Cloth always is in good taste for street gowns. It drapes well, hangs well and can be made to fit almost perfectly, for it follows the lines of the figure, and if the figure be not all that might be desired it can be helped to a surprising extent. The soft, silky finish of many of the new cloths makes them possible to deal with in any style of costume, and there are many weights of cloththe heavy, thick ones that are used in coats and short skirts or in the long coats and cloaks; the medium | gowns ,but now weight, in plain or figured effects, and the light yet warm varieties of which the smart reception gowns are made and which this season are preferred to any others, for they can can be made up in a variety of designs, and when trimmed with braids or bands of the same material are exceedingly handsome.

White Gowns.

First among the cloth gowns come the white ones of a material so soft in finish that they look like kid. This is made up with the all white effect or with inserted lozenges of velvet of different colorings, or with round insertions of black velvet alternating with round insertions of Persian lamb When the square lozenge insertions are used they are outlined with folds of the cloth, and this trimming is put around the foot of the skirt, down the front of the waist and also on the lower part of the sleeves. Another favorite style of trimming is the Persian designs, either in braid or in cloth put on in bands around the foot of the skirt, down the front of the jacket and around the collar. Other white gowns have insertions of heavy lace, and are made very much on the plan of the white muslin gowns trimmed with heavy lace that have been so fashionable all summer. Few of the white cloth gowns are made short. Those that are short look conspicuous. They are made on the lines of the muslin or wash gowns, with a long skirted coat, and the skirt of the gown long enough to clear the ground. There is no trimming whatever, except on the revers, which are faced with dark velvet, braided with narrow seutache braid or with gilt. There is no lace certainly conspicuous, although they are smart.

How long shall I live? There is a question which every man and every woman propounds at least once or but they had closed their ears and twice. It is natural that they should. World's Temperance Lesson, -Isa. 28: 1-13. Commentary.-Explanatory. "The chapter begins with a denunciation of the approaching ruin of the Israelites by Shalmaneser, whose power is compared to a tempest or flood, and his keenness to the eagerness with which one plucks and swallows the grape that is soonest ripe. It then turns to the two tribes of Judah and Benjamin, who were to continue a kingdom after the captivity of their brethren, and gives first a favorable prediction of their affairs under Hezekiah, but soon changes to reproofs and threaterings for their intemperance and profaneness. He assured them that there was only one method under heaven whereby they could be saved: that every other vain resource would

Notwithstanding these blessings promised. yet because they have sinned similar to Ephraim, they must endure

similar punishments. Intemperance has been a vice of the human family through all time and probably among all people. We are informed by a person of wide research, that every race in the world has its intoxicating drink. While we cannot verify this statement by recognized historical authority, so far as we are familiar with the races of men, ancient and modern, we are forced to believe that the statement is true. This universal desire for, or disposition to drink intoxicating liquor, must spring from an evil heart, which

is common to all meu. We will not stop here to discuss what per cent. of the world's population do now indulge in ardent spirits, but call attention to auother factor that enters into the problem, namely, environment. How many of our staunch temperance people would be such, had their surroundings and associations been like those of some of their drink-

ing neighbors. Let us thank God if we have escaped this terrible monster, drink, and be ready always to extend a helping hand to our unfortunate brothers and sisters who have fallen victims to its power. Every Christian and every lover of his race should array himself on the side of temperance. The curse is to be fought in every land.
