"Take out that ad" said J Wismer to us the other day, "I sold that horse some time ago and still buyers keep coming." Mr Wismer's ad had been overlooked and ran longer than intended, but the incident shows how Review advertising always brings results.

### DEATH OF R. J. DOYLE.

By the death of Richard Judson Doyle, who passed away Monday night at Judsonville, his residence in Sarawak, Owen Sound lost probably its most noted citizen. As the Liberal candidate in two heated campaigns, as the founder of a fire insurance company, the first man to manufacture Portland cement on the continent of America from native marl, as an editor and successful business man, he was probably more widely known than any other citizen of that town. Deceased was in his 60th year. He was born in Nova Scotia and went to Owen Sound when a young man. Shortly after his arrival there he married Miss Mary Stephens, a well known Owen Sound lady. Mr Doyle was the largest holder of real estate in Dundalk, owned a six hundred acre orange plantation and winter residence in Manatee county, Florida, and many large holdings in this vicinity. He founded the Dominion Grange Insurance Company, and during the twenty-two years of its existence was its manager. Some time ago he began experimenting with the marl deposit in this vicinity, and though the claim has been disputed. The Scientific American, after careful investigation, gave him credit for being the first man who manufactured Portland cement on this continent from native products. He founded the Owen Sound Lake are among the largest in the Dominion, and in the same village had several smaller manufacturing concerns in operation. Owing to his connection with the Dominion Grange Insurance Company he became identified with the Patron movement and founded their official paper, the Patron and Co-operator, which is still in existence. Deceased served in various municipal capacities in Sarawak and Keppel townships and was chosen as the Liberal standard-bearer against David Greighton, now Deputy Receiver-General. He was defeated, but at the next election received the nomination, and fell short of election by only 17 votes. Mr. Doyle spent the past four winters in Florida. His wife predeceased him eleven years, the surviving children being R. J. Doyle, Jun., County Councillor, Mrs. W. Arthur Burrows, wife of the manager of the Merchants' Bank at West Brooke; Misses Eva E. Doyle and Winnie E. Doyle. Deceased was a charter member of the A. O. U. W. The funeral took place to Greenwood Cemetery on Thursday afternoon.—Dundalk Herald.

### THE EDUCATION OF BOYS.

In the Delinquent for November Mrs Theodore W. Birney has a suggestive paper on the Education of Boys as future Fathers and Citizens. The gist of her argument is that boys seldom receive the sympathy to which they are entitled—not a manly, sentimental sympathy that is calculated to spoil the child, but an intelligent comprehension of his needs and an interest in his doings and belongings. Her conclusion is that if parents will only take a genuine interest in all things that interest their boys, they can hold their confidence, and so long as they possess that they can be reasonably sure that their sons will not go far wrong. Parents are wont to look on the problems of youth with the eyes of an adult. How much good result result to many little fellows if their parents would come down to their view point, or come up perhaps, recognizing the limitations of their inexperience, and judging their deeds and misdeeds in the light of it. The rule of the rod is past, and inasmuch as the new order of things has brought much happiness into the lives of the little ones, so will a better understanding of the boy nature on the part of parents benefit them immeasurably.

### "A NEW INDUSTRY."

Under the above heading the Warton Echo of last week has the following brief item: "The Warton Cement Brick Co., is the name of a new concern that will be an important addition to the business life of Warton. The plant will be ready for operation about the last of the week, and the bricks, which will be made of sand and cement, will be as good as the Milton pressed brick and very much cheaper. The capacity of the plant will be 20,000 per day. Employment will be given to eight men." Now here is something that is eminently suitable for Durham, because we have abundance of the material and because there is a demand for brick that can not be supplied. We hope some of our enterprising citizens will examine into the matter and, if all too busy to engage in it themselves, the fact should be made known that a splendid opening exists here for such an industry. The late Neil McKechnie had his thoughts on this and kindred matters for a good while before his last illness, and the town would welcome anyone who will take the matter up.
