

TWO GIRLS COMPOSITIONS.

The following compositions were written by two little girls of the Echelman quarter, who owe their English to the New York public schools. They were furnished to this paper by Edwin White Gaillard, librarian of the Webster Free Circulating Library, at the East Side Settlement, 76th street and East River.

God made the first person that was a man this man wants a lady so when he went to sleep he cut out a rib and made a lady. There were a lot of fruit trees and one was an apple tree.

God said they may eat all the fruit but not the apple tree, and those two people were forbidden not to eat the apples on the tree and Eve took some of the apples and gave them to Adam and he ate them and they stayed down his throat.

God said that some one has been eaten the apples Adam said that Eve gave it to him, and those two people were had to work for their own living.

God made Adam he was fast asleep when God took the rib bone and made a woman. The woman's name was Eve she was Adam's wife. God said they should go to the garden and get all the fruit they wanted but do not touch the apple plant so Eve took one of the apples and gave it to Adam. He ate it and she ate it and they stayed down his throat.

God said that some one has been eaten the apples Adam said that Eve gave it to him, and those two people were had to work for their own living.

God made Adam he was fast asleep when God took the rib bone and made a woman. The woman's name was Eve she was Adam's wife. God said they should go to the garden and get all the fruit they wanted but do not touch the apple plant so Eve took one of the apples and gave it to Adam. He ate it and she ate it and they stayed down his throat.

WIRELESS TELEGRAPHY.

(Harper's Weekly). On the horizon are signs of war, a very up-to-date sort of war, a war for right of way in the ether.

The amazing success of Signor Marconi, in crossing the Atlantic, has stirred up a host of rivals, and between this country and Europe there are now a dozen or twenty systems struggling for precedence. And the lawsuits have begun. In this country the de Forest company is suing the Marconi company for a million dollars' damage for certain statements said to have issued from the Marconi company. The latter replies by a suit for infringement against the de Forest company, asking the latter company to remove itself from the ether. It is to be noted that if the Marconi Company's claims are upheld, this will raise hob with any system employing the coherer principle as a receiver of the messages. The de Forest receiver operates on an exactly opposite principle, however, and there seems little likelihood that it will be shut out.

In Germany the Slay-Arco and the Braun systems have had a clash, with a recent victory for the latter, that it does not infringe the Slay-Arco device. In France the Government has practically confiscated wireless telegraphy, so that the stock-brokers there have not had much of a chance. Italy, proud of its native genius, seems to have taken up with Marconi, and the English Government has also equipped many of its war-ships with Marconi instruments. In America the lead in this line seems to have been secured by the de Forest system, both the War Department and the Navy having, after competitive trials, given the contracts to the latter company.

But by far the most interesting point is the question of transoceanic signalling. Marconi's recent messages across the Atlantic were secured by means of what he calls a magnetic detector. For long-distance work, the old coherers broke down. This magnetic detector, which seems to be far more sensitive than any form of coherer, is the invention of Professor Rutherford, of Toronto, and was exhibited as far back as 1897. It seems to have been taken up independently by Sir Oliver Lodge, in England; by Marconi, and by Professor R. A. Fessenden, of Washington. Their patent applications, now pending, are in interference. It is said, however, that Professor Fessenden offers proof of his invention, or improvements, a year in advance of Marconi's application. If this is true, and Fessenden wins, the Marconi company can do business across the Atlantic only with Professor Fessenden's permission, so far, to other forms of receiver has been shown capable of taking signals over such a distance.

At present the practical difference between all the different "systems" is that of the question of the receiver. But Professor Ferdinand Braun, of Strassburg, Germany, announced last week that he had found a new method of sending the electric waves, in any desired volume, and directed to a given point of the compass. These are very broad claims, and further details are being awaited by scientific men with the deepest interest. Prof. Papin, of Columbia, credits Prof. Braun with having done the most valuable work in wireless telegraphy after Marconi. Anything he has to say, therefore, will be respectfully listened to. The sparking method of producing the electric waves does seem a rather crude device, and we may hear any day of a new method which would quite revolutionize wireless.

