HOW IT FEELS TO BE STARVING TO DEATH

(New York Sun.) Men who have actually been on the

point of starvation, whether in the streets of a big city, in the jungles of South America, in an open boat at sea, or on the sandy deserts of Australia, give divergent accounts of their feelings.

Their stories go to prove that different men feel starvation in different ways. Some suffer intensely ; others hardly at all. Some feel acute physical pain, while the sufferings of others appear to be purely mental. A sailor whose schooner was

wrecked on a voyage from the Cayman Islands to Jamaica a few years ago, and spent nearly two weeks in an open boat without food, was asked how he felt during that time. "I hardly felt at all after the first two days,' he said. "I seemed to outgrow the longing for food, and I do

not remember suffering any particular pain. "I drifted along in a dreamy sort picked me up I was not wildly ex- velled man might think of India. cited. I was too faint to worry.

greatly care for smoking."

salary in New York had a hard time cowed. If a man spoke to me I tremwhen he first came to this city, and bled and could not answer, but nearly starved. For days and weeks slunk away. Every bit of moral young women in the girls issue of fore to exert herself to make both meal, and, by his own account, he pluck was gone." suffered tortures.

Skirts Well Cut.

There is hardly anything so important in dress as the cut of the Judicious Pedestrianism is the Best skirts, and here are some hints which will let you into the secret of the new ones; In the first place, even the so-called long gowns are shorter both back and front. A four-inch slope is the right thing, and they nearly all have the yoke piece, which requires the most careful fitting. This renders the skirt impossible for the home dressmaker. Many of the skirts have a pointed yoke back and front, and almost all are infinitesimally tucked and gathered, a perfect maze of elaboration. It is a necessity that they be perfeetly plain about the hips, but from -Wash. Star.

WALK AND RETAIN HEALTH

Exercise for All Classes.

Walking is the simplest, and most natural and the most wholesome of all exercises. No athlete ever trains for a contest, no matter what its nature may be, without walking a considerable distance in the open air each day. Many keep in vigorous health by this alone, and no matter what other exercise you take you must walk. But, first of all, learn how to walk. A great many people walk in an aimless, shuffling manner and secure but little benefit from the exercise. In walking for exercise that point they flare in the sauci- the effect is better if the kind is est fashion, some measuring quite directed toward some pleasurable five and a half yards at the hem. end. Walk with consciously directed movement until you have brought every muscle under perfect control of your will. Moping along in an Cook's Cotton Root Compound. aimless, lackadaisical manner does little good physically and harms one

DEARLY LOVE THEIR EASE.

Aversion to Work of Any Sort.

The peon, or peasant, of Mexico is probably the laziest mortal under the sun. He seldom leaves his home and buly under the most extraordinary circumstances can he be induced to perform any labor. It is very difficult to induce one to go to a part of the republic where labor is scarce and wages double that of his own district. Large contractors have secure labor. They often go and engage a whole village of peasantry from the interior and move them all scene of their labors. The welathy this expedient to secure laborers to work his land or attend to his cattle. For this same reason every ranch of large dimensions in Mexico has several small villages upon it which consist wholly of people and their families employed upon the

As the Mexican peasant is careless about money matters, so he is careless about everything he does. Very rarely has he any interest in his work, and so, it is usually very badly done. He cannot understand why anyone should want to hurry or to do more than he actually has to do. If you leave him alone and expect him to work in your absence there are ninety-nine chances out of 100 that you will be mistaken. In all probability he will sit down and patlently, wait for your return, and smoke the inevitable cigar to pass away the time.

As the peasant is with his work, so he is with his family and his home. In most cases, though he loves them in his own way, he takes no of thought of them. The wife has there-
