> er to all parts of the face. In brief, whoever makes these faces will be blessed with features that are full of vitality and the power of constant attraction, because everybody likes to see a human being who is the picture of health.

Exercise 1 .- For developing the muscles of the neck and the upper part of the breast there is no better exercise. Among the muscles affected are those which join the face at each side of the lips and from there spread over the front of the neck and clear across the breast. Therefore, whenever this exercise is executed the whole chest is raised up considerably. It also removes wrinkles from the forehead and around the eyes and makes the lips stronger and more pliable.

To do this exercise first open the mouth, draw down the corners, and wrinkle up the forehead, all as much draw the lower lip and adjacent muscles up toward the nose. Try to make the lip touch the tip of the

Bring all the muscles around the as possible. Then, holding this position, put the jaws firmly together and hold until weariness comes. It is better to do this and al! the other exercises gently at first, increasing the tension and energy with practice. In this way possible rupture of small facial blood vessels will be made impossible.

Exercise II .- This, the opposite of the former exercise, pulls up the lower part of the face and draws down the muscles above the eyes. By stretching the chin muscles it takes away double and fills out hatchet chins. By concentrating numerous muscles around the eyes, it broadens noses that are too thin between the eyes and fills out sunken eyes

and takes away puffs. Starting with the mouth shut, thrust out the lower jaw as far as possible, and, while holding it there, shut eyes as close together as you possibly can. Then try to open the

PRACTICAL SURVEY. Athens. This was one of the most noted cities of the world. Of great antiquity she was famous for her learning, her scholarship and for the number and magnificence of her public buildings. No city could boast scholars, poets, philosophers, statesmen and warriors. She was justly regarded as the literary centre of the world, and such was her dominating influence in this respect that the Greek language became almost exclusively the literary language of the world.

Paul. In the providence of God and at such a time as this, the apostle Paul came to this city. He had been driven by bitter persecutions first out of Thessalonica and then out of Berea. It seems from the account given us that he had no special design or object in going to Athens maining at Berea. His indignation. Paul himself was

an educated man, and no doubt a profound scholar. In such a city as Athens he would find very many conditions that would naturally attract and interest him. The very atmosphere would have an influence on such a man, and the tendency would be to enter into that part of its enjoyment which would not violate

His missionary spirit. This showed itself at once to be the mainspring of his life. He cannot wait for a suitable time, Now is his time. He can not wait for opportunities, - he creates them. He evidently first began with the Jews. They were always the enemies of Jesus, but they were God's chosen people and salvation must first be offered to them. They were also opposed to the idol-

atry practised in that city. His tact and prudence. Paul was a most intrepid missionary, and knew no 'ear of danger in his zeal for souls. His account of what he suffered, shows this. He had been beaten, stoned and shipwrecked. He had been in perils from waters, robbers, Jews and heathen; in the city and

Bradstreets on Trade

The demand for spring staples at The domestic woollen mills are very

larger now, and the outlook promises a good expansion of sales over last year when the trade was probably the best in the history of this market.

Little change is noticed in trade conditions at Quesec during the past week from that of the preceding week. Payments, as a rule, are reported satisfactory for this Business at Winnipeg and through

Manitoba generally the past week has shown a fair development in connection with spring lines and at the moment the outlook is for a large increase in the season's turn-

At British Columbia trade centres there has been a fair movement in seasonable lines,

Wholesale trade at Hamilton this week has been quite active. Large shipments of spring goods are being made and orders coming forward from travellers make it look as if activity in this direction would be marked for some weeks, The conditions of trade are healthy and payments have been very fair lately for this period of the season. Values of staple goods continue

In London there has been a good demand from the retailers, who are looking forward to a good increase in the sales of spring goods and who desire to be well prepared for
