THE SERVIAN MASSACRE

The Shocking Truth About the Blackest of Crime.

("Ivanovich" in Nineteenth Century. Belgrade is less than two days by the Oriental express from Paris, but the psychical state of the French officer is hundreds of years in advance of that of the Servian colonel and lieutenants who tried to clear off by massacre the Obrenovich dynasty. The ultra modern circumstances which accompanied their work render it more revolting. Officers who had studied in the Zurioh Polytechnic School knew how to use dynamite without injury to themselves when they wanted to break in doors massive as those of a church. Those who had been told off to cut the clectric wires communicating with lamps had India-rubber gloves. They searched by the light of composite candles they had brought to their pockets for the hiding-place of the King and Queen. When they discovered the fugitives, some of the officers held high the candles for their comrades to lay on and not spare the unfortunate pair. There was no attempt to resist. All Alexander wanted was "to die with Draga," and this elevated him into the region of romance.; It may herealter furnish a theme to Servian bards. Another modern circumstance makes one's flesh creep. The bodies, flung out of a window, lay on a garden walk until dawn, when a soldier received an order to wash them with a fireman's hydrant, and when they had been cleaned to lay them on the tables of the palace kitchen for dissection. The surgeons had been requisitioned to come there at 5 o'clock. When they ar-