Meanwhile, what is going to happen when a dozen different systems are shooting up poles and bombarding space with electric waves? It cannot be seen but the most hopeless confusion. There can be no monopoly in wireless telegraphy. This is settled. The field is free to all comers. Anybody with a common alternating dynamo or an induction coil can set up for business, or to upset somebody else's business. Tuning, or syntony, is no doubt possible, but within limits, but at present these limits are vague. With any extensive use of wireless, there is bound to be a mixing-up and a jangle.

What will the lawyers do? Nobody knows much about the ether, and nobody less than they. They are asking the legislatures for wireless franchises? So far as anyone can see now, that is the only thing that can make wireless telegraph a practical business proposition. The alternative is that the Government should take it over, as France has already done.

Humorous Points. "I see they are going to put the American flag on the postage stamps," remarked the man from Maine. "Ha!" hissed the dark-skinned foreigner. "The American flag that the flag never been licked. Anybody lick it now." The man from Maine stood deep in thought. "That may be," he drawled finally, "but you'll hev to get behind its back to do it."—Chicago News.

Consumption

Salt pork is a famous old-fashioned remedy for consumption. "Eat plenty of pork," was the advice to the consumptive 50 and 100 years ago.

Salt pork is good if a man can stomach it. The idea behind it is that fat is the food the consumptive needs most.

Scott's Emulsion is the modern method of feeding fat to the consumptive. Pork is too rough for sensitive stomachs. Scott's Emulsion is the most refined of fats, especially prepared for easy digestion.

Feeding him fat in this way, which is often the only way, is half the battle, but Scott's Emulsion does more than that. There is something about the combination of cod liver oil and hypophosphites in Scott's Emulsion that puts new life into the weak parts and has a special action on the diseased lungs.

Image of a fisherman carrying a large fish on his back, the trademark for Scott's Emulsion.

A sample will be sent free upon request. Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy. SCOTT & BOWNE, CHEMISTS, Toronto, Ontario, Can. and \$1; all druggists.

Generous. Chicago Post. "If I could only get a bite to eat," he whined. "Why don't you work?" she asked. "Nothin' doin' in my line," he answered. "I'm a dime museum glass-catcher, an' they're gettin' too common."

ONE SPOONFUL Will build for you good health, through good nerves, by using South American Nerve. Almost all disease is the result of poor nerve action. Without good nerves neither brain, nor stomach, nor liver, nor heart, nor kidneys, can work well. Nerve food must be such that it will be absorbed by the nerve ends. Such a food is South American Nerve, the greatest tonic known, a cure for dyspepsia and all stomach ailments.

ADOLPH LE BODIE, E. C. L., Montreal, well known banker, writes: "I was suffering from insomnia and nervous debility, prostration and exhaustion. I took five bottles of South American Nerve, and an wholly recovered."

The Great South American Rheumatic Cure is the only one that has not a single drop of failure in its record. Cure sure within three days; relief instantly.

What Happened. "She married the coachman because she wanted someone who could drive." "Well?" "Well, he drove her to distraction."

Minard's Liniment Cures Colds, etc. A newly married man in Dubuque, Ia., has been arrested for stealing a baby carriage. The moral is that one should not look too far in the future. For years I had suffered with impure blood, and no remedies I used gave any relief, until I took Dr. August Koenig's Hamburg Drops, which completely cured me.—August Rettemeyer, 1509 Millman street, Baltimore, Md.

CLEARING THE WINE.

Impurities Removed by a New Application of Refrigeration. Certain improvements have been introduced in champagne manufacture, says the Scientific American.

As is well known, the wine is bottled and placed in racks in an inclined position. The idea being to cause all the impurities in the wine to reach the cork. The old cork is finally removed at a certain stage of the process in order that the final liquoring and corking may be done. Formerly it was the universal practice in the momentary removal of the cork to allow the deposit to be sprayed out by the pressure of the contents of the bottle to remove the substance, which would be cloudy, and damage the wine. Of late years an ingenious freezing machine has been introduced to freeze solid a thin wedge next the cork of just the needed thickness to remove all that need not remain. This reduces the waste of wine considerably.

