## DANGEROUS

## Scarlet Fever Prevalent in Virulent Form.

## NEW REGULATIONS PASSED

at Six Weeks by Provincial Board of Health-The Death Rate-Tuber. culosis Regulations.

Toronto report - The quarterly Health was held in Dr. Bryce's office yesterday, and will continue to-day. smallpox existed in Ontario in a way. more virulent form than usual.

During January there were ten deaths from smailpox. The complaint tors agree that it is far removed was made that there was not a muni- from the genuine Parisian la grippe foreing the vaccination law. Secretary Bryce announced that he had a bill which he would present later. amending the Vaccination Act, and making it more workable.

The scarlet fever returns made to the board showed that the death rate in 1902 was 9 per cent. In Toronto during the last six months of 1902 there had been 701 cases and 88 deaths, while in January, 1903, there had been 106 cases and 21 deaths.

Reports were also presented, showing that good results were obtained from vaccination in ameliorating and preventing the spread of smallpox.

New Scarlet Fever Regulations. The board passed several important regulations in connection with scarlet fever. It was decided to place it on the same footing as smallpox and diphtheria, and to this end the following rules were passed, and an Order-in-Council will be applied for confirming them :

That isolation hospitals be established, and that all cases must be removed there.

That medical health officers, when informed of cases, shall immediately isolate them and quarantine all exposed persons, either at home or some place of detention.

Persons who have not had the disease, but have come in contact with it, shall not leave their premises until the period of incubation is past. If medical health officers permit

persons to keep cases in their own houses, they must be quarantined. The maximum period of incubation Is limited to a week, and the minimum period of isolation is six weeks. When scarlet fever occurs in a school, a medical examination of all exposed persons, whether in the classroom or at home, shall be held daily,

until the period of incubation Death Rate 12 per 1,000.

Dr. Vaux, the Chairman of the board, in his annual report stated that during 1902 there had been no epidemic of a formidable character. Buring the year the total deaths, based on 90 per cent. of the population, were 25,208, an average of about 12 per 1.000. There had been a mortality from tuberculosis of 2, 164; diphtheria, 441; typhoid fever, 363; scarlet fever, 282; whooping

cough, 144; measles, 106. The Chairman said he had received a number of reports urging in the ease of tuberculosis, compulsory noti-Sication, Isolation, disinfection of rooms lately occupied by consumptives, disinfection of sputum, and generally strict attention to well recognized hygienic measures for the pre- Parliament, says he hopes to bring wention of contagion, and at the same | the Alaskan question before Farliatime that care be taken that public | ment and to insist upon the duty of antagonism was not aroused by too | the Government never to yield to the radical measures being adopted.

## IN REPLY TO BAER.

## Questions Figures and Promises to Force Union's Point.

Philadelphia, Pa., Feb. 16.-After is run by the labor of these childthe close of Baer's address to the Strike Commission, Mr. Darrow began for the Union Miners. After a review, of the strike he said: "I shall apologize for hone of the mistakes of the men, but I do say it does not come with grace from their accusers to call them criminals."

Mr. Darrow, went on to tell of the operators refusing to give the men more money, and said:

"You can do just as you please about recognizing the union. If you do not recognize it, it is because you are blind and you want to bump against it some more; that is all. It is here to stay, and the burden is on you and not upon us. There is neither the power nor the disposition in this court, I take it, to destroy the union. And if these agents of the Almighty cannot see the union, they had better blunder along still a few more years, and possibly after a while they will know it is here and recognize it 'chemselves.I' Passing to the wage statements handed to the commission, Mr. Dar-

row, said the operators have been deceived by their own accountants. "If, at the end of all this time and labor, he is willing to give us 5 or 10 per cent. upon the ligures that he says correctly represent our earnings," Mr. Darrow said, "we ! will be very glad, indeed, to take it. From the beginning of this strike until the end, whatever you may say about whether the miners knew what they were getting or ity for the coal famine, he said, restnot, these operators have never given out a correct figure or made a for the strike. If the men struck statement that would stand the without just reason then they were when they talked to the public.
