### THE TALK OF THE DOMINION.

The decision of the Alaskan Boundary Commission has stirred up an intense interest all over Canada. In one point, however, Canada has outstripped the States, and has made a map of the Canadian firm is the first in America to produce new maps showing the disputed territory and the Commission's award. The Family Herald and Weekly Star of Montreal have been waiting for the decision to go ahead with their new map of the Dominion, which shows the territory in dispute; also the new Grand Trunk Pacific line. New Ontario and in fact everything up-to-date. The publishers' price we believe is \$2.50 per copy, but they have decided to send a copy absolutely Free to all subscribers to that great family weekly for 1904. As each subscriber will also receive two beautiful coloured pictures, each 22x28 inches, along with the Family Herald for a whole year, for one dollar, it will be a surprise if they can handle the business that is sure to come their way. The publishers adopt the rule of sending premiums in the order in which subscriptions reach them so that it will pay to get on their lists without delay. The REVIEW, Weekly Star, and our Illustrated Holiday Number, to Jan. 1, 1905, for only \$1.75.

### HOUSES BURNED IN EGREMENT.

On Saturday evening (near midnight) the two dwellings of Mr. Alex. Raw and his son, con. 3, Egremont, were burned to the ground. The most of the contents also were destroyed, including about \$100 in cash in the father's house, and \$50 in son's. The latter was at a neighbor's when the fire broke out and when he arrived he tried to extinguish the house and was pretty severely burned. The fire is thought to have started from sparks on the roof and it is reported there is no insurance.—Mt. Forest Confederate.

### THE ALASKA SURRENDER.

British papers during the week have shown a pro-Canadianism that might have been useful a little earlier. Perhaps they are trying to soothe us! The Saturday Review speaks of Alverstone's "betrayal" of Canadian interest.

American papers claim that they have got only five-sixths what they wanted. This may lead the American Senate to reject the award, as they usually get six-sixths of what they want from Britain.

Canadian papers are a unit in thinking the award grossly unfair, but are not showing the bitterness one might expect, for, from dear past experience, they were expecting what they got. However there is a lot of deep thinking going on, and the ringing declaration of Premier Laurier on the last day of the session, that an increase of our treaty-making power must be secured from Britain, will be warmly supported.

This declaration has at last caused Britain to "sit up," and Chamberlain's propaganda bids fair to be eclipsed for a time by the attention that will be given to colonial connection arising from the pregnant words of the Canadian premier.

The correspondence between the two governments is to be made public, no matter who objects. From the tone of the announcement there seems to be an expectation that Britain will object, so that one is justified in thinking, some humiliating proposals have been made.

### RECORD OF THE SESSION.

The third session of the ninth Parliament has at last closed with the record of being longer than any of its predecessors having lasted from March 12th, about 7 1/2 months. The 1901 and 1902 sessions were each about 3 months only, so that this year faithful members of the Commons have earned their indemnity of \$1500. Another session is to be held and promised to be a short one, but no doubt patriotic members will see that it extends to 31 days, for if the session does not exceed 30 days a per diem allowance takes the place of indemnity.

This Session will be chiefly remembered for the discussion surrounding legislation for the building of the new Railway, which marks an advance in Railway Legislation since there is not to be a dollar of subsidy in cash or lands, and provision is made for running rights by other lines. By this great measure Canada will gain immensely in the opening up of great productive areas giving room for the immense immigration that is being attracted to our country.

Other important measures are the appointment of a Railway Commission which is intended to safeguard the public in their dealings with big corporations; the redistribution bill (if you oppose the government call gerrymander,) which received wonderfully little hostile criticism, an evidence of its fairness, for, for the first time, a committee, composed of members of both parties made the changes, the guiding principle being county boundaries; the surtax of an extra one-third of duty on German goods, because Germany punished us for granting a preference to Britain is an evidence of growing national strength, though some think not of wisdom, and a similar difference of opinion may be held in regard to the granting of bounties on iron, lead and steel production and on binder twine.

The Chinese poll tax is now \$500; canal dues and steamboat tonnage dues were suspended for two years and shipping interests were further pleased by aid to dry dock building; a bill was passed providing for the settlement of railway disputes by conciliation, and if that failed by arbitration; Postmaster-Gen. Mulock still points to expanding revenues and reports for the first time a surplus in his department; the general treasury, Mr. Fielding reports, is also expanding and the public debt is being reduced.

An unbiased opinion we believe would heartily declare that the country is being well handled by the present government, and not the train loads of opposition literature will dispel the satisfaction that exists among Canadians over the administration of Hon. Wilfrid Laurier, whose health, everyone rejoices to know, is improving so nicely.