Minard's Liniment Cures Diphtheria. The new minister of a small town in Inverness-shire was walking home from morning service recently when he chanced to overtake one of the parishioners, an old shoemaker. "Good morning, Mr. Bain," said the minister. "How is it your good wife is not out to-day?" "She's no' but poorly," was the reply. "It's nae wick of sleep she's had for the last three nights."

The minister was sorry to hear such a poor account of Mrs. Bain's health, and expressed a wish for a speedy improvement. "I'm thinking if she could get a good sleep," said the shoemaker, "she'd soon be on the mend. My wife ye're passing the house to-morrow ye'll no object to ca' in an' just give her frae 'lasty' to the end of your discourse this morning. I'm no' saying it wad be very helpful."—Scottish American.

Minard's Liniment Cures Garglet in Cows. Do Johnny Justice. Omaha Bee. "Johnny" said his mother, severely, "somebody has taken a big piece of ginger cake out of the pantry."

Johnny blushed guiltily. "Oh, Johnny," she exclaimed; "I think it was in you." "It ain't," replied Johnny; "part of it's in Elsie."

We believe MINARD'S LINIMENT is the best. Matthias Foley, Oil City, Ont. Chas. Snow, Norway, Me. Chas. Whooten, Mulgrave, N. S. Rev. R. O. Armstrong, Mulgrave, N. S. Pierre Landry, son, Pokenouche, N. B. Thomas Wasson, Sheffield, N. B.

Floating Fun. Nell—There is nothing more delightful in the knowledge that a man is in love with the pantry. Bess—Oh, I don't know. What's the matter with the knowledge that two or three men are in love with you?—Chicago News.

Doctor—How was it that you didn't hear the cyclone coming? Victim—Why, you see, my wife had a sewing society meeting in the parlor at the time.—Chicago News.

He (at the piano)—And what air do you prefer? She—Well, if you give me one choice, I'll take a millionaire.—Baltimore News.

Mr. Bacon—When all the fools are dead I don't want to be alive. Mrs. Bacon—Well, don't worry; you won't be.—Yonkers Statesman.

"I say, my, you know dat dose of cod liver oil you said I had to take?" "Yes." "Well, go on an' gimme it. De fellows have made up a purse of a dollar ter watch me take it."—St. Louis Star.

Where to Get Hid of It. Chicago Record Herald. "It is a great mistake," said the son of the multi-millionaire, addressing his Bible class, "to suppose that money brings happiness. Wealth imposes many heavy obligations. The rich man has a burden to bear that is often crushing in its terrible."

"Parson me" interrupted a member of the class. "If you desire a pointer, I know of a broker around the corner who makes a specialty of mining stocks."

Monkey Brand Soap makes copper like gold, tin like silver, crockery like marble, and windows like crystal.

Conditions of Success. The conditions of eminent success are inexorably hard; only a few will make the sacrifice. First—One must believe his adopted vocation is for life, and he must work like a gladiator. Patient, untiring industry always receives its reward. Second—To be a "social man" and a lover of pleasure is fatal to success. Third—Only such recreation as is necessary to preserve health is permissible. Fourth—Intemperance and excesses of all kinds are barred out. Fifth—It is mandatory to rise early, with a clear brain, refreshed by necessary rest. Morning is the best time to work, as the proverbs in all languages testify. Sixth—If occasion demands it, one must face the strictest economy in diet, dress and all home surroundings.

It's the "Man" Not the Whiskey. Sydney Post. Whiskey is blamed for more than it is guilty of. It has wrecked and ruined many lives and homes, and why? Simply because certain individuals had not sufficient common sense to leave it alone. Whiskey is 'o'ntimes made an excuse for crime when it is not the real cause.

"Pure soap!" You've heard the words. In Sunlight Soap you have the fact.

SUNLIGHT SOAP REDUCES EXPENSE. Ask for the Octagon Bar.

