HUMMING OF THE WIRES.

Meteorolegical Changes Are Denoted When the Music is Pronounced.

Everyone has noticed at times that the telegraph lines strung along the streets and roadways are singularly musical, emitting a humming sound that can be distinctly beard at a considerable distance. When telegraphy was in its infancy the yokel used to think that the noise was made by messages passing over the wires. Most educated people know that this is a silly theory, but they will be sura Polish meteorologist, declares that the noise is not given out by the wind at all, but that it is caused by unseen terrestrial changes caused by meteorological influences. He hopes by a close study of the sounds to be able to discover a means of foresee-

Whatever theory he formulates in it will be more reliable than the metcorological forecasts which have There is something humiliating in the fact that the English weather defles fice, with all its facilities, seems to be unable to give us more than a rough idea in figures of the weather which we have enjoyed-or otherwise

-and that is not very consoling. There is an opening for Dr. Laska, and there is a further opening for him if he can put the wires to use when Mr. Marconi has once for all proved that they are no longer necessary for the transmission of messages. And the rustic, instead of watching for colored sunsets, will then put his car to telegraph poles. Curiously enough, the heathen in his Hindoo blindness already foretel's the arrival of the rainy season by listening to the sound of the lonely wires which cross the vast expanses of his country. He found it out long ago, and the scientist laughed at him for his pains.

HELP YOUR CHILD.

When your child-whether it is a big child or a little baby-suffers from any of the minor ailments ons or fidgety and doesn't sleep well. the well grown child. Mrs. F. D. I find that one dose is usually suffi-"Listen again, Violet," he con- sword into my heart you would have As for what Felix had said about to bad blood and weak nerves. You the boxes without trimming, it is well the stomach or bowels." If you do

A TIDAL WAVE.

From a weather point of view, pathings. The increased duration of daylight has been most apparent since the advent of the New Year, but January has come and gone with a deluge of rain; inducing the belief: -if the weather record of the month is to be regarded as any guide to that to be expected during the remainer of the year-that the dreary record of 1903 is likely to be beaten. Such inconveniences as these, howsea to the flower and potato gardens for which Scilly is famous. At Bude the lock-gates which protect the canal were swept away; at Appledore, 60 feet of the sea wall was destroyed and the town flooded; and the train service from Weymouth to Portland was temporarily suspended in consequence of the sea breaking. in for a full share of the sea's fierce

ONLY ONE WAY.

In this day of low-priced newspapers ragged, preciritous promontorier, virtually every family which can be influenced by advertising tokes a favortwisted into the most appalling ite newspaper, which is read every day marest shore. I' the shore be astern read by the persons to whom it is chiefsailors turn about and The If it ly addressed. There is no other way be ahead they fice. Balkal terrifes than through the favorite newspaper by Russian not only in summer but in which the family can be reached by
