Little Jim's Triumph.

James, four years old, has been naughty to the point of evoking a whipping from his long-suffering mother, and all day long a desire for revenge rankled in his little bosom. At length bedtime came, and, kneeling refore her, he implored a blessing for each member of the family individually, she alone being conspicuons by her absence. Then, rising from his devout posture, the little suppliant fixed a keenly triumphant look upon her face, saying, as he turned to climb into bed: "I s'pose you noticed you wasn't in it."-Harper's Magazine.

Twenty urns, containing calcined human bones, have been unearthed at Sunningdale. near Camerley. A mound was being removed in the construction of golf links, when three urns were discovered. Under the direction of Mr. A. C. Shrubsole, F. G. S., curator of the Geological and Anthropological Department of the Reading Museum, a further search was made, and seventeen more were brought to light. It is believed by competent authorities that the mound was the site of ar ancient crematorium-probably a battleground-in pre-Roman days. Some of the urns are one foot four inches in diameter. They are of ancient British make, and may safely be ascribed to the time before Britain came under the Roman influ-It is estimated that the burials must have taken place between 2,000 and 6,000 years ago. The fact is that not a few women derive a good income by permitting the use of their names-frequently accompanied by their portraits among the testimonials of the efficacy of the drugs.
