works Off the Cold.**  
Laxative Bromo Quinine Tablets cure a cold in one day. No cure, No pay. Price 25 cents.

**Altogether Too Honest.**  
"By Jove! I left my pocketbook under my pillow."

"Well, your servant girl is surely an honest person."

"That's just the trouble. She will give the pocketbook to my wife."

**ENGLISH SPAIN LINIMENT** removes all hard, soft or calloused Lumps and Blisters from horses, Blood Spavin, Curbs, Splints, Ring Bones, Swollen Sprains, Swollen Throat, Coughs, etc. Save \$50 by use of one bottle. Warranted the most wonderful British Cure ever known. Sold by all druggists.

**Pity Poor Morgan.**  
(Toronto Globe.)  
Owing to the circumstances that his interest checks on July 1st only amounted to \$2,000,000, J. Pierpont Morgan may not be able to take his family to the seashore this summer.

**TO TAKE A COLD IN ONE DAY.**  
Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c.

**Foot Stuart Not a Centipede.**  
(Ottawa Citizen.)  
Sanford and his roommates have been immortalized in verse by a Hamilton poet in a poem 64 lines in length. These are either too many or too few. The poem was only 45 feet deep and the centipede was for a period said to have been 100 hours. Mr. Stuart, the sweet singer, should give this his (to quote Sir Oliver) "serious consideration."

There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. A local disease and peculiar local remedy, and by constantly taking to cure with local treatment, pronounced it incurable. Science has proven catarrh to be curable, and therefore requires a constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case that fails to cure. Send for circulars and testimonials.

Address F. J. CHENEY & CO., Toledo, O. Sold by Druggists—75c. Hall's Family Pills are the best.

"Here's a story in the paper about a woman who married a man one day and applied for a divorce the next."

"From perversity, I suppose."

"No; from Chicago, I believe."

**New York Central and Hudson River Railroad.**  
The above name is a household word and the superior excellence of the road should be sufficient to attract most people, but now that the rate is the same to New York and points east as by other lines, no further recommendation should be sought. Everybody will tell you it is the best.

**War's Hell Broth.**  
(Woodstock Express.)  
If this thing of slaughtering people in scores every Fourth of July is to go on, it might be as well to change the flag's pet name to "Old Gory."—Hamilton Times.

Well, what is glory, anyway, but Gory with a little more "ell" in it?

**Piles.**  
Do you know you should Dr. Chase's Ointment. It is the best cure for Piles, Hemorrhoids, and every form of itching, bleeding, and protruding piles. The manufacturer has guaranteed it. See testimonials in the daily press and ask your neighbor what they think of it. You can use it and get your money back if not cured. One box at all druggists or EDWARDS, BATES & CO., Toronto.

Common soaps destroy the clothes and render the hands liable to eczema.

The Masses True to Him. (Toronto Globe.)

General Buller has brought down on his head another storm of newspaper censure. A suggestive feature of his case is that he is still the military hero with the London democracy.

Messrs. C. C. Richards & Co. Dear Sirs,—While in the country last summer I was badly bitten by mosquitoes—so badly that I thought I would be disgraced for a couple of weeks. I was advised to try your Liniment to allay the irritation, and I expected—a few applications completely curing the irritation, preventing the bites from becoming serious. The Liniment is also a good article to keep off the mosquitoes.

Yours truly, W. A. OKE.

Harbor Grace, Nfld., Jan. 8, 1898.

# STATISTICS AND COURTSHIP

A person of a statistical turn of mind has been delving into somewhat romantic domain for one of his practical bent. He has compiled statistics that cannot fail to prove interesting. Eighty-one out of 100 men, he says, vowed they could not live longer without the adored ones; 72 held the ladies' hands in a tight grip; 60 kissed them on the lips, 10 on the right hand, two on the tip of the nose and one on the shoulder. He was so excited that they could hardly speak; 26 lost their eloquence through certain qualms of conscience; 12 said in deep chest tones, "Thank God," and eight frankly admitted that they were inexcessibly happy. By studying the conduct of 100 men whose suits were rejected the statistician obtained the following equally interesting figures: Forty of them rushed in a frenzy out of the room; 21 of them said that life henceforth had no more value in their eyes, and that they would commit suicide; 14 became suddenly tongue-tied and irrational; six calmly resigned themselves to the fact that they were inexcessibly happy. By studying the conduct of 100 men whose suits were rejected the statistician obtained the following equally interesting figures: Forty of them rushed in a frenzy out of the room; 21 of them said that life henceforth had no more value in their eyes, and that they would commit suicide; 14 became suddenly tongue-tied and irrational; six calmly resigned themselves to the fact that they were inexcessibly happy.

Of the ladies 87 per cent. knew beforehand that the proposals were about to be made to them. Seventy of them sank as though embarrassed into the arms of the loved ones, and only four fell gently down on a chair or sofa. Fourteen covered their blushing faces with their hands, eight threw their arms passionately around the necks of the men. Two said "Please speak to mamma," and one sneezed. One lady, who was 48 years old, protested vigorously against giving or receiving a kiss. Another who was about the same age, said, "Yes, you may kiss me, but you must do it in a gentlemanly manner. Such, then, are some of the ways in which proposals are made and received. The study is an interesting one, and in several ways should prove especially instructive to members of the fair sex.

Minard's Liniment the best Hair Restorer.

**Costly Smoked Meats.**  
"The costliest of all the smoked meats," said a dealer in such things, "are the fine hams and bacon that come from Limerick, Ireland. The prices of these meats may vary slightly from time to time, but are selling usually, however, at from 33 to 35 cents a pound, and the bacon at 32 or 33 cents a pound.

"These costly smoked meats are made from fine hogs that are fed and tended with scrupulous care. The curing process is a secret.

"The combined result is shown in meats of such quality and flavor as to commend them most highly.

"Of course there are fine hams produced here, also, notably those of Virginia, the finest of which bring 24 cents a pound. Included in the price of the Limerick hams and bacon is a duty of 5 cents a pound. If you were to add that to the price of the Virginia hams you would raise the cost of them to 29 cents, and adding further the cost of transportation from Europe, would bring the Virginia hams pretty close to those of Limerick in price, so that in their original cost they are about the same.

"As to which is the better ham, that would be largely a matter of taste. The Irish ham is rich and juicy, the Virginia is of a more delicate flavor."

Minard's Liniment for Rheumatism.
