started the slide.

Experts Ridicute Earthquake Theory The Government experts declare to the contrary, and ridicule the idea of an earthquake; but it is hard to convince the people of Frank that such was not the case. However, the problem is an intricate one, which can certainly wait for a finding.

The list of dead and injured is not complete as yet, as some of the families lost had visitors staying with them, but is given as eighty-three killed, including two unknown Welshmen and about ten unknown Finns. Nine were injured, including J. Barrington, fractured thigh; Mrs. Watkins, Fred. Watkins; Dan McKenzie, internal injuries; Sam Innis and family, bruises.

Limestone May Have Burst.

There are many theories as to the cause of the slide. Some declare that there was an eruption and that it shook the mountain sufficiently to start the rocks; others declare that the quality of the rock being almost pure lime, the great heat of the last week caused the snow to melt, and that the water worked its way down into the lime, and slacked it, | erloo, aged 94 years. thus causing the start. Again, there are some who hold to the gas theory stories of the slide.

In the house of Sam Innes were quietly sleeping Innes, his wife and three children. The house was overturned three times, and yet the occupants were practically uninjured. Alex. Graham, laborer, and wife. This was the only house caught in the slide in which the occupants survived. The stables of the Canada-American Coal & Coke Company held

Demolished Everything.

In its sweep the great slide, if slide it was, or upheaval, if that be the more proper characterization, demolished and carried away the entire pany; the tipple, boiler and engine house, electric light plant, railway scales, shops and a row of coke ovens destroyed, seven houses owned by the coal company, burying six of them, with most of their occupants, and likewise burying ten other habitations situated in the valley of the town, together with every soul within them. Bodies Buried Forever.

The family of the two Grahams, whose homes were separated by a mile, and the employees of Poupore & McVeigh, whose cabin was a mile further east, were buried fully a hundred feet deep, and none of the bodies can ever be recovered. In fact, it is doubtful if many of the bodies of the dead are ever recovered.

A citizens' meeting was held early yesterday, and steps were taken to search the ruins for bodies, but only seven bodies had been found up to last evening. Most of the bodies recovered were mangled so badly that identification was impossible.
