# The Fluffy Sense.

And so the Wheel of Life goes round And such things happen every day. They met at a dance. One of those every-right dances that the season gives, in a house unrecognizable behind a wealth of flowers, supper,dowagers, dancing men and fluffy girls. He had noticed her first because sho was different from the other women there. She wasn't fluffy. On the contrary, sho was as scrupulously neat as only the lean of purse can ity of her garb, which amounted al- gown contrasting with the great most to shabbiness, his critical eye marked her as the prettiest girl in have guessed that at so opportune the room, dressed in a plain white a moment the good fairy Fortune satin dress, relieved by a modest would throw open the colfers of the bunch of violets-not even a spray, | rich relations for her? but a plain market bunch, that matched the color of her wondrous eyes, so grave and serious, but dangerously magnetic, as he discovered later on. She had soft, undressed hair, which grew low and straight over her white forehead, and lay coiled upon a distractingly pretty neck, helping to accentuate the whiteness of her shoulders.

It had taken both time and trouble to find someone who knew her, and would multer the words conventionality demanded, before he could hold her a.m. round figure in his arms as they waltzed together with a perfection of motion which he had never experienced before. "I might have guessed it," was the compliment he paid when later on they had become confidential, and she told him that she taught dancing for a livelihood. He further learned that the daughter of the house, in whose honor the ball was being given, was a pupil of hers, and had ins s el upon her coming to the festivity. Later on, he discovered many things about her, notably, ner name, an illustrious one, borne by some of the richest of his acqual .time . He crel 'shame upon them" when she had told him of her struggles. But s e had sm led, gently protesting that even in the most opuleat circles penury lurked. And if she had not their riches she at least! had their independ noe, the thing she counted dearest in the whole wide; work. She loved it far too dearly to ever thank of giving it up. And folk were kind to her, including the rich -demands upon them.

she were very young; their acquaint- of the Scotch farmer, the Prince ance, he felt, was not sufficiently spent considerable time in the litold to have admitted of their having the cottage. A special chair was set fallen out together. He hinted at apart for him, and this has since disillusionment and faiture. At first | been handed down from generation she laughed at him, and then forbade | to generation through the family him to mention the word, which she who originally entertained the disassured him she had long since struck out of her aictionary. He, in his turn, laughed at her enthusiasm, while admitting that he admired her courage. And they walt ed together again and

But who was to

There was a wedding in the money. ed branch of her family and she was bidden to act as bridesmaid, clothed for the occasion as belitting a pretty Cinderella turned princess in a moment. She came to the ball in all the bravery of her recently acquired finery and appeared a dainty, fluttering mass of bewildering feminine grace. The knowledge that for once she could compete with the fluffy maidens of wealth, gave her the courage of her superiority, and the pretty head, perfectly coiffured, was held high as she advanced into the room. Even in his eyes her beauty was intensified, as he watched the gensation her entry made. He went to meet her eagerly, proudly presenting her to his own people. The joy of life which had lately grown faint come back intensified in her soft glash of happiness as the violet eyes met his and sealed her fate. And amid the congratulations that were hers, none were louder than those of the Mammon worshippers of her tribe, who smiled indulgent belief as they listened to her declaration: "It was the lovely frock you gave me did it. I owe it all to that." For, of course, they coald not understand how anything so light and airy could turn the scale of a woman's life.

Historic Chair.

One of the chairs used by Bonnie world. And then there was her Prince Charlie while in hiding in Scotland is still preserved in Glasgow. NATURE A GOOD ARTIFICER, Those Who Try Find it Hard to Improve

Upon Its Handiwork.

Did you know the method of making shot has never changed? No? Well, it's sick as long as he could afford to. | carrying his typewriter upstairs in a fact, said the shotmaker, "Hundreds of years ago shot was made in just the same way it is made now. Seems, strange, doesn't it, that with all the improvements in other lines none has been made in this? Oh, yes, plenty of men have tried to find some better way, but they all have had to give it up and go back to the old shot tower. They wanted to get rid of the high tower, for that is the most expensive part of

"You know shot is made by pouring a melted composition of lead and arsenic through a screen or from a big ladle with a serrated edge at the top of the tower and letting it fall into a tank of water. The drops of lead get perfectly round on their way down, just like rain drops, and by the time they reach the water they are cold enough so they do not flatten out when they strike. Then the water finishes the cool

"They have tried dropping the lead through a big tube with a blast of cold air against the outside, and they have tried dropping it through glycerine. But none of these ways seems to work. Why can't they improve on it? Well, I suppore because the fellow who started making shot found the right way. It's just following the course that nature It is only the fully occupied who have takes in making hail, and I don't supgame. That's why they haven't made
