It is therefore the duty of every sensible man to keep the blood as pure and normal as possible. Nature, in its infinite wisdom, has given us a thermometer indicating the state of the blood, which appeals to our reason, by giving notice of its impurity. Small eruptions of the skin, to which we scarcely pay any attenears, lassitude, sleeplessness, are generally a sign that the blood is not in its normal state, but is filled if more attention were paid to those known, and the human body would become stronger and healthler. Attention therefore should be paid to those warning signs, and the blood can be purified and poisonous substances removed from it by the use of Dr. August Koenig's Hamburg Drops, discovered more than 60 years ago.
