DEAD BUG

COMBINED BUG KILLER AND POTATO GROWER

Is going to take the place of Paris Green because it kills the bugs and makes the potatoes grow instead of killing the plant as Paris Green does--if you get too much on. We want every potato grower to try it whether a large grower or small but we know you do not like to experiment so we reprint the Misses Jemima and Maggie Stothart. guarantee given by the manufacturers :

"We hereby guarantee Dead Bug-when properly applied-to kill the bugs and increase the yield of potatoes and we further agree that if you plant one acre of potatoes using Dead Bug on one half and Paris Green on the other, if you don't get more potatoes from the half where Dead Bug is used-providing of course that soil is the same,-we will refund the money paid for Dead Bug."

We are agents for Dead Bug. It is cheaper than Paris Green but we can furnish Paris Green at lowest market price.