FLANNEL SHOULD BE WORN.

This Fabric Much More Healthful Than Other Woollens. Instinctively felt to be better fulfilled by woolen than by linen or cotton fabrics. Hence the very general use of flannel garments by athletes and by members of cricket, boating and other sporting clubs, who are called upon to engage in vigorous physical exercise likely to cause profuse perspiration.

As formerly worn, woolen fabrics were objectionable to many, because they irritated the skin and caused discomfort by preventing the proper escape of its excretions. Moreover, they were, as a rule, so heavy as to be intolerable for summer wear. These objectionable features have now been removed, and to make woolen clothing truly sanitary and suitable for all seasons, the usual process of weaving woolen fabrics has been materially modified by adopting a method which produces a much less closely woven texture than the ordinary flannel.

The feeling is instinctive, too, that woolen clothing is hot in warm weather; that if we wear wool in winter to keep us warm we must wear something different in summer to keep us cool, or be inconsistent in theory and practice. But this is a mistake.

It is obvious to all how a non-conductor of heat—a woolen garment, for instance—prevents the escape of the heat of the body to a colder atmosphere, or the ingress of heat to the body from a warmer atmosphere; a familiar illustration of which is found in the practice of wrapping ourselves in blankets to keep us warm and of wrapping ice in a blanket to keep it cool. To keep the heat in one case and not in the other, it may not be so easy to understand why we should clothe a warm body in a blanket to cool it off, or keep it cool when the temperature of the surrounding air is in or near equilibrium with it.

The explanation lies in the nature and condition of the body, the woolen fabric's two-fold property of non-conductivity to heat and permeability to moisture, and the evaporation of the moisture at the fabric's outer surface. This evaporation disperses the heat, thus lowering the temperature. This is the reason the soldier keeps his woolen covered canteen wet in hot weather. A wet woolen garment disperses the surplus heat and leaves the body cool.—Harvard Times.

New York and Boston Via New York Central. The numerous trains, the excellent service, the uniformity of its trains, its four tracks in Boston and New York, make the New York Central the favorite line to those points. An Ar. ticket agent will confirm the above.

Completed the Text. Apropos of mottoes on houses, a correspondent of the Westminster Gazette relates that a man in Scotland wished to have cut over the door of a new house the motto: "My house shall be called a house of prayer." He left the workmen to carry out his wishes during his absence, and on his return his horror was great to find the quotation completed: "But ye have made it a den of thieves." "We had a wee thing mair room, ye see, so we just put in the end o' the verse," was the explanation given by the Bible-loving Scot.

Settlers' Low Rates West. Via Chicago and Northwestern Ry. every day from February 15th to April 30th. Colonist one way second-class tickets at extremely low rates from stations in Ontario and Quebec, to points in Colorado, Utah, Montana, Nevada, Idaho, Oregon, Washington and California; also to Victoria, Vancouver, New Westminster, Nelson, Rossland, etc. Full particulars, rates and folders can be obtained from B. H. Bennett, General Agent, 2 East King street, Toronto, Ont.

Pity the Poor Coal Man. Exchange. Biobus—Here's a story about a coal dealer being arrested for fraud. Sibbes—Well, the weight of the transgressor is hard.

40th Anniversary For over Forty Years Gray's Syrup of Red Spruce Gum AS A SPECIFIC FOR COUGHS, COLDS, ETC. Has been tested and has become the Family Cough Specific of thousands throughout Canada and the United States. It never was more popular nor more largely used than it is to-day. MERIT ALWAYS TELLS. Cough Remedies come and go. New preparations are tried and abandoned, but the old reliable remains. The present is a trying season for both old and young, and colds, easily caught now are apt to remain in the winter, unless promptly cured. No better remedy can be found than Gray's Syrup. Gray's Syrup SOLD BY ALL DRUGGISTS.

ISSUE NO. 9, 1903.

Mrs. Winslow's soothing Syrup should always be in the home. It soothes the child, softens the gums, cures wind and colic and is the best remedy for Diarrhoea.

