Let us suppose that Ivan elects to stay in the village and does not aspire to change his condition or that of his sons. He can have them taught to read and write, a little geography, and mathematics in the village school. It is his fault if they do not go. When the sons are old enough to go into the towns to work, Ivan takes care of their land as well as his own; their wives live in his home and are subject to his authority; the sons send a certain sum of money home each month, and if they fail on account of bad habits Ivan can force them to return and work in the fields.

If they are sober and industrious the family community will always have plenty, and the sons can return in their old age with money in the bank, a plot of ground to call their own, and a comfortable cottage. If the sons are numerousand industrious and sober-it may happen, as it often has happened, that the family is able to buy the estate of an impoverished noble and become masters in the place where

His old master, still his friend and counsellor, remonstrates in vain. He will have his vodka; he will have his holidays. When the vodka and the holidays overcome him Ivan is poor. But otherwise he need not be poor-in nine cases out of ten. In winter he has his own wood, and he is never cold-unless he sells the wood for vodka, as he often does. If he cannot get work in town he can always return to the village and his

Supposing Ivan is ambitious for his sons. They can have two years of echooling in the village school and then go to another village for four years more, then into the university or technical school. The only difficulty is that Ivan must pay for the first year of the gymnasium about 75 roubles, besides furnishing board and lodgings. Sweeping as the statement may appear, it is nevertheless true that Ivan will seldom be without the money if he has been as industrious and sober as he should

A Cipher Love Song.

Sime years ago a clever Ameriyoung lady for a cipher that could be easily worked without being too difficult to read, whereupon he penned the following:

[U O a O, but I O U; 0 0 no 0, but 0 0 me; O let not my O a O go, But give O O I O U so.

When the key to this is obtained it lilts like a love song. The secret of it lies in the facts that a naught is a cipher and that it is easy to make this word "sight for" whenever required. It reads phonetically with perfect case, but the written form is perhaps more readily intelligible: You sigh for a cipher, but I sigh

O sigh for no ciphir. That O sigh for you; O let not my cipher for a cipher go, But give sigh for sigh, for I sigh
