Mr. Francis H. Clergue arrived in Toronto yesterday, and together with Mr. Cornellus Shields, Mr. H. C. Hamilton and Mr. James Conmee, M. P. P., waited upon the Government. Premier Ross and his colleagues were urged to take such steps as would protect the Canadian creditors. To do this the Government would be called upon to withhold the concessions granted to the company. This would have the effect of incommoding Speyer & Co. in their efforts to put the works on a spaying basis. As matters now stand everything is shaping for a big legal battle, in which the rights of Speyer & Co. to possession of the property will be hotly contested.

The Electograph is a Combination of the Telephone and Phonograph.

The mechanism combines a telephone and phonograph. Messages spoken into the telephone transmitter were sent over a dozen miles between London and Twickenham, where they were received by the phonograph, without audible sound, by direct electrical effect on a vibrating diaphram. for Discussion.

London, Dec. 21 .- In the course of

a speech at Leeds, Mr. Joseph Cham-

berlain announced that under the auspices of the Tariff Reform League a commission was being formed to consider the condition of British trade and the remedies applicable thereto. He said it would be an unofficial and non-political commission, representing every principal industry. It would comprise representatives of India, the Crown colonies, and the autonomous colonies, It would invite witnesses from every trade, and would endeavor, after hearing all interests, to frame a model tariff. He added; "Whenever the workers if they think they can ed to the country, and upon which Bebel's party has required nineteen | ed States, have community of race, years to increase from 600,000 to 3,- community of interests, common 000,000, so it is not disposed to view | patriotism, and common sentiment, vet the United States has got some-. new workingmen's party, which was thing we lack.