FAIRM FOR SALE A FARM OF 217 ACRES—136 IMPROVED buildings; well watered; convenient to school and churches; 1 1/2 miles to station; low price; terms favorable. Wm. G. Mackay, Port Huron, Mich.

SALE—FAIRM, 40 ACRES RICH LAND with good buildings; price \$1,450; easy terms; possession at once; catalogue free. Clark & Son, Dover, Delaware, U.S.A.

AGENTS WANTED WANTED—MAN OR WOMAN TO REPRESENT my selling lamp that makes its own light. Cheapest scientific discovery; develops heat, light and power from the sun day or night without fire, fuel or expense. In actual operation; hundreds of references. Solar Furnace Co., Denver, Colorado.

WANTED—Energetic men, nursery stock salesmen preferred, correspondence immediately with STEPHENS, VIEL & HAMS, DEN, TORONTO, CANADA.

LOST, STRAYED OR STOLEN—FROM my premises at Levedoch, Norfolk county, about November 20th, a large dark brown, almost black, Indian pony; scars on hind leg from being fired for several years. Person giving information as to his whereabouts or delivering him to John Charlton or myself at Levedoch, will be suitably rewarded. Write or telegraph to W. A. Charlton, Levedoch.

Butter, New Laid Eggs and Poultry Wanted Consignments of Butter, Poultry and new laid Eggs solicited. Prices firm for choice quality. Choice young chickens, dry picked, etc., selling 60 to 80c per pair. Will pay 30c per lb. for BEES' EYES delivered Toronto. Correspondence solicited.

JOHN J. FEE, 62 Front Street East, Toronto USE 1,000 MILE AXLE GREASE It Has No Equal Manufactured only by The Campbell M'g. Co., of Hamilton, Ontario, Canada.

For sale by all leading druggists.

ST. JACOBS OIL POSITIVELY CURES Rheumatism Neuralgia Backache Headache Feetache All Bodily Aches AND CONQUERS PAIN.

Blood will tell When an animal is all run down, has a rough coat and a tight hide, anyone knows that his blood is out of order. To keep an animal economically he must be in good health. DICK'S BLOOD PURIFIER is a necessity where the best results from feeding would be obtained. It tones up the system, rid's the stomach of bots, worms and other parasites that suck the life blood away. Nothing like Dick's powder for a run down horse. 50 cents a package. Leeming, Miles & Co., Agents, MONTREAL.

An Old Maid's Philosophy. We may be better after suffering, and we may be worse; but our conditions must depend upon ourselves, and should never be laid to the nature of our calamities. The fountains of the eternally virgin spring are in every human heart and keep the world of new emotions perennially fresh and beautiful; and to each of us is given the right not only to possess them, but the obligation to cherish them. The only sorrow worth anything in this world is sorrow for others, and sorrow for others means helping others, not hugging our woes to ourselves. For I believe that the really brave and the really great make us forget their scars, all the records of their hurts and wounds. To me it had seemed.....that those who occupied centres of affection should be less concerned with what came to them as their due, than with what went out from them as their obligation; that, like the sun itself, they should be centers of centrifugal forces, radiating, through the very fulness of their joy, light and gladness to other lives.—From 'My Old Man's Corner,' The Century, June, 1902.

HE CAN SLE AND W

What Todd's Kidney Pills do for Emilian Cured Him of Pain in Headache and Strong Azzain. Val Raci, Que, P. Among those in this who openly proclaim they received from Kidney Pills in Emilian Coudre was long a that most trying of in the back, that the violence the disquiet that it is one of the of Kidney Disease.

Now M. Coudre is able to do a good night's joy a good night's viewed regarding the "I am not able to than pray, new Dodd's Kidney Pills I am cured, I work go up to bed I used Dodd's Kidney Pills more fatigued the fore. I had pain in headache which both took me to bed and I am cured. I pray who speak to me about Others suffering from aches resulting from pain have followed vice and used Dodd's Kidney Pills and found the truth of the oft repeated "There is no form of ailment that Dodd's Pills not cure."
