HOW BERING DIED

True Story of Last of the Great Explorers of the North.

In the June number of Harper's Magazine Collins Shackelford tells the true story of the fatal expedition of the explorer Bering, from whom Munyon's Liver Remedy. Bering Straits are named. Here is his account of the adventurer's death after the loss of his ship:

"Bering, who had been for some time totally disabled, was brought ashore on a hand barrow in a boat and placed in a sheltering hollow, where his still faithful men-a mere the sand. Even then he was dying. His great age, and the hardships he had undergone on the voyage made his struggle for tife hopeless. "His slow passing away was pathetie and pitiful. In effect, he partially

buried himself alive. He lay under the shelter of a tent made from an old sail. Long suffering had made him childish and petulant. Each day and all day his weakening hands were constantly busied scraping down upon his body, beginning at his feet, the sand from the ridges on either

GIANTS IN THOSE DAYS.

Notable Examples in Egypt of Great Engineering Feats.

In Egypt are to be found the largest monuments in the world, and probably will be for all time.

It is not likely, says Engineering, that we shall again see a building with seven million tons of stone in it, as has the pyramid of Gizeh, and it will be long before we have an irrigation reservoir of greater capacity than Lake Moeris, which held 11,800 million tons of water between high and low water marks. What the Labyrinth was like we do not really know, but Herodotus
